

This comprehensive Food Safety Management System package contains all the tools you will need to achieve certification to the FSSC 22000 Certification Scheme Version 5.1.

This workbook is provided to guide you in the implementation of your Food Safety Management System. The workbook is divided into 7 steps that are designed to assist you in implementing your food safety management system effectively:

- ✓ Step One: ISO 22000 Training for Management
- ✓ Step Two: Top Management Implementation
- ✓ Step Three: Documenting the Food Safety Management System
- ✓ Step Four: Project 22000 including HACCP Implementation
- ✓ Step Five: Internal Auditing & Checklists
- ✓ Step Six: Review and Updating
- ✓ Step Seven: Final Steps to FSSC/ISO 22000 Certification

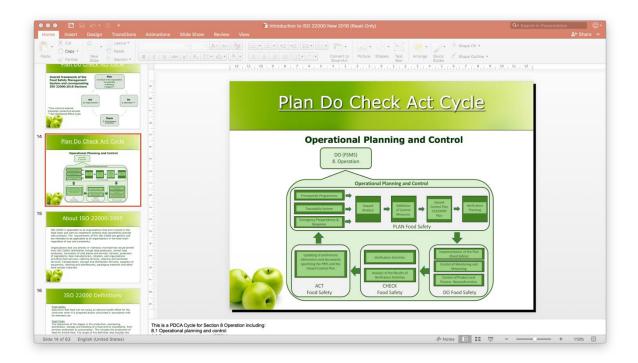

Click here to order the IFSQN FSSC 22000 Certification Package Now

Step One: ISO 22000 Training for Management

Introduction to ISO 22000

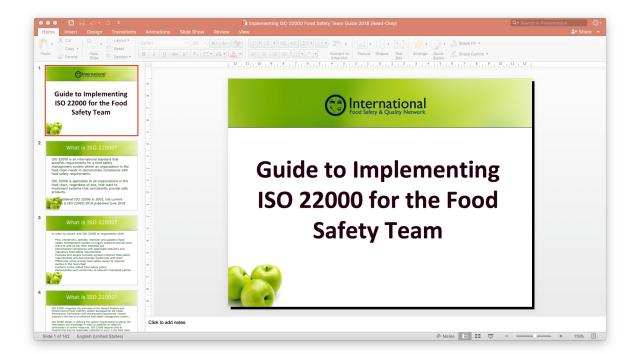

This PowerPoint presentation will introduce the ISO 22000 standard to the management team and explain exactly how to start the process of implementing an ISO 22000 compliant Food Safety Management System.

Food Safety Team: ISO 22000 Implementation Guide

The Food Safety Team: ISO 22000 Implementation Guide PowerPoint presentation supplied with the system explains to the Food Safety Team their role in implementing an ISO 22000:2018 compliant Food Safety Management System.

Top Management FSMS Implementation Meeting

Date/Time

<u>Venue</u>

<u>Agenda</u>

- 1. Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS
- 2. Determine the interested parties (Customer, Regulatory, Statutory and other) that are relevant to the FSMS
- 3. Determine Customer, Regulatory, Statutory and other relevant Food Safety requirements
- 4. Define the scope and boundaries of the FSMS
- 5. Develop a Food Safety Policy
- 6. Based on the Food Safety Policy establish Food Safety Objectives
- 7. Plan the establishment of the FSMS using the project planner
- 8. Provide adequate support to establish the FSMS
- 9. Ensure there is adequate infrastructure and work environment
- 10. Allocate responsibility and authority
- 11. Assess, plan and establish appropriate internal and external communication (including the food chain) channels

Attendees:

	Top Manageme	nt Team
Job Title	Name	Role in Team
Managing Director		Chairman
General Manager		Deputy Chair
Operations Manager		Operations Reporting
Food Service Manager		Food Safety and Quality Reporting Management Representative
Distribution Manager		Distribution Reporting
Maintenance Manager		Services and Engineering Provision
Finance Manager		Financial Reporting
Human Resources Manager		Resource reporting

Top Management: Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS

Top Management need to determine the internal and external issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS. In order to achieve this aim Top Management should out an Organization Analysis considering external and internal issues, including legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization.

This analysis can be carried out using the FSMS 4.1 Organization Risk Analysis Tool included in the package:

0		5 =	🛈 FSMS	6 4.1 Organizat	tion Analysis		Q~ Search Sheet	C
	Home Insert Page Lay						<u>۵</u>	+ Share 🗳

1	A	В	С	D	E	F	G	н
			Orga	nizational Ris	sk Analysis			
2	Area of Issue	Description	Internal External	Positive Negative	International National Regional Local	Risk Level	Proposed Action	Timescale Priority
	Legal	Issues complying with FSMA	Internal	Negative	National	High	Bring in external resource to assist in FSMA compliance	Priority
5	Technological	Technology out of date	Internal	Negative	International	Medium	Renew out of Date Technology	
	Competition	Lack of Competition	External	Positive	Regional	Increased Marketing		
	Market	Only Short Term Customer Contracts	External	Negative	International	High	Seek Longer Term for Customer Contracts	Priority
	Cultural	Product of Religious, ethical or moral significance	External	Negative	Local	Low	Also look to Products not of Religious, ethical or moral significance	
)	Social	Need for Seasonal Workers	Internal	Negative	Local	High	Contract Seasonal Workers	Priority
D	Economic environments	Harvest Failure	External	Negative	National	Medium	Look for Alternative Supplies	
L	Food fraud	Economically motivated adulteration (EMA)	External	Negative	International	Medium	Increased Supplier Assurance & Product Testing	
	Food defence, Cybersecurity & Intentional contamination	Premises located in a politically or socially sensitive area	Internal	Negative	Local	High	Increase Security Short Term. Long Term look to relocate.	Priority
3	Knowledge (Organization)	Lack of Technical Skills	Internal	Negative	Local	Medium	Recruit Technical Skills	
	Performance (Organization)	Unreliable Operations	Internal	Negative	Local	High	Project Implementation Operational Efficiency	Priority
; 4	Organization Analysis	Types of Risk Sheet2 Sheet3 Sheet	t4 Sheet5	+				
	Ready	Types of more should should should should	Sheets	•			······································	100%

The FSMS 4.1 Organization Risk Analysis Tool allows Top Management to summarise the Analysis by Area of Issue; Description of Issue; Whether Internal or External; Whether Positive or Negative; Whether International, National, Regional or Local; Risk Level; Proposed Action; Timescale and Priority.

Top Management FSMS Implementation Checklist

The Top Management FSMS Implementation Meeting should follow the guidelines of the Top Management Implementation Checklist:

	Top Management determine external an and affect its ability to achieve the intend	
	External & Internal Issues	Actions to address risks and opportunities
1		
	Top Management Determine the interest Statutory and Other) that are relevant to	
	Interested Parties (Customer, Regulatory, Statutory and Other)	Details
2		

Top Management Define the Scope of the Food Safety Management System:

The define the scope of the Food Safety Management System all product categories, processes, activities conducted, production sites and any outsourced activities that can affect food safety.

All applicable customer, statutory and regulatory requirement and documents are identified including:

- Food Legislation
- Food Regulations
- National/International Standards
- Customer Codes of Practice

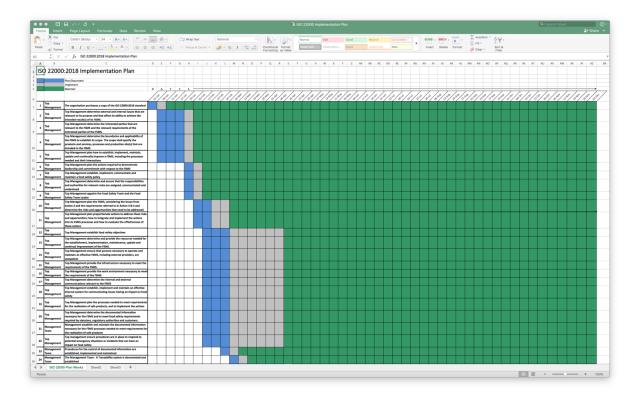

Top Management should establish a system (possibly through the Industry Federation) to ensure that it is kept informed of all relevant legislation, food safety issues, legislative scientific and technical developments and Industry Codes of Practice applicable in the country of production and, where known, the country where the product will be sold. This information should be used for reference and Hazard Analysis.

4.3 Determining the	scope of the food sa	fety management sy	stem									
4.3 Determining the scope of the food safety management system The company has also added at the scope of the food safety management of a food of the management												
The company has planned, established, documented and implemented a food safety management system, which is maintained in order to continually improve its effectiveness in accordance with legislation, international standards and best industry practice.												
Scope												
			ll product categories, p It can affect food safety

Top Management Establish the Project Plan

Using the Excel Project Planner Top Management adapt the template supplied with the system to establish a Project Plan.

		ISO 22000:2018 Implementation Plan									
Step	Responsible Team	Implementation Task									
1	Top Management	The organisation purchases a copy of the ISO 22000:2018 standard									
2	Top Management	Top Management determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS.									
3	Top Management	Top Management determine the interested parties that are relevant to the FSMS and the relevant requirements of the interested parties of the FSMS.									
4	Top Management	Top Management determine the boundaries and applicability of the FSMS to establish its scope. The scope shall specify the products and services, processes and production site(s) that are included in the FSMS.									
Management The products and services, processes and production site(s) that are included in the FSMS. Top Top Management plan how to establish, implement, maintain, update and continually improve a FSMS, includin Management processes needed and their interactions											
6	Top Management	Top Management plan the actions required to demonstrate leadership and commitment with respect to the ESMS									
7	Top Management	Top Management establish, implement, communicate and maintain a food safety policy									
8	Top Management	Top Management determine and ensure that the responsibilities and authorities for relevant roles are assigned, communicated and understood									
9	Top Management	Top Management appoint the Food Safety Team and the Food Safety Team Leader									
10	Top Management	Top Management plan the FSMS, considering the issues from Action 2 and the requirements referred to in Action 3 & 4 and determine the risks and opportunities that need to be addressed									
11	Top Management	Top Management plan proportionate actions to address these risks and opportunities; how to integrate and implement the actions into its FSMS processes and how to evaluate the effectiveness of these actions									
12	Top Management	Top Management establish food safety objectives									
13	Top Management	Top Management determine and provide the resources needed for the establishment, implementation, maintenance, update and continual improvement of the FSMS.									

Top Management Establish a Product Recall/Crisis Management Team

Crisis	Management/Pro	duct Recall Team	
Crisis	Name	Crisis Coordinator	Contact Details
Fire or Site evacuation		Health and Safety Manager	
Utility Supply failure		Maintenance Manager	
IT systems failure		Operations Manager	
Water Supply Contamination		Food Service Manager	
Breaches of security		General Manager	
Distribution Failure		Distribution Manager	
Bomb Threat or similar		General Manager	
Bioterrorism		Managing Director	
Extortion or Sabotage		General Manager	
Product quality or safety		Food Service Manager	

Top Management Establish Food Safety Responsibility & Authority Levels

Process	Responsible Persons	Activity
Purchases	Purchasing Manager	Purchase ingredients from approved and certified sources Ensure purchase orders comply with applicable specifications
	Food Service Manager	Ensure adequate information on supply application form Ensure suppliers adhere to supply handling practices Perform suppliers audit or review supply status where necessary
Receiving and warehousing	Store Executives	Compare Purchase Order and Delivery Note or check contracts as per Suppliers Specifications criteria (if applicable) Check receiving temperature, pest infestations, quality, packing conditions and truck hygiene. Observe unloading practices Handle incoming goods as per documented procedures Ensure Good Storage Practices and FIFO rotation principles
Preparation of Ingredients	Catering Staff	Follow safe food preparation and handling practices Check environmental hygiene and safety Check equipment process performance and maintenance Check water quality and safety Check raw materials identification and traceability
Operations	Catering Staff	Maintain recipes and characteristics Do not modify recipes prior to approval from top management Follow safe food handling practices Ensure Good Practices are adhered to Follow cleaning and sanitation standards and procedures Follow the handling standards of raw and processed foods
Holding and Filling of Processed Food	Catering Staff	Follow safe food holding procedures Hold foods outside the range of danger zone Follow safe food filling procedures into primary packaging
Capping, coding and packing	Catering Staff	Follow safe capping procedures Ensure food in primary packaging are hygienically located Ensure coding for traceability is performed to procedures

Top Management Establish Food Safety Responsibility & Authority Levels

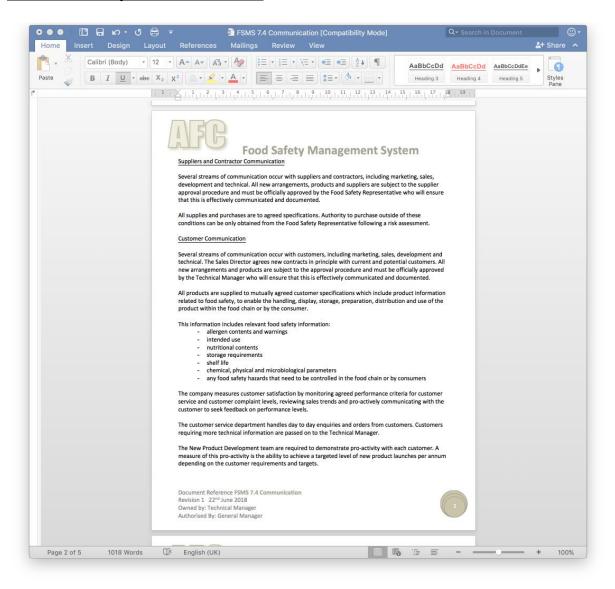

Process	Responsible Persons	Activity

Top Management establish Communication Channels

Top Management must establish and document clear levels of communication for suppliers, contractors, customers, food authorities and staff within the food safety management system. Detailed communication arrangements and food safety communication responsibilities for all levels of management should contained in the food safety and quality manual. The communication procedures should apply to all members of staff, both full time and temporary.

Procedures should be in place to address communication including:

Suppliers and Contractor Communication Customer Communication Food Authority Communication

Step Three: Food Safety Management System

The Food Safety Management System contains a comprehensive ISO 22000 documentation package that you are now ready to implement:

- Food Safety Manual containing a set comprehensive procedures and record templates.
- ✓ HACCP manual containing food safety procedures and our unique HACCP Calculator.
- ✓ Laboratory manual including sample procedures and records.
- ✓ Prerequisite Programmes manual.

At this stage, you can choose to totally implement the procedures supplied or pick those that are applicable to your process.

Food Safety Manual

The Food Safety Management System folder contains comprehensive top level procedures templates that match the clauses of the ISO 22000:2018 standard and form the foundations of your Food Safety Management System so you don't have to spend 1,000's of hours writing compliant procedures:

ISO 22000 HACCP Manual containing the HACCP Calculator

The HACCP System is defined in the following Food Safety Management System documents:

FSMS 8.5.1 Preliminary steps to enable hazard analysis

FSMS 8.5.2 Hazard analysis

FSMS 8.5.3 Validation of control measure(s) and combinations of control measures

FSMS 8.5.4 Hazard control plan (HACCP/OPRP plan)

FSMS 8.6 Updating the information specifying the PRPs and the hazard control plan

FSMS 8.7 Control of monitoring and measuring

FSMS 8.8 Verification related to PRPs and the hazard control plan

There are also supplementary ISO HACCP Manual documents including the HACCP Calculator ISO 22000 2018 & Instructions:

Step Four: Project 22000

This contains the project tools you will need to achieve FSSC 22000 certification. In this part of the package you will find:

- ✓ Steering Group are established and briefed
- The Steering Group take control of the Project Plan established by Top Management
- The documents described previously are implemented as part of the Project Plan

Food Safety Management System Steering Group									
Name	Position	Qualification							

Project Plan

The Steering Group use the Excel Project Plan developed by Top Management as a step by step guide to implementing the Food Safety Management System.

HACCP Training

An illustrated PowerPoint HACCP training presentation is supplied to train your food safety team.

The HACCP documents should be edited and procedures implemented by the Food Safety Team as per the plan.

8.5 Hazard control

FSMS 8.5.1 Preliminary steps to enable hazard analysis

FSMS 8.5.2 Hazard analysis

FSMS 8.5.3 Validation of control measure(s) and combinations of control measures

FSMS 8.5.4 Hazard control plan (HACCP/OPRP plan)

FSMS 8.6 Updating the information specifying the PRPs and the hazard control plan

FSMS 8.8 Verification related to PRPs and the hazard control plan

The Management Team will also be editing implementing procedures:

FSMS 8.1 Operational planning and control

FSMS 8.3 Traceability system

FSMS 8.4 Emergency preparedness and response

FSMS 8.7 Control of monitoring and measuring

FSMS 8.9 Control of product and process nonconformities

FSMS 8.9.5 Withdrawal/recall

8.5 Hazard control

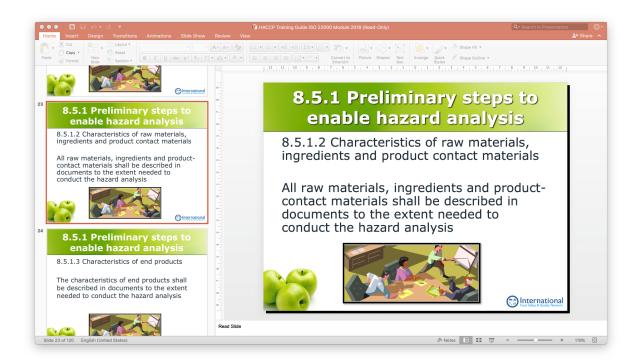

The Food Safety Team should follow, edit and maintain HACCP document FSMS 8.5.1 Preliminary steps to enable hazard analysis

Characteristics of raw materials, including Ingredients and Product Contact Materials, are held in the purchased raw materials file. Specifications include sufficient detail for the identification and
assessment of food safety hazards. For each item the specification includes: Biological, chemical and physical characteristics Composition of formulated ingredients including additives and processing aids Source (e.g. animal, mineral or vegetable) Origin Method of production Delivery method Storage conditions/requirements and shelf life Details of packaging Preparation and/or handling before use or processing Food Safety Acceptance criteria Intended use
All specifications are maintained, updated and approved by the Food Safety Team Leader who identifies legal food safety requirements related to the items purchased. Raw material specifications are reviewed and updated if necessary when there are changes. <u>Characteristics of End Products</u> The food safety team document the end product characteristics, including legal food safety requirements, for the purpose of conducting the Hazard Analysis. The product description includes:
 Product name What will the purchaser will do with <u>it</u> Details of the packaging How the product is processed or manufactured Composition of the product Chemical characteristics relevant for food safety such as pH or Aw Biological characteristics relevant for food safety treatment such as heating, freezing, brining Physical characteristics relevant for food safety Shelf life Prescribed storage temperature Prescribed storage conditions Intended use and reasonably expected handling Packaging Target consumers
Document Reference FSMS 8.5.1 Preliminary steps to enable hazard analysis Revision 1 22 rd June 2018 Owned by: Technical Manager Authorised By: General Manager

This document covers the following:

HACCP (Food Safety) Team HACCP Scope Characteristics of raw materials, ingredients and product contact materials Characteristics of End Products Intended Use Preparation of the flow diagrams The flow chart is confirmed physically on site by the Food Safety team who conduct a walk through verifying all steps in the process flow chart.

The Food Safety Team should follow, edit and maintain HACCP document FSMS 8.5.4 Hazard control plan (HACCP/OPRP Plan)

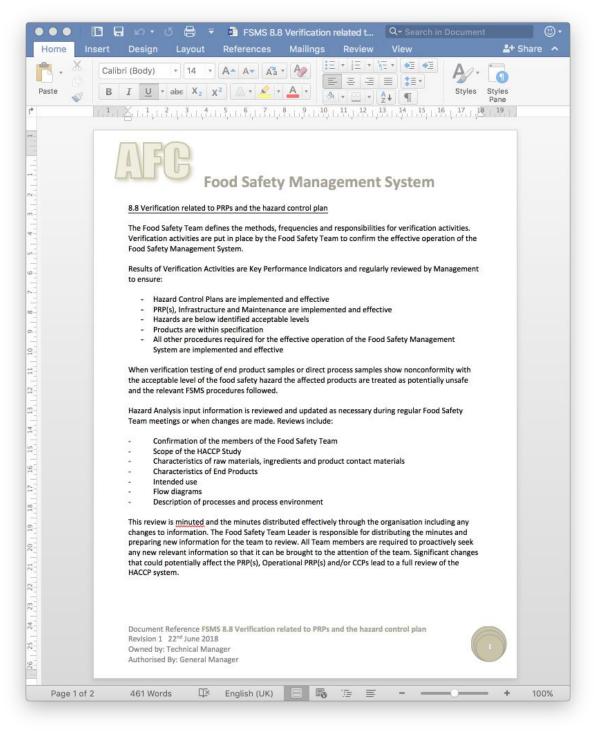

Food Safety Management System
8.5.4 Hazard control plan (HACCP/OPRP Plan)
Hazard control plans are documented by the Food Safety Team and include details of the Significant Hazards to be controlled each CCP or OPRP Operational PRP.
For each control measure at each Critical Control Point (CCP) or Operational Prerequisite Programme (OPRP) the Hazard Control Plans define:
- Food safety hazard(s) to be controlled at the CCP or by the OPRP
 Control measure and/or combination of control measures Critical limit at each CCP
- Action criteria for OPRPs
 Monitoring procedures Correction(s) to be made if critical limits or action criteria are not met
Responsibilities and authorities Records of monitoring
- Records of monitoring
the control measures applied, the monitoring procedures (parameters, frequency and records), corrections and corrective actions to be taken when outside acceptable limits. For each control measure and operational PRP(s) responsibility and authority is defined.
Determination of critical limits and action criteria
For each control measure and/or combination of control measures at each Critical Control Point (CCP) or Operational Prerequisite Programme (OPRP) in the Hazard Control Plans, the Food Safety Team define the hazard to be controlled, Critical Limits for each CCP and Action Criteria for Operational Prerequisite Programme (OPRPs).
The Critical Limits at CCPs are specific and measureable for the Significant Hazard identified and ensure that the acceptable level is not exceeded. Where more than one food safety hazard has been identified at a CCP then Critical Limits are established for both hazards and the most stringent limit applied.
Action criteria for Operational Prerequisite Programmes (OPRPs) are measurable or observable and provide assurance that the acceptable level is not exceeded.
Control Measures and Control Limits are defined, often using guidance from the external approved documents including codes of practice and regulatory requirements. The Food Safety Team justifies and documents how Critical Limit Level for each CCP and Action Criteria for Operational Prerequisite Programme (OPRPs) have been determined.

Step Five: Internal Auditing & Checklists

There are three PowerPoint Internal Auditor training presentations

Internal Audit Checklists

There is a checklist for each section of the ISO 22000 standard plus sample verification records for prerequisite programmes.

ISO 22000:2018	System Requirements Internal Audit
ISO 22000 Food Safety Management	Audit Findings
8 Ope	eration
	anning and control
Does the organization plan, implement, control, maintain and update the p products, and to implement the actions determined in 6.1, by:	processes needed to meet requirements for the realization of safe
establishing criteria for the processes?	
implementing control of the processes in accordance with the criteria?	
 keeping documented information to the extent necessary to have the confidence to demonstrate that the processes have been carried out as planned? 	
Does the organization control planned changes and review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary?	
Does the organization ensure that outsourced processes are controlled (see 7.1.6)?	
	rogrammes (PRPs)
8.2.1 Has the organization established, implemented, maintained and	
updated PRP(s) to facilitate the prevention and/or reduction of contaminants (including food safety hazards) in the products, product processing and work environment.?	
8.2.2 Are the PRP(s):	
appropriate to the organization and its context with regard to food safety?	
appropriate to the size and type of the operation and the nature of the products being manufactured and/or handled?	
implemented across the entire production system, either as programmes applicable in general or as programmes applicable to a

	FSMS 10 Improvement		101	mprovement					1		1		
	raina to improvement		1						-	1			

The Food Safety Team Leader should draw up the Internal Audit Schedule based on the following criteria:

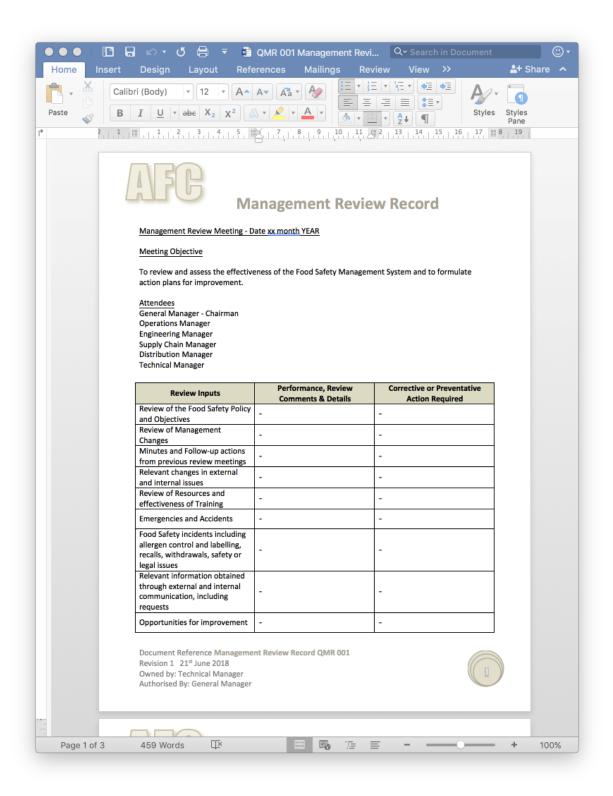

- Importance of the processes concerned
- Changes in the FSMS
- Results of monitoring, measurement
- Risk associated with the procedure or activity
- Results of Previous audits
- Number of Corrective and/or Preventive Actions raised or outstanding
- Customer Complaint Analysis
- Results of the Management Review

FSMS 9.3 Management review

Top management should review the Food Safety Management System, at planned intervals, to ensure its continuing suitability, adequacy and effectiveness.

<u>Top Management Review QMR 001 Management Review Record can</u> <u>be used to record the details of Management Review</u>

Assess the Food Safety Management System

The Steering Group need to allocate responsibility to assess if the established Food Safety Management System meets the requirements of the ISO 22000 standard and TS ISO 22002-2 using the checklists provided.

ISO 22000 Food Safety Management	: System Requirements Internal Audit
ISO 22000 Clause	Audit Findings
4 Context of t	he organization
4.1 Understanding the or	ganization and its context
Has the organization determined external and internal issues that are	
relevant to its purpose and that affect its ability to achieve the	
intended result(s) of its Food Safety Management System?	
Has the organization identified, reviewed and updated information	
related to these external and internal issues (legal, technological,	
competitive, market, cultural, social and economic environments,	
cybersecurity and food fraud, food defence and intentional	
contamination, knowledge and performance of the organization)?	
See notes from the standard.	
4.2 Understanding the needs and	expectations of interested parties
To ensure that the organization has the ability to consistently provide p	products and services that meet applicable statutory, regulatory and
customer requirements with regard to food safety, has the organization	n determined:
- the interested parties that are relevant to the Food Safety	
Management System?	
- the relevant requirements of the interested parties of the Food	
Safety Management System?	
Does the organization identify, review and update information	
related to the interested parties and their requirements?	
4.3 Determining the scope of the	e food safety management system
Has the organization determined the boundaries and applicability of	

Review ISO 22002 prerequisite programs (PRPs) to control food safety hazards

The Steering Group now need to allocate responsibility to determine how far established prerequisite programmes meet the requirements of ISO 22002-2. Using the checklist below and a copy of Technical Specification ISO 22002-2 the delegated person should read the requirements in the relevant section of ISO 22002 and complete the form.

ISO 22002 CONFORMANCE ANALYSIS									
4 Generic prerequisite programmes									
4.1 Layout of premises									
ISO 22002 Poquiromento	Com	pliant	Comments						
ISO 22002 Requirements	Yes	No	Comments						
4.1.1 Infrastructure									
4.1.2 Workspace									
4.1.2.1 General									
4.1.2.2 Food-handling areas									
4.1.3 Lighting and ventilation									

5 Specific prerequisite programmes									
ISO 22002 Requirements	Com	pliant	Comments						
ISO 22002 Requirements	Yes	No	Comments						
5.3 Cooking									
5.4 Portioning									
5.5 Cooling and storage									
5.6 Freezing, storage and thawing									
5.7 Transport									
5.8 Food reheating									
5.9 Food service									
5.10 Identification and hygiene control system									

Review compliance with FSSC 22000 Certification Scheme Additional Requirements

For FSSC 22000 Certification then the Steering Group now need to allocate responsibility to determine how far established procedures meet the Additional Requirements of the FSSC 22000 Certification Scheme and complete the form.

FSSC 22000 Certification Scheme Additional Requirements Version 5.1									
	Com	pliant							
FSSC 22000 Certification Scheme Additional Requirements	Yes	No	Comments						
2.5.1 Management of Services and Purchased Materials – in addition to 7.1.6 Control of externally provided processes, products or services									
Is any analysis critical to the verification and/or validation of food safety conducted by a competent laboratory (including <u>both internal</u> and external laboratories as applicable) that has the capability to produce precise and repeatable test results using validated test methods and best practices. (e.g. successful participation in proficiency testing programs, regulatory approved programs or accreditation to international standards such as ISO 17025)? Is there a documented procedure for procurement in emergency situations to ensure that products still conform to specified requirements and the supplier has been evaluated?									
Is there a policy for the procurement of animals, fish and seafood that are subject to control of prohibited substances?									
Is there a review process for product specifications to ensure continued compliance with food safety, legal and customer requirements?									

Ensure any FSSC 22000 areas requiring corrective action are addressed

The non-compliances identified in the assessment of compliance with FSSC 22000 requirements should be logged by the Food Safety Team Leader and the appropriate corrective action allocated and taken:

Date	Clause	Details of Non- Conformance	Identified by:	Corrective Action Required	Responsibility	Target completion Date	Date Completed

Choose your Certification Body

Before you can begin preparing for your application, you'll need to decide which Certification Body to use. Do some research and pick one which has a good reputation, after all you will have their logo on your certificate!

Make contact with the Certification Body

Contact the Certification Body and tell them what you need. They should provide you with a proposal detailing the cost and time involved in a formal assessment.

Pre-assessment

Arrange a pre-assessment of your food safety management system with the Certification Body.

Formal Assessment

Arrange your formal assessment which will be conducted on site.

Certification

Once the assessment has been successfully completed the Certification Body will issue a certificate of registration for your food safety management system.

The certificate is normally valid for three years, subject to satisfactory surveillance visits during this period.

<u>Contact us if you require assistance in any of these stages, support is</u> <u>included free of charge with our implementation packages</u>
