

This comprehensive Food Safety Management System Certification package contains all the tools you will need to achieve ISO 22000:2018 Certification.

This workbook is provided to guide you in the implementation of your Food Safety Management System. The workbook is divided into 7 steps that are designed to assist you in implementing your food safety management system effectively:

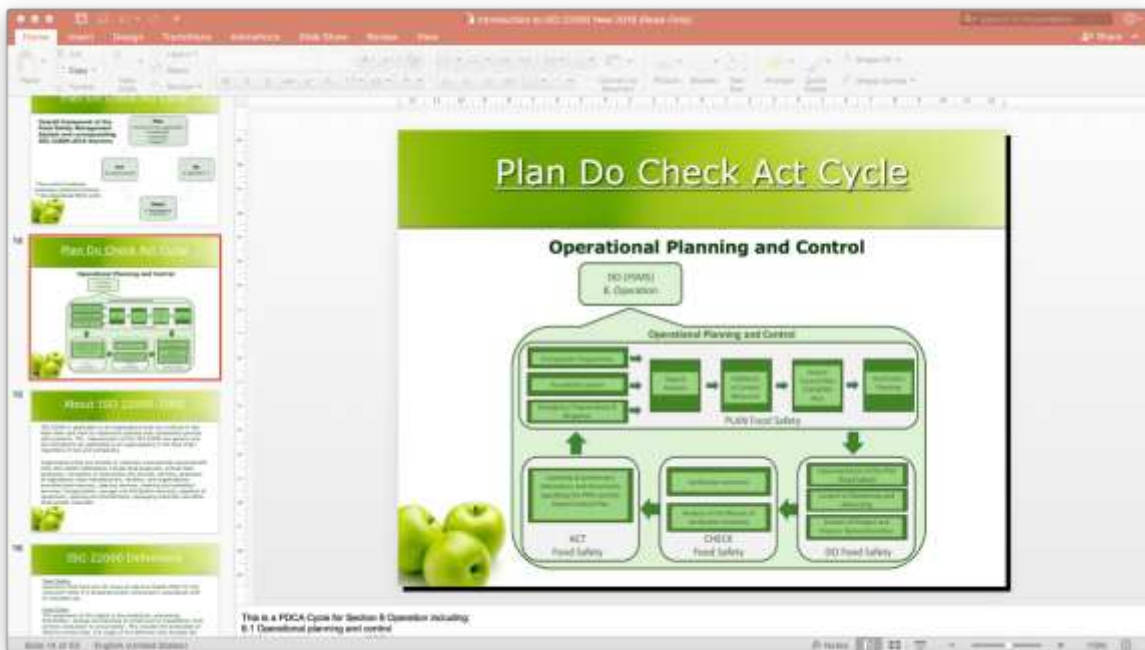

- ✓ Step One: ISO 22000 Training for Management
- ✓ Step Two: Top Management Implementation
- ✓ Step Three: Food Safety Management System
- ✓ Step Four: Project 22000 including HACCP Implementation
- ✓ Step Five: Internal Auditing & Checklists
- ✓ Step Six: Review and Updating
- ✓ Step Seven: Final Steps to ISO 22000 Certification

[Click here to order the IFSQN ISO 22000 Certification Package](#)  
Now

**Step One: ISO 22000 Training for Management**

Introduction to ISO 22000

This PowerPoint presentation will introduce the ISO 22000 standard to the management team and explain exactly how to start the process of implementing an ISO 22000 compliant Food Safety Management System.

## **Step Two: Top Management Implementation**

Top Management need to start the implementation process.

determine the Context of the organization, how to demonstrate Leadership and Planning establish the Food Safety Management System fundamentals including Food Safety Policies and Objectives ensuring the integration of the FSMS requirements into the organization's business processes.

At this stage, Top Management need to:

- ✓ determine the Context of the organization
- ✓ demonstrate Leadership
- ✓ plan the establishment of the FSMS
- ✓ plan to provide adequate support and resources to establish the FSMS
- ✓ ensure there is adequate infrastructure and work environment
- ✓ allocating responsibility and authority

This stage requires the Top Management to meet and establish the foundations for the Food Safety Management System:

- ✓ Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS
- ✓ Determine the interested parties (Customer, Regulatory, Statutory and other) that are relevant to the FSMS
- ✓ Determine Customer, Regulatory, Statutory and other relevant Food Safety requirements
- ✓ Define the scope and boundaries of the FSMS
- ✓ Develop a Food Safety Policy
- ✓ Based on the Food Safety Policy establish Food Safety Objectives
- ✓ Plan the establishment of the FSMS using the project planner
- ✓ Provide adequate support to establish the FSMS
- ✓ Ensure there is adequate infrastructure and work environment
- ✓ Allocate responsibility and authority
- ✓ Assess, plan and establish appropriate internal and external communication (including the food chain) channels

A meeting should now be co-ordinated involving all the Top Management Team.

Top Management: Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS

Top Management need to determine the internal and external issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS. In order to achieve this aim Top Management should out an Organization Analysis considering external and internal issues, including legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization.

This analysis can be carried out using the FSMS 4.1 Organization Risk Analysis Tool included in the package:

Organizational Risk Analysis							
Area of Issue	Description	Internal External	Positive Negative	International National Regional Local	Risk Level	Proposed Action	Timescale Priority
Legal	Issues complying with FSMA	Internal	Negative	National	High	Bring in external resource to assist in FSMA compliance	Priority
Technological	Technology out of date	Internal	Negative	International	Medium	Renew out of Date Technology	
Competition	Lack of Competition	External	Positive	Regional	Low	Increased Marketing	
Market	Only Short Term Customer Contracts	External	Negative	International	High	Seek Longer Term for Customer Contracts	Priority
Cultural	Product of Religious, ethical or moral significance	External	Negative	Local	Low	Also look to Products not of Religious, ethical or moral significance	
Social	Need for Seasonal Workers	Internal	Negative	Local	High	Contract Seasonal Workers	Priority
Economic environments	Harvest Failure	External	Negative	National	Medium	Look for Alternative Supplies	
Food fraud	Economically motivated adulteration (EMA)	External	Negative	International	Medium	Increased Supplier Assurance & Product Testing	
Food defence, Cybersecurity & Intentional contamination	Premises located in a politically or socially sensitive area	Internal	Negative	Local	High	Increase Security Short Term. Long Term look to relocate.	Priority
Knowledge (Organisations)	Lack of Technical Skills	Internal	Negative	Local	Medium	Recruit Technical Skills	
Performance (Organisation)	Unavailable Operations	Internal	Negative	Local	High	Project Implementation Operational Efficiency	Priority

The FSMS 4.1 Organization Risk Analysis Tool allows Top Management to summarise the Analysis by Area of Issue; Description of Issue; Whether Internal or External; Whether Positive or Negative; Whether International, National, Regional or Local; Risk Level; Proposed Action; Timescale and Priority.

Top Management FSMS Implementation Checklist

The Top Management FSMS Implementation Meeting should follow the guidelines of the Top Management Implementation Checklist:

1	Top Management determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS	
	External & Internal Issues	Actions to address risks and opportunities
2	Top Management Determine the interested parties (Customer, Regulatory, Statutory and Other) that are relevant to the FSMS.	
	Interested Parties (Customer, Regulatory, Statutory and Other)	Details

\* When determining this scope, Top Management consider the external and internal issues, the interested parties and applicable statutory, regulatory and customer requirements.

\*\* Top Management ensure that the food safety policy and the objectives of the FSMS are established and are compatible with the strategic direction of the organization

\*\*\* Top Management ensure the integration of the FSMS requirements into the organization's business processes

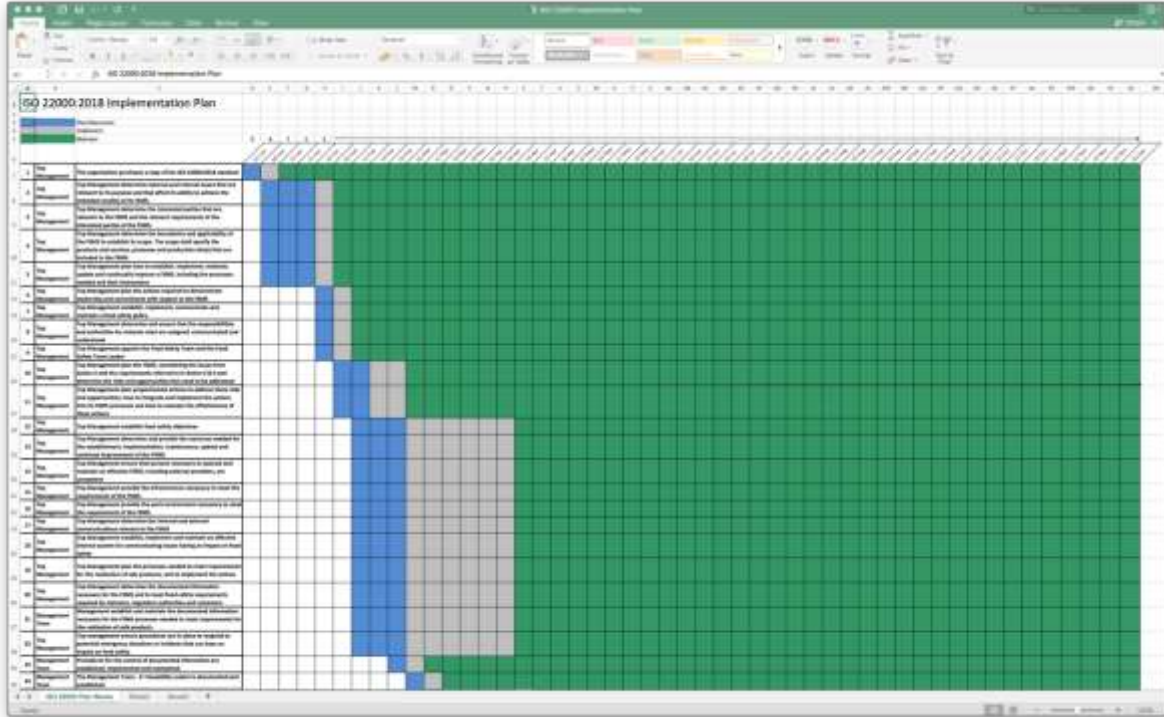

\*\*\*\* Top Management also need to ensure the importance of effective food safety management and conforming to the FSMS requirements, applicable statutory and regulatory requirements, and mutually agreed customer requirements related to food safety is communicated effectively.

The outputs from this meeting will be:

- ✓ Food Safety Policy
- ✓ Food Safety Objectives
- ✓ Defined Scope
- ✓ A Developed Project Planner
- ✓ Support Plan for Implementation/Training
- ✓ Plans for Infrastructure/Work Environment
- ✓ Allocation of Responsibility/Authority
- ✓ Defined Communication Channels

## Top Management Establish the Project Plan

Using the Excel Project Planner Top Management adapt the template supplied with the system to establish a Project Plan.

### ISO 22000:2018 Implementation Plan

Step	Responsible Team	Implementation Task
1	Top Management	The organisation purchases a copy of the ISO 22000:2018 standard
2	Top Management	Top Management determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS.
3	Top Management	Top Management determine the interested parties that are relevant to the FSMS and the relevant requirements of the interested parties of the FSMS.
4	Top Management	Top Management determine the boundaries and applicability of the FSMS to establish its scope. The scope shall specify the products and services, processes and production site(s) that are included in the FSMS.
5	Top Management	Top Management plan how to establish, implement, maintain, update and continually improve a FSMS, including the processes needed and their interactions
6	Top Management	Top Management plan the actions required to demonstrate leadership and commitment with respect to the FSMS
7	Top Management	Top Management establish, implement, communicate and maintain a food safety policy
8	Top Management	Top Management determine and ensure that the responsibilities and authorities for relevant roles are assigned, communicated and understood
9	Top Management	Top Management appoint the Food Safety Team and the Food Safety Team Leader
10	Top Management	Top Management plan the FSMS, considering the issues from Action 2 and the requirements referred to in Action 3 & 4 and determine the risks and opportunities that need to be addressed
11	Top Management	Top Management plan proportionate actions to address these risks and opportunities; how to integrate and implement the actions into its FSMS processes and how to evaluate the effectiveness of these actions
12	Top Management	Top Management establish food safety objectives
13	Top Management	Top Management determine and provide the resources needed for the establishment, implementation, maintenance, update and continual improvement of the FSMS.

 Revision 1 22<sup>nd</sup> June 2018  
 Owned by: Production Manager  
 Authorised By: Technical Manager

Top Management provide adequate support to establish the FSMS

Top management establish and provide adequate support to establish the FSMS including the resource required to complete the implementation plan, establish, implement and maintain the Food Safety Management System, conduct Internal Audits and Monitor & Measure.

8	Top management provide adequate support to establish the FSMS	
	Resource requirement	Details
	Food Safety Team Leader	
	Food Safety Team	
	FSMS Steering Group	
	Trainers	
	Internal Auditors	

## ISO 22000 Food Safety Management System Implementation Workbook

- External communication and liaison regarding the management systems.

Site and Departmental Annual Objectives and targets are agreed and documented in the Management Review minutes.

Objectives of the food safety management system and planning to achieve them

For Objectives Top Management need to define:

- what will be done
- what resources will be required
- who will be responsible
- when it will be completed
- how the results will be evaluated.

### Key Personnel and Nominated Deputies

<b>Job Title</b>	<b>Job Holder</b>	<b>Nominated Deputy</b>
Emergency Response Coordinator		
General Manager		
Operations Manager		
Production Manager		
Warehouse Manager		
Maintenance Manager		
Factory Safety Manager		
Human Resource Manager		
Quality Manager		
Packing Manager		
Technical Manager (Food Safety Team Leader)		
Goods Receipt Manager		
Design and Development Manager		
Planning Manager		
Customer Service Manager		
Laboratory Manager		
Distribution Manager		

## Top Management establish Communication Channels

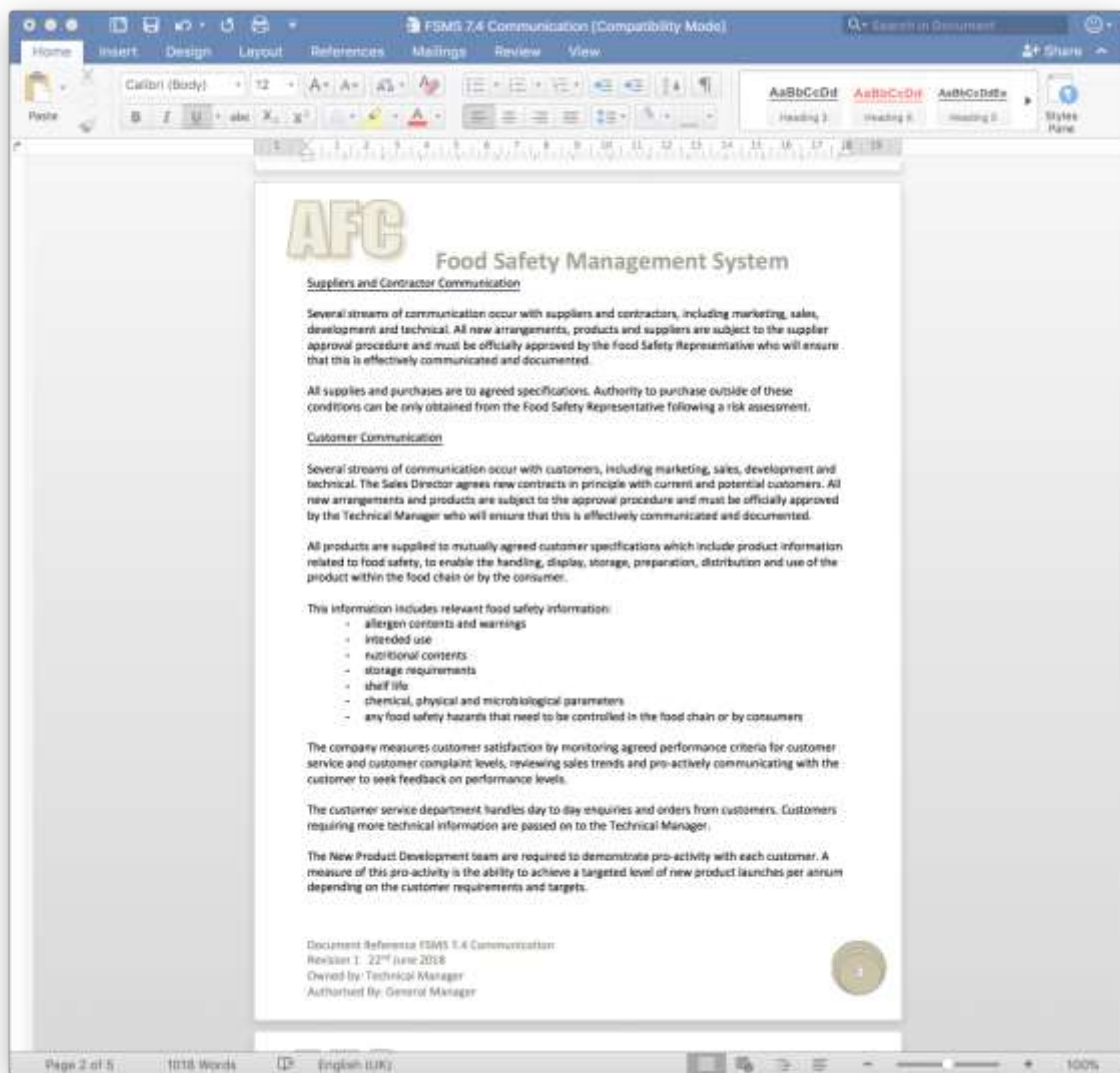

Top Management must establish and document clear levels of communication for suppliers, contractors, customers, food authorities and staff within the food safety management system. Detailed communication arrangements and food safety communication responsibilities for all levels of management should be contained in the food safety and quality manual. The communication procedures should apply to all members of staff, both full time and temporary.

Procedures should be in place to address communication including:

### Suppliers and Contractor Communication

### Customer Communication

### Food Authority Communication

## Step Three: Food Safety Management System

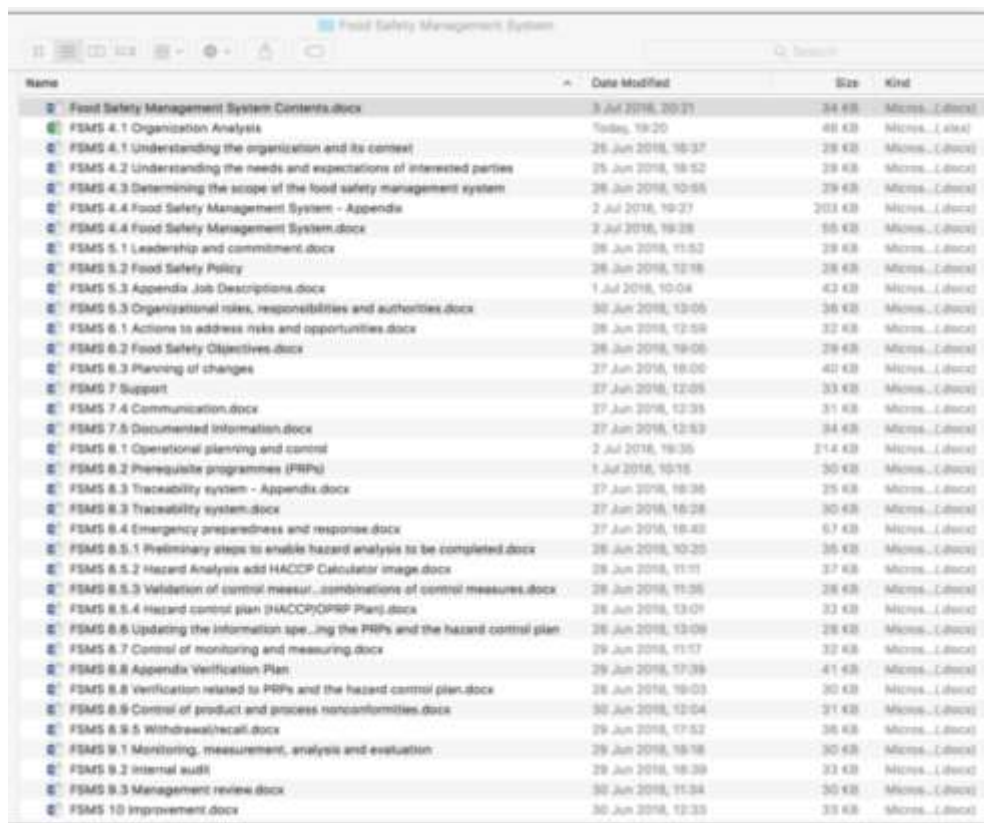

The Food Safety Management System contains a comprehensive ISO 22000 documentation package that you are now ready to implement:

- ✓ Food Safety Manual containing a set comprehensive procedures and record templates.
- ✓ HACCP manual containing food safety procedures and our unique HACCP Calculator.
- ✓ Laboratory manual including sample procedures and records.
- ✓ Prerequisite Programmes manual.

At this stage, you can choose to totally implement the procedures supplied or pick those that are applicable to your process.

### Food Safety Manual

The Food Safety Management System folder contains comprehensive top level procedures templates that match the clauses of the ISO 22000:2018 standard and form the foundations of your Food Safety Management System so you don't have to spend 1,000's of hours writing compliant procedures:

# ISO 22000 Food Safety Management System Implementation Workbook

## ISO 22000 HACCP Manual containing the HACCP Calculator

The HACCP System is defined in the following Food Safety Management System documents:

- FSMS 8.5.1 Preliminary steps to enable hazard analysis
- FSMS 8.5.2 Hazard analysis
- FSMS 8.5.3 Validation of control measure(s) and combinations of control measures
- FSMS 8.5.4 Hazard control plan (HACCP/OPRP plan)
- FSMS 8.6 Updating the information specifying the PRPs and the hazard control plan
- FSMS 8.7 Control of monitoring and measuring
- FSMS 8.8 Verification related to PRPs and the hazard control plan

There are also supplementary ISO HACCP Manual documents including the HACCP Calculator ISO 22000 2018 & Instructions:

## Prerequisite Programmes Manual

A comprehensive set of prerequisite programme templates compliant with TECHNICAL ISO/TS SPECIFICATION 22002-1 Prerequisite programmes on food safety — Part 1: Food manufacturing:

**Step Four: Project 22000**

This contains the project tools you will need to achieve ISO 22000 certification. In this part of the package you will find:

- ✓ Steering Group are established and briefed
- ✓ The Steering Group take control of the Project Plan established by Top Management
- ✓ The documents described previously are implemented as part of the Project Plan

<b>Food Safety Management System Steering Group</b>			
<b>FSMS Team Member</b>	<b>Name</b>	<b>Position</b>	<b>Qualification</b>
FSMS Team Leader			
FSMS Assistant Leader			
FSMS Team Members			

# ISO 22000 Food Safety Management System Implementation Workbook

## Project Plan

The Steering Group use the Excel Project Plan developed by Top Management as a step by step guide to implementing the Food Safety Management System.

The screenshot shows an Excel spreadsheet titled "ISO 22000:2018 Implementation Plan". The spreadsheet is organized into columns representing months (1 to 36) and rows representing implementation tasks. The tasks are categorized by responsibility: Top Management (blue), Management Team (green), and Management System (grey). The tasks are as follows:

Task No.	Task Description	Responsible Party	Start Month	End Month
1	The organization purchases a copy of the ISO 22000:2018 standard	Top Management	1	1
2	Top Management determines external and internal issues that are relevant to the process and that affect its ability to achieve the intended results of its FSSMS	Top Management	1	1
3	Top Management determines the interested parties that are relevant to the FSSMS and the relevant requirements of the interested parties of the FSSMS	Top Management	1	1
4	Top Management determines the opportunities and applicability of the FSSMS to enhance its scope. The scope shall specify the products and services, processes and production sites that are covered in the FSSMS	Top Management	1	1
5	Top Management plans how to establish, implement, maintain, update and continually improve a FSSMS, including the processes needed and their interaction	Top Management	1	1
6	Top Management plans the actions required to determine knowledge and competence with regard to the FSSMS	Top Management	1	1
7	Top Management establishes, implements, communicates and maintains a food safety policy	Top Management	1	1
8	Top Management determines and ensures that the responsibilities and authorities for relevant roles are assigned, communicated and understood	Top Management	1	1
9	Top Management appoints the food safety team and the food safety team leader	Top Management	1	1
10	Top Management plans the FSSMS, considering the food safety team and the requirements referred to in Action 2 & 4 and determines the risks and opportunities that need to be addressed	Top Management	1	1
11	Top Management plans proper levels of resources to address those risks and opportunities, how to integrate and implement the actions into its FSSMS processes and how to evaluate the effectiveness of those actions	Top Management	1	1
12	Top Management establishes food safety objectives	Top Management	1	1
13	Top Management determines and provides the resources needed for the establishment, implementation, maintenance, update and continual improvement of the FSSMS	Top Management	1	1
14	Top Management ensures that premises necessary to operate and maintain an effective FSSMS, including external premises, are appropriate	Top Management	1	1
15	Top Management provides the HR education necessary to meet the requirements of the FSSMS	Top Management	1	1
16	Top Management provides the work environment necessary to meet the requirements of the FSSMS	Top Management	1	1
17	Top Management determines the internal and external communication objectives for the FSSMS	Top Management	1	1
18	Top Management establishes, implements and maintains an effective internal system for communicating food safety information	Top Management	1	1
19	Top Management plans the processes needed to meet requirements for the realization of safe products, and to implement the actions	Top Management	1	1
20	Top Management determines the documented information necessary for the FSSMS and to meet food safety requirements required by statutory, regulatory, customer and consumer Management establishes and maintains the documented information necessary for the FSSMS processes needed to meet requirements for the realization of safe products	Management Team	1	1
21	Top Management ensures procedures are in place to respond to potential emergency situations as hazards that can have an impact on food safety	Management Team	1	1
22	Procedures for the control of documented information are established, implemented and maintained	Management Team	1	1
23	The Management Team A Traceability system is documented and established	Management Team	1	1

## ISO 22000 Food Safety Management System Implementation Workbook

Project Planning Tasks		Responsibility	Comments	Due Date for Completion	Date Completed
1	The organisation purchases a copy of the ISO 22000:2018 standard	Top Management			
2	Top Management determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS.	Top Management			
3	Top Management determine the interested parties that are relevant to the FSMS and the relevant requirements of the interested parties of the FSMS.	Top Management			
4	Top Management determine the boundaries and applicability of the FSMS to establish its scope. The scope shall specify the products and services, processes and production site(s) that are included in the FSMS.	Top Management			
5	Top Management plan how to establish, implement, maintain, update and continually improve a FSMS, including the processes needed and their interactions	Top Management			
6	Top Management plan the actions	Top Management			

**Food Safety Management System Document Implementation**

The Food Safety Management System (FSMS) documents should be edited and procedures implemented as per the plan and relevant training given.

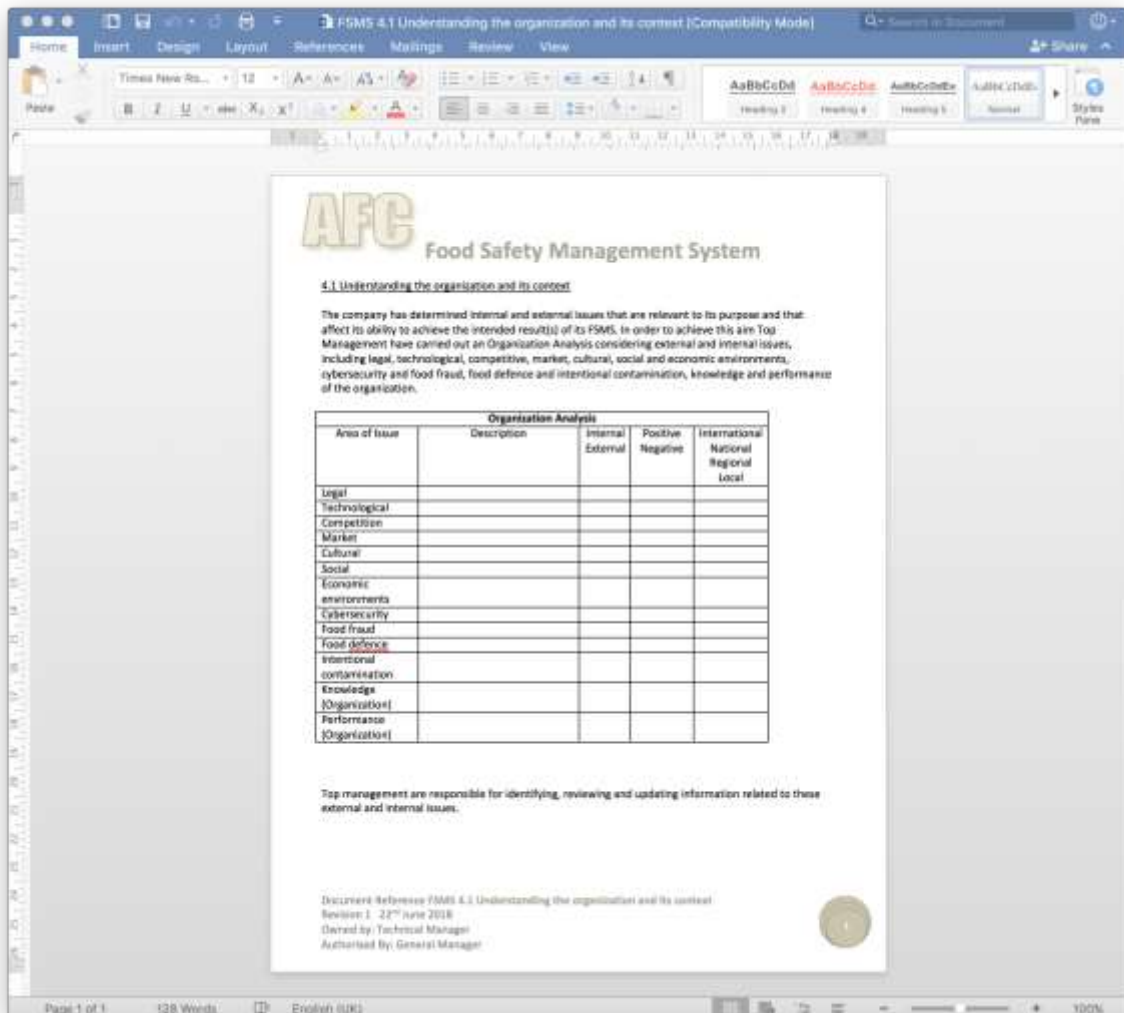

**4 Context of the organization**

FSMS 4.1 Understanding the organization and its context

FSMS 4.2 Understanding the needs and expectations of interested parties

FSMS 4.3 Determining the scope of the food safety management system

FSMS 4.4 Food safety management system

# ISO 22000 Food Safety Management System Implementation Workbook

PSMS 4.1 Organization Analysis

Organizational Risk Analysis							Timescale
Area of Issue	Description	Internal External	Positive Negative	International National Regional Local	Risk Level	Proposed Action	Priority
Legal	Issues complying with FSMA	Internal	Negative	National	High	Bring in external resource to assist in FSMA compliance	Priority
Technological	Technology out of date	Internal	Negative	International	Medium	Review out of Date Technology	
Competition	Lack of Competition	External	Positive	Regional	Low	Increased Marketing	
Market	Only Short Term Customer Contracts	External	Negative	International	High	Seek Longer Term for Customer Contracts	Priority
Cultural	Product of Religious, ethical or moral significance	External	Negative	Local	Low	Also look to Products not of Religious, ethical or moral significance	
Social	Need for Seasonal Workers	Internal	Negative	Local	High	Contract Seasonal Workers	Priority
Economic environments	Harvest Failure	External	Negative	National	Medium	Look for Alternative Supplies	
Food fraud	Economically motivated adulteration (EMA)	External	Negative	International	Medium	Increased Supplier Assurance & Product Testing	
Food defence, Cybersecurity & Intentional contamination	Premises located in a politically or socially sensitive area	Internal	Negative	Local	High	Increase Security Short Term. Long Term look to relocate.	Priority
Knowledge (Organization)	Lack of Technical Skills	Internal	Negative	Local	Medium	Recruit Technical Skills	
Performance (Organization)	Unreliable Operations	Internal	Negative	Local	High	Project Implementation Operational Efficiency	Priority

PSMS 4.2 Understanding the needs and expectations of interested parties

**AFC Food Safety Management System**

**4.2 Understanding the needs and expectations of interested parties**

Top management has determined relevant interested parties and the food safety requirements of those interested parties so that the company has confidence in its ability to consistently provide products and services that meet applicable statutory, regulatory and customer requirements.

Category	Food Safety Requirement	International National Regional Local
Statutory		International
Statutory		National
Statutory		Regional
Statutory		Local
Regulatory		International
Regulatory		National
Regulatory		Regional
Regulatory		Local
Customer 1		International
Customer 2		National
Customer 3		Regional
Customer 4		Local
Customer 5		

Top management are responsible for identifying, reviewing and updating information related to the interested parties and their requirements.

**AFC** Food Safety Management System

**6.3 Planning of changes**

Top Management determines the need for changes to the Food Safety Management system and plans those changes. When changes are made, Top Management consider:

- the purpose of the changes and their potential consequences
- the availability of resources to effectively implement the changes
- the allocation or re-allocation of responsibilities and authorities

Top Management are responsible for ensuring that the changes are carried out in a planned manner and effectively communicated.

Changes are subject to Process Change Approval and a Process Change Approval Form is completed:

Process Change Approval			
Process Change Proposed			Proposer
Description			
Reason for Change			
Process Change Category			
Raw Material <input type="checkbox"/>	Supplier <input type="checkbox"/>	Process Change <input type="checkbox"/>	Equipment <input type="checkbox"/>
Recipe <input type="checkbox"/>	Personnel <input type="checkbox"/>	Customer <input type="checkbox"/>	New Product <input type="checkbox"/>

## HACCP Training

An illustrated PowerPoint HACCP training presentation is supplied to train your food safety team.

The HACCP documents should be edited and procedures implemented by the Food Safety Team as per the plan.

### 8.5 Hazard control

FSMS 8.5.1 Preliminary steps to enable hazard analysis

FSMS 8.5.2 Hazard analysis

FSMS 8.5.3 Validation of control measure(s) and combinations of control measures

FSMS 8.5.4 Hazard control plan (HACCP/OPRP plan)

FSMS 8.6 Updating the information specifying the PRPs and the hazard control plan

FSMS 8.8 Verification related to PRPs and the hazard control plan

The Management Team will also be editing implementing procedures:

FSMS 8.1 Operational planning and control

FSMS 8.3 Traceability system

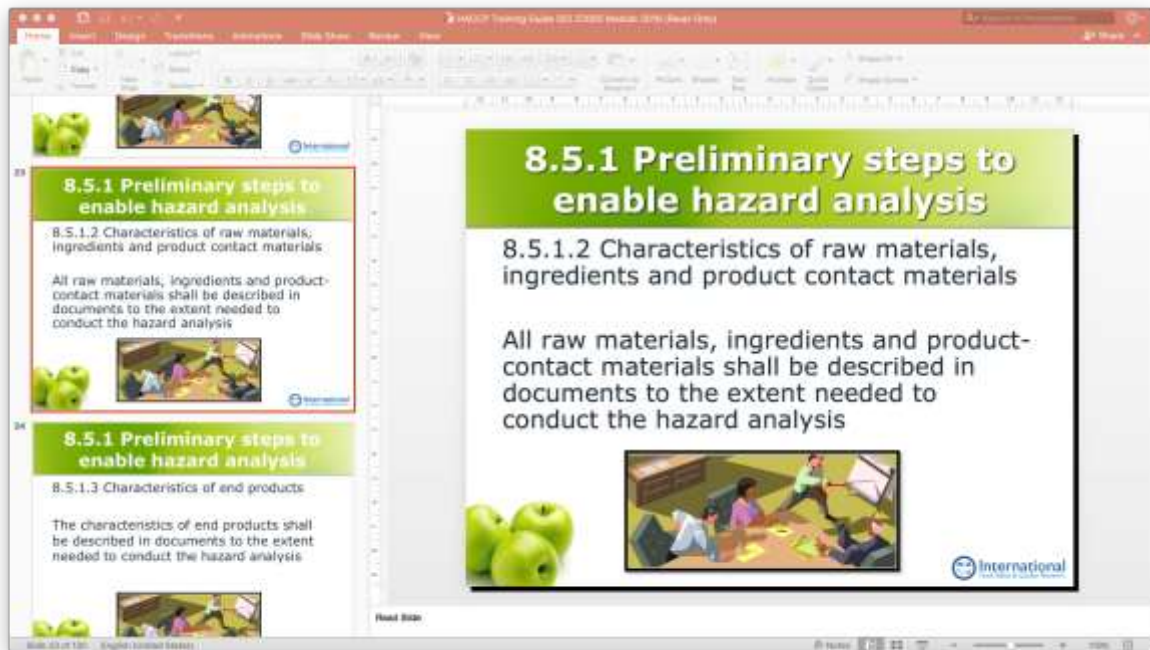

FSMS 8.4 Emergency preparedness and response

FSMS 8.7 Control of monitoring and measuring

FSMS 8.9 Control of product and process nonconformities

FSMS 8.9.5 Withdrawal/recall

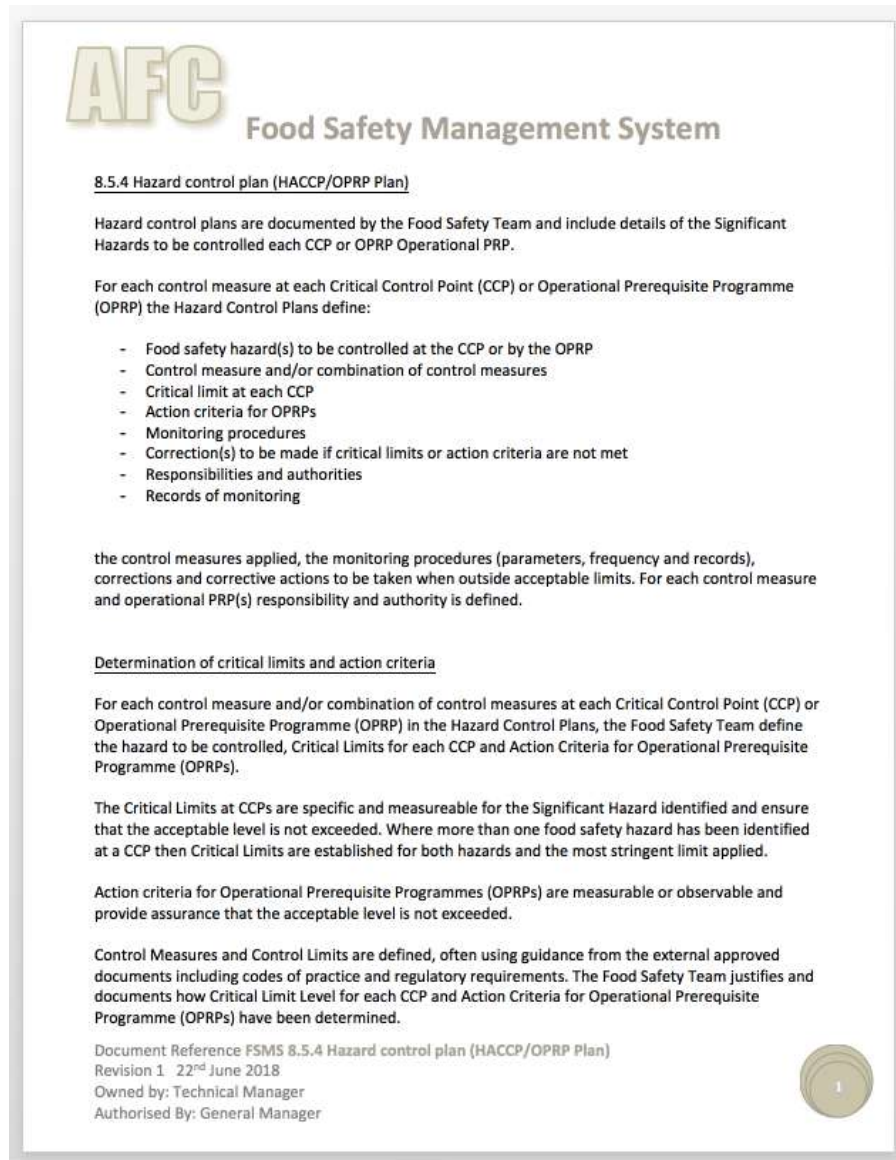

There is guidance in HACCP Training Guide ISO 22000 Module 2018

There is also guidance in Implementing ISO 22000 Food Safety Team Guide 2018

The Food Safety Team should follow, edit and maintain HACCP document FSMS 8.5.4 Hazard control plan (HACCP/OPRP Plan)

This document covers the following:

- Determination of critical limits and action criteria
- Monitoring systems at CCPs and for OPRPs
- Actions when critical limits or action criteria are not met
- Implementation of the hazard control plan

There is guidance in Implementing ISO 22000 Food Safety Team Guide 2018, HACCP Calculator ISO 22000 2018 Instructions and HACCP Training Guide ISO 22000 Module 2018.

At the same time as HACCP Implementation the Management Team will also need to be editing and implementing procedures:

## 8 Operation

FSMS 8.1 Operational planning and control

FSMS 8.3 Traceability system

FSMS 8.4 Emergency preparedness and response

FSMS 8.7 Control of monitoring and measuring

FSMS 8.9 Control of product and process nonconformities

FSMS 8.9.5 Withdrawal/recall

## 9 Performance evaluation

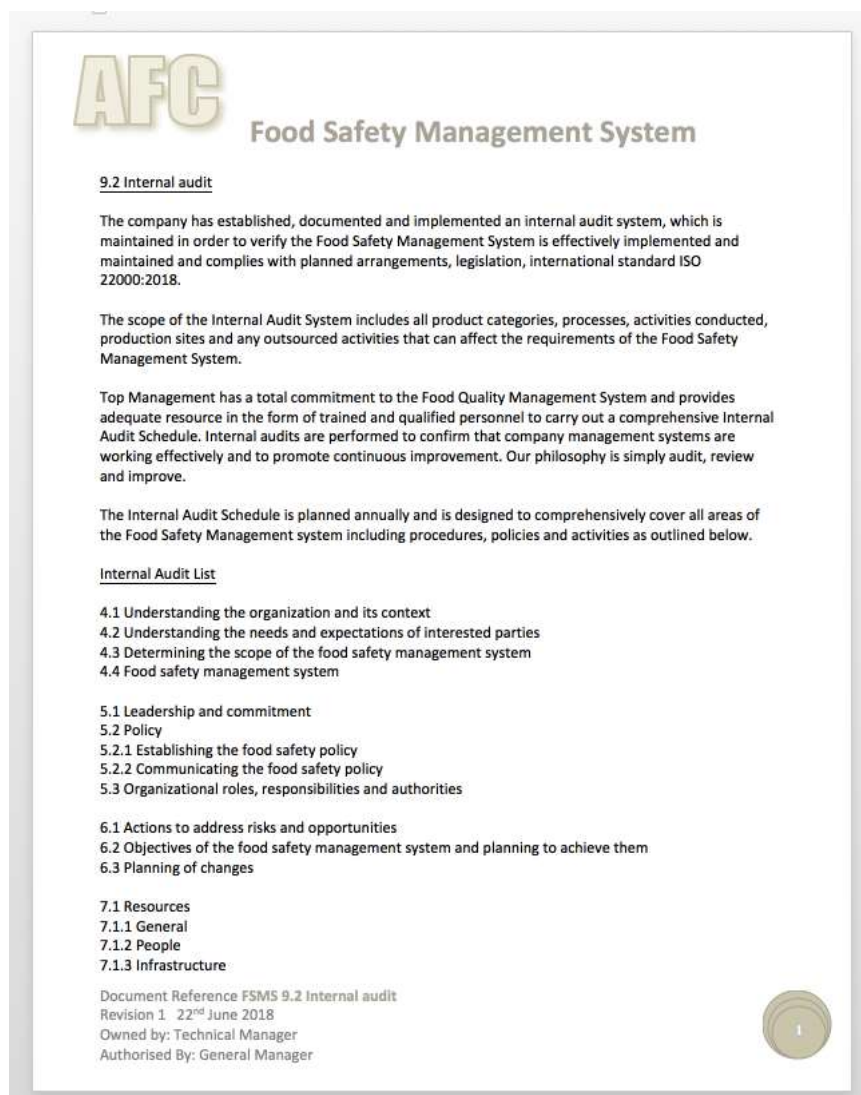

FSMS 9.1 Monitoring, measurement, analysis and evaluation

FSMS 9.2 Internal audit

FSMS 9.3 Management review

## 10 Improvement

FSMS 10 Improvement

**Project 22000 - Staff Training**

A significant part of the implementation process is training. Job Descriptions should be available for all staff and they should be briefed and aware of their food safety responsibilities.

A training matrix and plans should be drawn up for all staff and the relevant training given based on responsibility and authority.

**Staff Training Matrix**

Legend:  
■ Training required  
■ Training Completed & Good  
■ Training Not Required

Remember

Now that the Prerequisite Programmes, and Hazard Control Plans all staff should be trained in the appropriate procedures, limits, corrective actions, and record completion.

**Step Five: Internal Auditing & Checklists**

There is a PowerPoint Internal Auditor training presentation

**Internal Audit Checklists**

There is a checklist for each section of the ISO 22000 standard plus sample verification records for prerequisite programmes.

**AFC**

**ISO 22000:2018 Audit Checklist**

ISO 22000 Clause	Audit Findings
<b>8 Operation</b>	
<b>8.1 Operational planning and control</b>	
Does the organization plan, implement, control, maintain and update the processes needed to meet requirements for the realization of safe products, and to implement the actions determined in 6.1, by:	
- establishing criteria for the processes?	
- implementing control of the processes in accordance with the criteria?	
- keeping documented information to the extent necessary to have the confidence to demonstrate that the processes have been carried out as planned?	
Does the organization control planned changes and review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary?	
Does the organization ensure that outsourced processes are controlled (see 7.1.6)?	
<b>8.2 Prerequisite programmes (PRPs)</b>	
8.2.1 Has the organization established, implemented, maintained and updated PRP(s) to facilitate the prevention and/or reduction of contaminants (including food safety hazards) in the products, product processing and work environment?	
8.2.2 Are the PRP(s):	
- appropriate to the organization and its context with regard to food safety?	
- appropriate to the size and type of the operation and the nature of the products being manufactured and/or handled?	
- implemented across the entire production system, either as programmes applicable in general or as programmes applicable to a

ISO 22000 Audit Plan with Risk Rating

The Food Safety Team Leader should draw up the Internal Audit Schedule based on the following criteria:

- Importance of the processes concerned
- Changes in the FSMS
- Results of monitoring, measurement
- Risk associated with the procedure or activity
- Results of Previous audits
- Number of Corrective and/or Preventive Actions raised or outstanding
- Customer Complaint Analysis
- Results of the Management Review

## Step Six: Review and Updating

Top Management and the Management Team follow procedures:

### **9 Performance evaluation**

FSMS 9.1 Monitoring, measurement, analysis and evaluation

FSMS 9.3 Management review

### **10 Improvement**

FSMS 10 Improvement

## FSMS 9.1 Monitoring, measurement, analysis and evaluation

### Food Safety Management System

#### 9.1 Monitoring, measurement, analysis and evaluation

##### Measuring and Monitoring

The company has identified and implemented the monitoring, measurement, and analytical processes required to maintain the food safety management system.

Measurement and Monitoring Procedures have been established, documented and implemented to meet Hazard Control Plan and PRP requirements.

Hazard Control Plan and PRP requirements are defined in the HACCP Manual and individual PRP procedures. The establishment of Hazard Control Plan control measures, monitoring procedures, critical control points, control limits, OPRPs, action criteria, corrections and corrective actions are documented in Hazard Control Plans and the HACCP Manual.

Quality requirements for measurement and monitoring have been designed using a similar approach to hazard analysis in identifying the monitoring, measurement, and analytical processes required to maintain product conformity to requirements. All the monitoring, measurement, and analytical processes required have been planned by following the process below which identifies the specific processes at each stage of manufacturing:

- |         |   |
|---------|---|
| Stage 1 | A flow diagram is prepared of the steps in the process.<br>An analysis is conducted by identifying control options  |
| Stage 2 | The Control Points in the process are identified  |
| Stage 3 | Monitoring, measurement and analytical limits which must be met to ensure control are established   |
| Stage 4 | Measurement, monitoring and analysis procedures are established and scheduled for each stage.   |
| Stage 5 | The corrective action to be taken when limits are exceeded are established.   |
| Stage 6 | All procedures and records appropriate to the monitoring, measurement and analysis processes including acceptable limits at each stage are documented and implemented in a Product Control Plan. Methodology and Standard tests are specified in the Industry Code of Practice. |
| Stage 7 | Verification that the monitoring, measurement and analysis processes are working effectively is carried out.  |

This system considers each stage of the process from ingredient intake to product despatch. Releases of ingredients, in-process and finished product are controlled and documented by authorised personnel.

**Stage 8 Final Steps to ISO 22000 Certification**

There are a few final steps to achieving ISO 22000 Certification:

- ✓ Carry out an assessment of your system to make sure that it meets the requirements of the certification scheme using the checklists provided
- ✓ Ensure any areas requiring corrective action are addressed
- ✓ Choose your Certification Body
- ✓ Make contact with the Certification Body
- ✓ Pre-assessment
- ✓ Formal assessment
- ✓ Certification
- ✓ Celebrate!
- ✓ Communicate your success!

## Assess the Food Safety Management System

The Steering Group need to allocate responsibility to assess if the established Food Safety Management System meets the requirements of the ISO 22000 standard, TS ISO 22002 and CODEX Guidelines using the checklists provided.

<b>ISO 22000 Food Safety Management System Requirements Internal Audit</b>	
<b>ISO 22000 Clause</b>	<b>Audit Findings</b>
<b>4 Context of the organization</b>	
4.1 Understanding the organization and its context	
Has the organization determined external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its Food Safety Management System?	
Has the organization identified, reviewed and updated information related to these external and internal issues (legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization)? <i>See notes from the standard.</i>	
4.2 Understanding the needs and expectations of interested parties	
To ensure that the organization has the ability to consistently provide products and services that meet applicable statutory, regulatory and customer requirements with regard to food safety, has the organization determined:	
- the interested parties that are relevant to the Food Safety Management System?	
- the relevant requirements of the interested parties of the Food Safety Management System?	
Does the organization identify, review and update information related to the interested parties and their requirements?	
4.3 Determining the scope of the food safety management system	

## ISO 22000 Food Safety Management System Implementation Workbook

hazards to be effectively controlled.			
4.1 LOCATION			
4.1.1 Establishments	Compliant		Comments
	Yes	No	
Potential sources of contamination need to be considered when deciding where to locate food establishments, as well as the effectiveness of any reasonable measures that might be taken to protect food. Establishments should not be located anywhere where, after considering such protective measures, it is clear that there will remain a threat to food safety or suitability. In particular, establishments should normally be located away from:			
• environmentally polluted areas and industrial activities which pose a serious threat of contaminating food;			
• areas subject to flooding unless sufficient safeguards are provided;			
• areas prone to infestations of pests;			
• areas where wastes, either solid or liquid, cannot be removed effectively.			
4.1.2 Equipment			
Equipment should be located so that it:			
• permits adequate maintenance and cleaning;			
• functions in accordance with its intended use; and			
• facilitates good hygiene practices, including monitoring.			
4.2 PREMISES AND ROOMS			
4.2.1 Design and layout	Compliant		Comments
	Yes	No	
Where appropriate, the internal design and layout of food establishments should permit good food hygiene practices, including protection against cross-contamination between and during operations by foodstuffs.			
4.2.2 Internal structures and fittings			
Structures within food establishments should be soundly built of durable materials and be easy to maintain, clean and where appropriate, able to be disinfected. In particular the following specific conditions should be satisfied where necessary to protect the safety and suitability of food:			
• the surfaces of walls, partitions and floors should be made of impervious materials with no toxic effect in intended use;			
• walls and partitions should have a smooth surface up to a height appropriate to the operation;			

## ISO 22000 Food Safety Management System Implementation Workbook

### 11. Cleaning And Sanitizing

ISO 22002 Requirements	Compliant		Comments
	Yes	No	
11.1 General requirements			
11.2 Cleaning and sanitizing agents and tools			
11.3 Cleaning and sanitizing programmes			
11.4 Cleaning in place (CIP) systems			
11.5 Monitoring sanitation effectiveness			

### 12. Pest Control

ISO 22002 Requirements	Compliant		Comments
	Yes	No	
12.1 General requirements			
12.2 Pest control programmes			
12.3 Preventing access			
12.4 Harbourage and infestations			

## ISO 22000 Food Safety Management System Implementation Workbook

### Ensure any ISO 22000 areas requiring corrective action are addressed

The non-compliances identified in the assessment of compliance with ISO 22000 should be logged by the Food Safety Team Leader and the appropriate corrective action allocated and taken:

Date	ISO 22000 Clause	Details of Non-Conformance	Identified by:	Corrective Action Required	Responsibility	Target completion Date	Date Completed

Prerequisite Corrective Actions

The non-compliances identified in the assessment of compliance with the prescribed prerequisite programmes should be logged by the Food Safety Team Leader and the appropriate corrective action allocated and taken:

Date	Prerequisite Clause	Details of Non-Conformance	Identified by:	Corrective Action Required	Responsibility	Target completion Date	Date Completed
