

This is an ideal package for Food Manufacturers looking to achieve certification to Version 6 of the FSSC 22000 Certification Scheme.

The package is based on the requirements of the ISO 22000:2018 Food safety management systems - Requirements for any organization in the food chain, Technical Specification TS ISO 22002 part 1 Prerequisite Programmes for Food Manufacturers and FSSC 22000 Certification Scheme Additional Requirements Version 6.

This really is our most complete documentation, project implementation and training support system an all in one easy to use package.

[Click here to order the IFSQN FSSC 22000 Version 6 Implementation Package Now](#)

The IFSQN FSSC 22000 Version 6 Implementation Package includes:

Food Safety Management System Procedures

A comprehensive set of editable Food Safety Management System Procedures written in Microsoft Word format that are compliant with International Standard ISO 22000:2018 Food safety management systems - Requirements for any organization in the food chain and FSSC 22000 Certification Scheme Additional Requirements Version 6

Prerequisite Programme Template Procedures

A comprehensive set of editable Prerequisite Programme Template Procedures written in Microsoft Word format that are compliant with Technical Specification TS ISO 22002 part 1 Prerequisite Programmes for Food Manufacturers and FSSC 22000 Certification Scheme Additional Requirements Version 6

Operational Prerequisite Programmes Manual

A set of editable Operational Prerequisite Programme Procedures and corresponding Validation & Verification Records

Food Safety Record Templates

A wide range of editable FSMS, Validation and Verification Record Templates written in Microsoft Word format

Training

An extensive set of IFSQN PowerPoint Training Presentations including:

- ✓ Introduction to ISO 22000:2018
- ✓ ISO 22000:2018 Documentation Requirements
- ✓ CODEX and Good Manufacturing Practices
- ✓ Prerequisite Programmes
- ✓ Implementing ISO 22000:2018 Food Safety Team Guide
- ✓ HACCP Training Guide ISO 22000:2018 Version
- ✓ FSSC 22000 Additional Requirements Version 6
- ✓ Internal Auditor Training Guide
- ✓ Example Internal Audit Training Guide
- ✓ GMP Auditor Training Guide

Implementation Assistance

A range of tools that assist in developing your Food Safety Management System including a Start-Up Guide, Implementation Workbook, Instructions, Guidance and Technical Support

Food Safety Management System

The Food Safety Management System contains a comprehensive ISO 22000, 22002-1 and FSSC 22000 Additional Requirements Version 6 documentation package that is ready to implement.

The package contains comprehensive top level procedure templates that match the clauses of the ISO 22000:2018 standard and form the foundations of your Food Safety Management System so you don't have to spend 1,000's of hours writing compliant procedures.

Below is a table that shows how the documents match the requirements of the ISO 22000 standard with the Food Safety Management System provided to assist you in implementing the system and understanding the requirements of the standard.

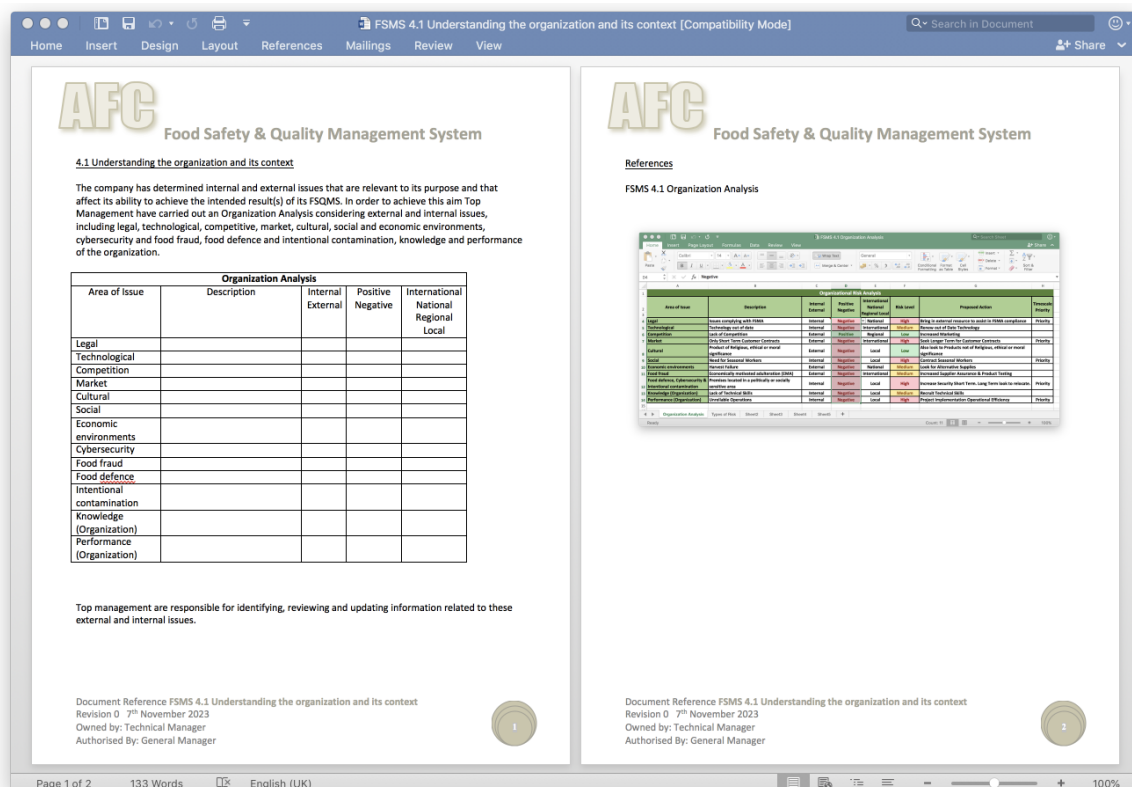

FSSC 22000 Food Safety & Quality & Management System	
4 Context of the organization	
FSMS 4.1 Understanding the organization and its context	
FSMS 4.2 Understanding the needs and expectations of interested parties

	10.3 Update of the Food Safety & Quality Management System

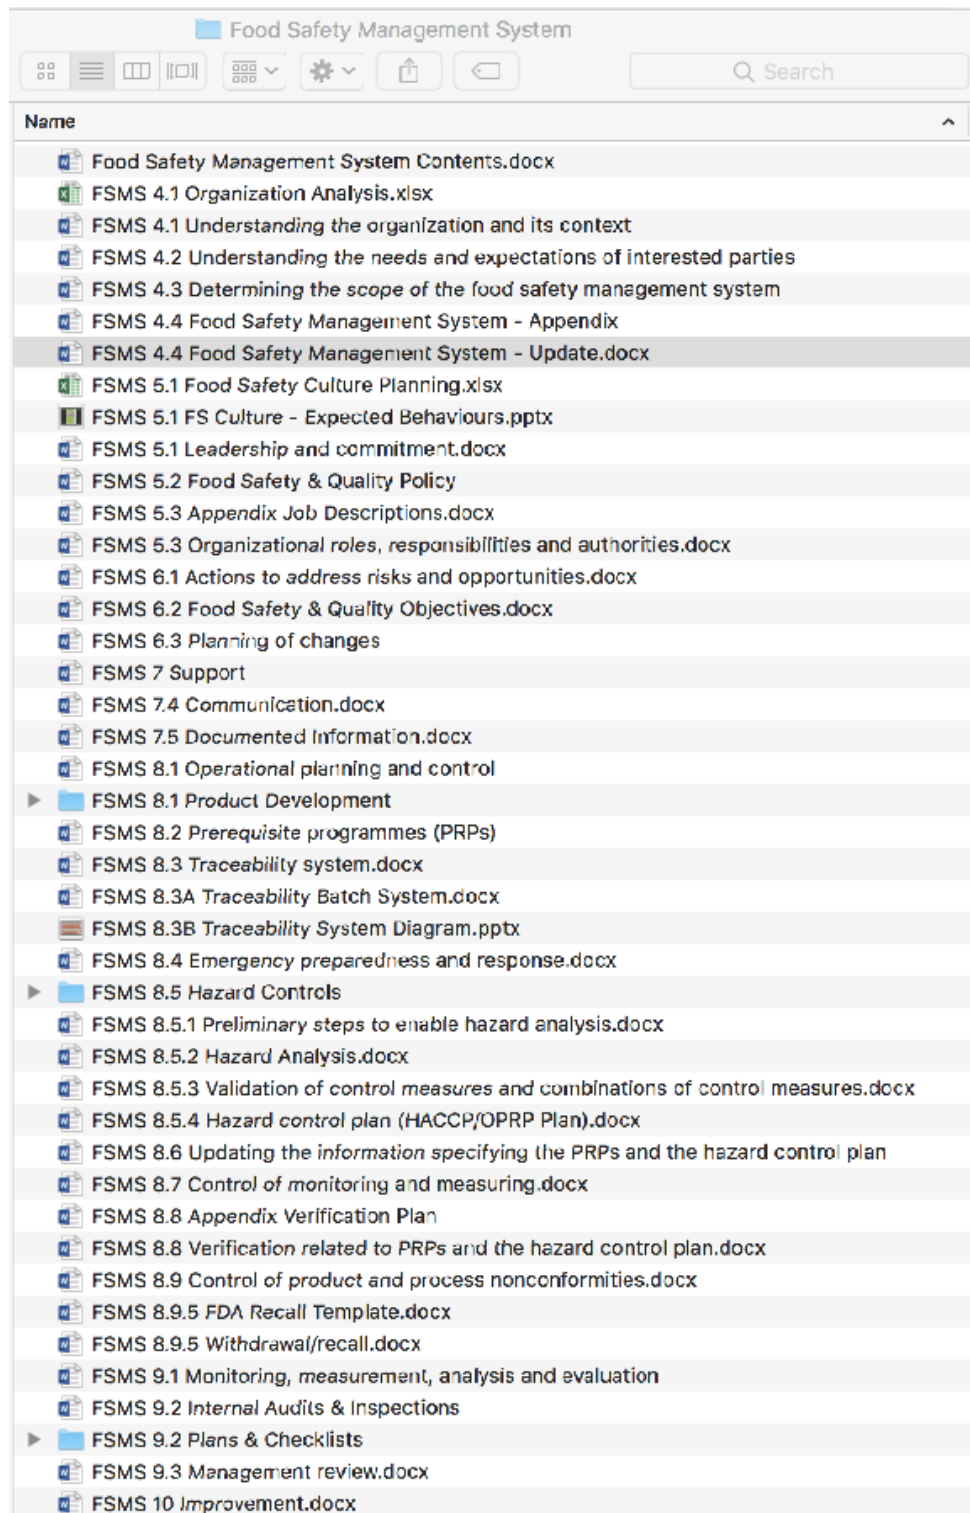

ISO 22000 Food Safety Management System Templates

These Food Safety Management System Templates match the match the clauses of the ISO 22000:2018 standard saving you 1,000's of hours writing compliant Food Safety Management System procedures.

The documents are provided in Microsoft Word English format and are easily edited to suit your organisation

FSSC 22000 Food Safety Management System Templates Folder

Food Safety Management System Documents

The Food Safety Management System (FSMS) documents match the clauses of the ISO 22000:2018 standard for ease of implementation.

4 Context of the organization

FSMS 4.1 Understanding the organization and its context

FSMS 4.2 Understanding the needs and expectations of interested parties

FSMS 4.3 Determining the scope of the food safety management system

FSMS 4.4 Food safety and quality management system

AFC Food Safety & Quality Management System

4.1 Understanding the organization and its context

The company has determined internal and external issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSQMS. In order to achieve this aim Top Management have carried out an Organization Analysis considering external and internal issues, including legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization.

Organization Analysis				
Area of Issue	Description	Internal External	Positive Negative	International National Regional Local
Legal				
Technological				
Competition				
Market				
Cultural				
Social				
Economic environments				
Cybersecurity				
Food fraud				
Food defence				
Intentional contamination				
Knowledge (Organization)				
Performance (Organization)				

Top management are responsible for identifying, reviewing and updating information related to these external and internal issues.

Food Safety & Quality Management System

4.3 Determining the scope of the food safety & quality management system

The company has planned, established, documented and implemented a food safety & quality management system, which is maintained in order to continually improve its effectiveness in accordance with legislation, international standards and best industry practice.

Scope

The scope of the Food Safety & Quality Management System includes all product categories, processes, activities conducted, production sites and any outsourced activities that can affect food safety or quality.

The scope has been defined considering the Top Management Organization Analysis of external and internal issues, including legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization.

Top management has determined relevant interested parties and the food safety requirements of those interested parties and these have been considered in defining the scope of the Food Safety & Quality Management System.

These requirements are aligned with the policies and objectives of the company and include those of the following standards:

Food Safety - ISO 22000
Food Safety – TS/ISO 22002-1

Scope of the Food Safety & Quality Management System				
Product Categories	Processes	Activities	Production Sites	Outsourced Activities

Food Safety & Quality Management System

4.4 Food Safety & Quality Management System

The company has planned, established, documented and implemented a Food Safety & Quality Management System, which is maintained and updated in order to continually improve its effectiveness in accordance with legislation, international standards and best industry practice. The company has planned and developed the processes needed and their interactions that contribute to meeting the defined requirements of the Food Safety & Quality Management System and producing safe, quality products.

Scope

The scope of the Food Safety & Quality Management System includes all product categories, processes, activities conducted, production sites and any outsourced activities that can affect food safety or quality.

Due diligence

The Food Safety & Quality Manual demonstrates due diligence of the company in the effective development and implementation of the Food Safety & Quality Management System. These documents are fully supported by the completion of the records specified in this manual for the monitoring of planned activities, maintenance and verification of control measures and by taking effective actions when non-conformity is encountered.

Food Safety & Quality

The company is committed to supplying safe, quality products for consumption. As part of this commitment, all products and processes used in the manufacture of food products are subject to hazard analysis based on the Codex Alimentarius guidelines for the application of a HACCP system and ISO 22000 requirements. All food safety hazards, that may reasonably be expected to occur, are identified by this process and are then fully evaluated and controlled so that our products do not represent a direct or indirect risk to the consumer. New information regarding food safety hazards is continually reviewed by the Food Safety Team to ensure that the Food Safety Management System is continually updated and complies with the latest food safety requirements.

Should the company be required to outsource any process that may affect product conformity to the defined standards of the Food Safety & Quality Management System then the site will assume control over this process. This is fully defined in all Site Contract Agreements.

Food Safety & Quality Management System

Communication

The company has established and documented clear levels of communication for suppliers, contractors, customers, food authorities and staff within the Food Safety & Quality Management System.

Detailed communication arrangements and food safety/quality communication responsibilities for all levels of management are contained in the Food Safety & Quality Manual. The scope of the communication procedures applies to all members of staff, both full-time and temporary.

The Management Representative for Food Safety & Quality and the Food Safety & Quality Team Leader is the Technical Manager, who retains responsibility and authority for external communication and liaison regarding the Food Safety & Quality Management System. This responsibility for communication extends to ensuring there is sufficient information relating to food safety throughout the food chain. This communication includes documented agreements, contracts, specifications, product information, food safety leaflets, allergen advice and reports.

The Food Safety & Quality Management System processes and their interaction are documented within this manual and its procedures.

The image displays three sequential pages from the FMS 4.4 Food Safety & Quality Management System manual. Each page features a large 'AFC' logo in the top left corner and a navigation bar at the top with icons for Home, Insert, Design, Layout, References, Mailings, Review, and View. The rightmost page also includes a 'Share' button.

Page 1: Hazard Control Module/Folder
 This page contains a table with two columns. The left column lists various FMS modules and their purposes, such as 'FMS 8.5.1 Preliminary steps to enable hazard analysis' and 'FMS 8.5.4 Hazard control plan (HACCP/OPRP plan)'. The right column provides a detailed description for each module, including hazard identification, control measures, and verification activities.

Page 2: HACCP System
 This page defines the HACCP system and lists the documents it references. It includes a list of documents such as 'FMS 8.5.1 Preliminary steps to enable hazard analysis', 'FMS 8.5.2 Hazard analysis', 'FMS 8.5.3 Validation of control measure(s) and combinations of control measures', and 'FMS 8.5.4 Hazard control plan (HACCP/OPRP plan)'. It also mentions 'FMS 8.6 Updating the information specifying the PRPs and the hazard control plan' and 'FMS 8.7 Control of monitoring and measuring'.

Page 3: HACCP Manual
 This page states that the Food Safety & Quality Management System Procedures are supplemented by a HACCP Manual, including supplementary ISO HACCP Manual documents. It features a screenshot of the HACCP Manual interface, showing a list of documents like 'HACCP Calculator ISO 22000:2018', 'HACCP Calculator ISO 22000:2018 nonconformity pdf', and 'HACCP Drawing Order Review Template.docx'.

AFC Food Safety & Quality Management System

Action is taken in response to results in order to correct and prevent deficiencies and to improve the probability of achieving company objectives.

Regular management reviews are conducted by the Top Management team to ensure performance is monitored and analysed. Review outputs include the objectives which are published and communicated to all staff to ensure focus is maintained both on meeting these objectives and on continuous improvement.

Top Management Responsibility

Top Management is responsible for implementing, maintaining, reviewing and improving the Food Safety & Quality Management System.

Top management are responsible for ensuring that the planning of the food safety & quality management system is carried out to meet the requirements of the ISO 22000 standard, that the company objectives support product food safety & quality, and that the integrity of the food safety & quality management system is maintained when changes to the food safety & quality management system are planned and implemented.

Food Safety & Quality Management System

6.3 Planning of changes

Top Management determines the need for changes to the Food Safety & Quality Management system and plans those changes. When changes are made, Top Management consider:

- the purpose of the changes and their potential consequences
- the availability of resources to effectively implement the changes
- the allocation or re-allocation of responsibilities and authorities

Top Management are responsible for ensuring that the changes are carried out in a planned manner and effectively communicated.

Changes are subject to Process Change Approval and a Process Change Approval Form is completed:

ISO 22002-1 Prerequisite Programme Template Procedures

The package contains editable Prerequisite Programme Template Procedures in Microsoft Word format that match the requirements of the Technical Specification TS ISO 22002 part 1 - Prerequisite Programmes for Food Manufacturers and applicable FSSC 22000 Certification Scheme Additional Requirements Version 6 saving you 1,000's of hours writing your own compliant procedures.

The documents are provided in Microsoft Word English format and are easily edited to suit your organisation

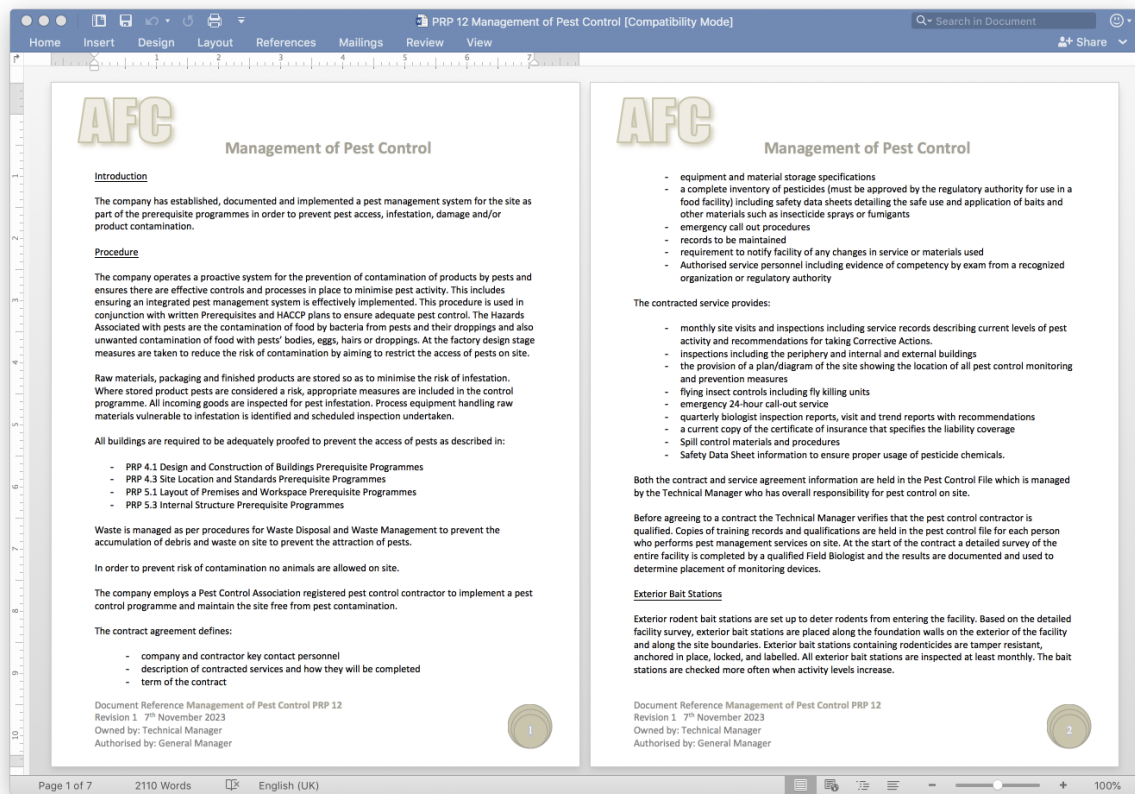

There are also supporting supplementary modules for the prerequisite programmes:

Allergen Management
Product Development
Supplier Risk Assessment

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

Allergen Management Module containing additional Documents/Tools

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

Allergen Management Module & Risk Assessment Tool

The Allergen Module concentrates on five themes:

- ✓ Significance - the significance of any process, activity or ingredient should be evaluated by accurate risk assessments to determine the control or action required
- ✓ Suppliers - understanding the materials that arrive on site is vital to allergen management
- ✓ Separation - the segregation of allergens is a key allergen management control
- ✓ Scheduling - planning activities to reduce the risk of cross contamination
- ✓ Sanitation - cleaning controls to remove or reduce the risks of cross contamination

There is comprehensive allergen management documentation and the Allergen Management Tool which assists PRP 10.3 Allergen Control:

The screenshot shows the 'Allergen Management Tool' spreadsheet. The interface includes a ribbon with tabs: Home, Insert, Page Layout, Formulas, Data, Review, and View. A search bar is located in the top right corner. The main data area is a large table with columns for Product, Number, Reference Number, Ingredient, Allergen Content Details, Ingredient Format, and a grid of allergen presence indicators (Yes, No, Maybe). The table is currently displaying data for 'Fish Pie' and 'Parsley Sauce'. The bottom of the spreadsheet shows a status bar with 'Ready' and a zoom level of 100%.

The screenshot shows the 'Allergen Warning Label Colour Coding Summary' document. It displays two columns of allergen labels with corresponding color-coded backgrounds. The left column lists: Peanuts (red), Nuts (blue), Cereals (purple), Milk (yellow), Eggs (green), Fish (brown), and Shellfish (grey). The right column lists: Soya (black), Sesame seeds (dark brown), Celery/Celeriac (light green), Mustard (orange), Lupin (yellow), and Sulphur dioxide & sulphites (dark green). The document is titled 'Allergen Warning Label Colour Coding Summary [Compatibility...]' and includes a search bar. The bottom status bar indicates 'Page 1 of 2', '17 Words', 'English (UK)', and a zoom level of 75%.

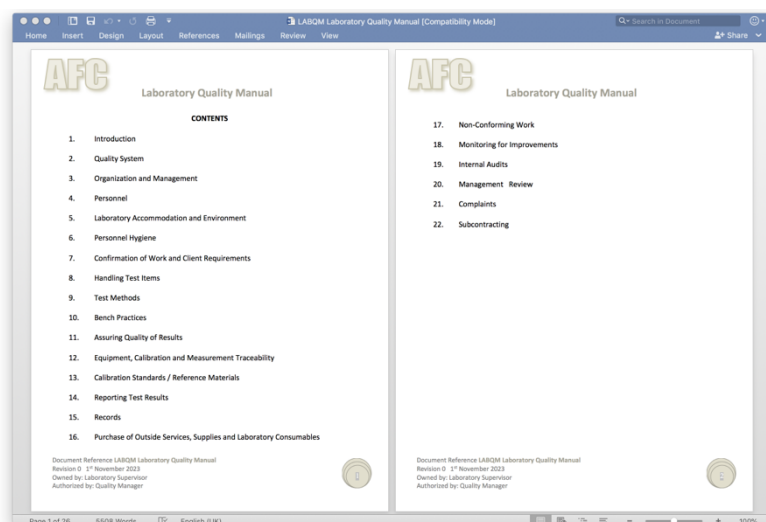

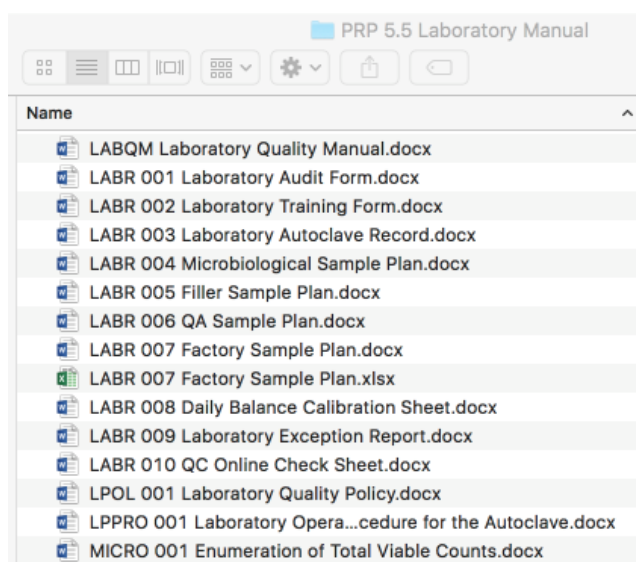

Supplier Risk Assessment Module

Laboratory Quality Manual

FSSC 22000 Certification Scheme Additional Requirements Version 6 2.5.1 Management of Services and Purchased Materials includes the requirement ensure that where laboratory analysis services are used for the verification and/or validation of food safety are conducted by a competent laboratory (including **both internal** and external laboratories as applicable) using validated test methods and best practices. An example given is certification to international standard ISO 17025 General Requirements for the Competence of Testing and Calibration Laboratories.

A comprehensive Laboratory Quality Manual based on the requirements of ISO 17025 is provided in Microsoft Word format. The laboratory quality manual includes supplementary template records, procedures and product sampling plans.

Compliance with FSSC 22000 Additional Requirements Version 6

Summary tables are provided to show how the documents provided cover the FSSC 22000 Additional Requirements Version 6.

FSSC 22000 Additional Requirements	IFSQN FSSC 22000 FSQMS Documents
2.5.1 MANAGEMENT OF SERVICES AND PURCHASED MATERIALS (ALL FOOD CHAIN CATEGORIES)	
a) Laboratory Analysis Services - using validated test methods and best practices	LABQM Laboratory Quality Manual PRP 5.5 Laboratory Manual
b) Documented procedure for procurement in emergency situations	PRP 9.1 Purchasing Prerequisite Programmes PRP 9.2 Supplier Approval and Monitoring PRP 9.3 Control of Incoming Materials FSMS 7 Support
c) Policy for the procurement of animals, fish and seafood that are subject to control of prohibited substances (e.g., pharmaceuticals, veterinary medicines, heavy metals, and pesticides)	PRP 9.1 Purchasing Prerequisite Programmes PRP 9.2 Supplier Approval and Monitoring PRP 9.3 Control of Incoming Materials
d) Review process for raw material and finished product specifications to ensure continued compliance with food safety, quality, legal and customer requirements.	PRP 9.1 Purchasing Prerequisite Programmes PRP 9.2 Supplier Approval and Monitoring PRP 9.3 Control of Incoming Materials PRP 9.3A Incoming Material Specification Requirements FSMS 8.1 Operational planning and control
e) Packaging manufacturers need to establish criteria related to the use of recycled packaging as a raw material and ensure that relevant legal and customer requirements are being met.	
2.5.2 PRODUCT LABELING AND PRINTED MATERIALS (ALL FOOD CHAIN CATEGORIES)	
a) Finished products are labelled according to all applicable statutory and regulatory requirements in the country of intended sale, including allergen and customer specific requirements.	
b) Where a product is unlabelled, all relevant product information shall be made available to ensure the safe use of the food by the customer or consumer.	FSMS 8.5.1 Preliminary steps to enable hazard analysis PRP 17.1 Product Information Prerequisites PRP 17.2 Product Labelling Controls
c) Where a claim (e.g. allergen, nutritional, method of production, chain of custody, raw material status, etc.) is made on the product label or packaging, the organization shall maintain evidence of validation to support the claim and shall have verification systems in place	FSMS 8.3 Traceability system
d) For food chain category I, Packaging Materials artwork management and print control procedures shall be established and implemented	
Risk-based change management process for new equipment and/or any changes to existing equipment, which shall be adequately documented including evidence of successful commissioning.	FSR Equipment Commissioning Checklist FSR Process Change Approval PRP 5.4 Equipment Design and Location
2.5.16 FOOD LOSS AND WASTE (ALL FOOD CHAIN CATEGORIES, EXCLUDING I)	
In addition to clause 8 of ISO 22000:2018, the organization shall:	
a) Have a documented policy and objectives detailing the organization's strategy to reduce food loss and waste within their organization and the related supply chain.	
b) Have controls in place to manage products donated to not-for-profit organizations, employees, and other organizations; and ensure that these products are safe to consume.	PRP 7 Waste Management Overview including FLW PRP 7.1 Waste Management PRPs PRP 7.5 Management of Surplus Food and Products for Animal Feed
c) Manage surplus products or by-products intended as animal feed/food to prevent contamination of these products.	PRP 7 Food Loss and Waste Analysis
d) These processes shall comply with the applicable legislation, be kept up to date, and not have a negative impact on food safety.	
2.5.17 COMMUNICATION REQUIREMENTS (ALL FOOD CHAIN CATEGORIES)	
In addition to clause 8.4.2 of ISO 22000:2018, the organization shall inform the certification body within 3 working days of the commencement of the events or situations below and implement suitable measures as part of their emergency preparedness and response process:	
a) Serious events that impact the FSMS, legality and/or the integrity of the certification including situations that pose a threat to food safety, or certification integrity as a result of a Force majeure, natural or man-made disasters (e.g., war, strike, terrorism, crime, flood, earthquake, malicious computer hacking, etc.);	
b) Serious situations where the integrity of the certification is at risk and/or where the Foundation can be brought into disrepute. These include, but are not limited to: Public food safety events (e.g., public recalls, withdrawals, calamities, food safety outbreaks, etc.) Actions imposed by regulatory authorities as a result of a food safety issue(s) where additional monitoring or forced shutdown of production is required. Legal proceedings, prosecutions, malpractice, and negligence Fraudulent activities and corruption.	FSMS 7.4 Communication FSMS 8.4 Emergency preparedness and response FSMS 8.9.5 Withdrawal/recall
2.5.18 REQUIREMENTS FOR ORGANIZATION WITH MULTI-SITE CERTIFICATION (FOOD CHAIN CATEGORIES E, F & G)

FSMS Record Templates

A wide range of editable FSMS, Validation and Verification Record Templates written in Microsoft Word format:

Prerequisite Programme Verification Record Templates

Corresponding Prerequisite Programme Verification Record Templates are included for all PRPs:

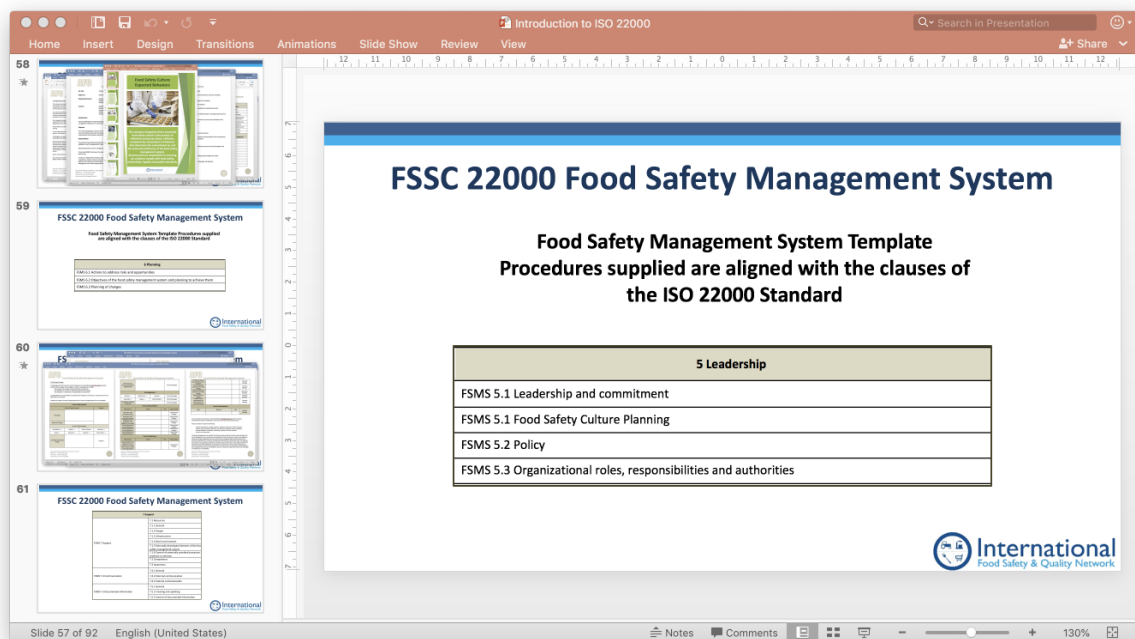

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

Training

An extensive set of PowerPoint Training Presentations are provided:

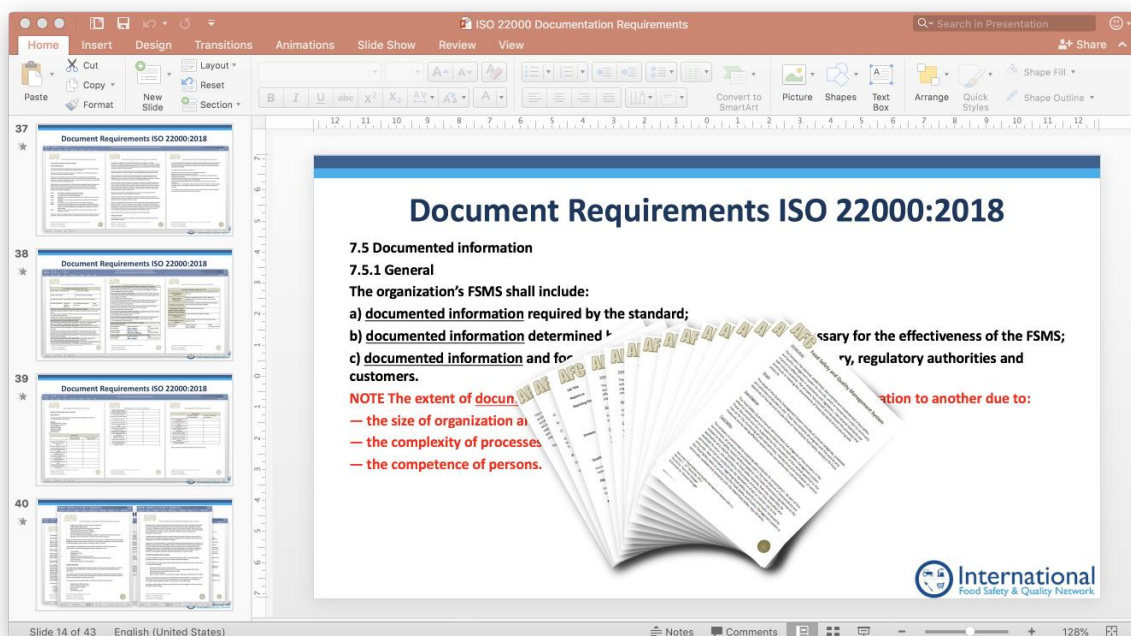

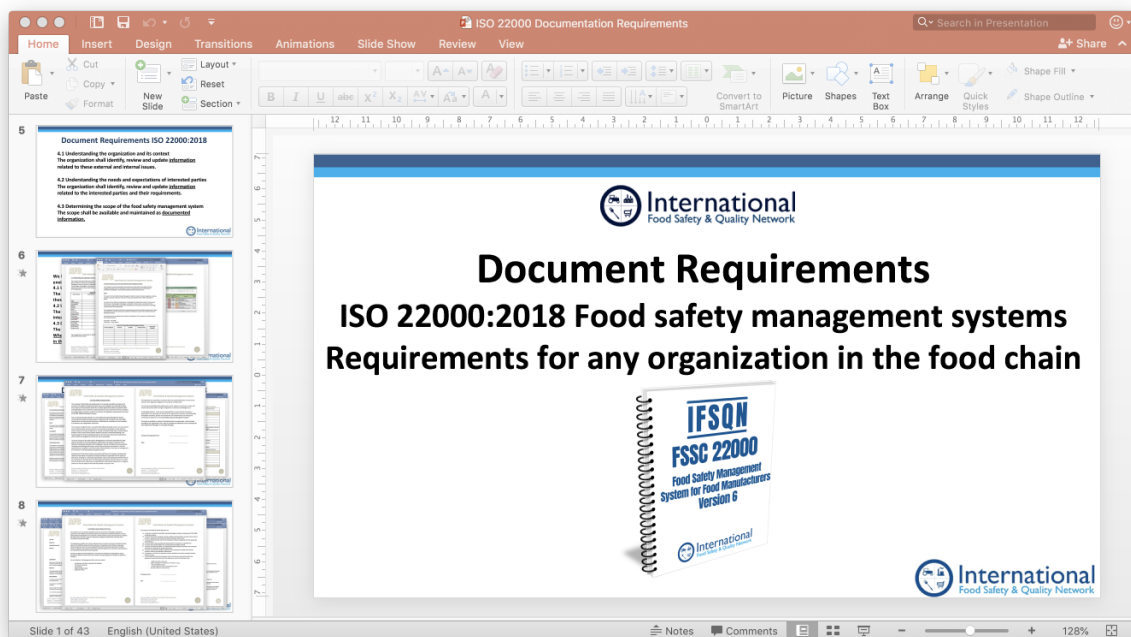

Introduction to ISO 22000:2018

This PowerPoint presentation will introduce the ISO 22000 standard to the management team and explain exactly how to start the process of implementing an ISO 22000 compliant Food Safety Management System.

ISO 22000:2018 Documentation Requirements

The ISO 22000 Document Requirement Guide PowerPoint presentation supplied explains to the Management Team the documentation required in an ISO 22000 compliant Food Safety Management System and how matching Food Safety Management System documents are provided in the package.

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

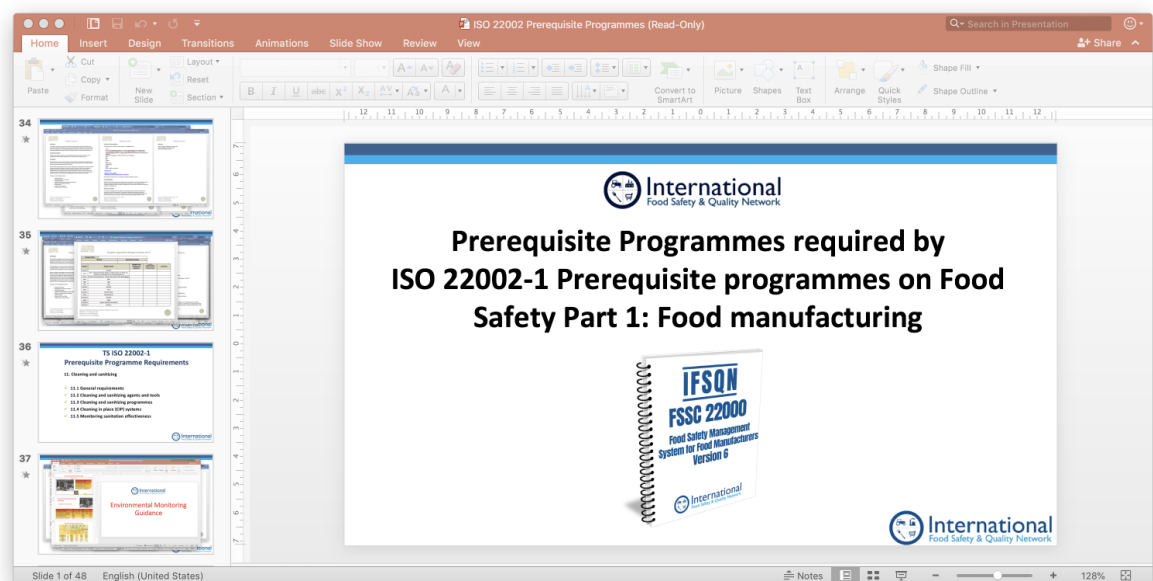

Good Hygienic Practices/Prerequisite Programmes Training

The Prerequisite Programme documents should be edited and procedures implemented as per the plan and relevant training given. It is advisable that all involved particularly the Food Safety/HACCP Team view the following training presentations first:

Updated in consideration of CODEX Recommended International Code of Practice General Principles of Food Hygiene 2022 Edition

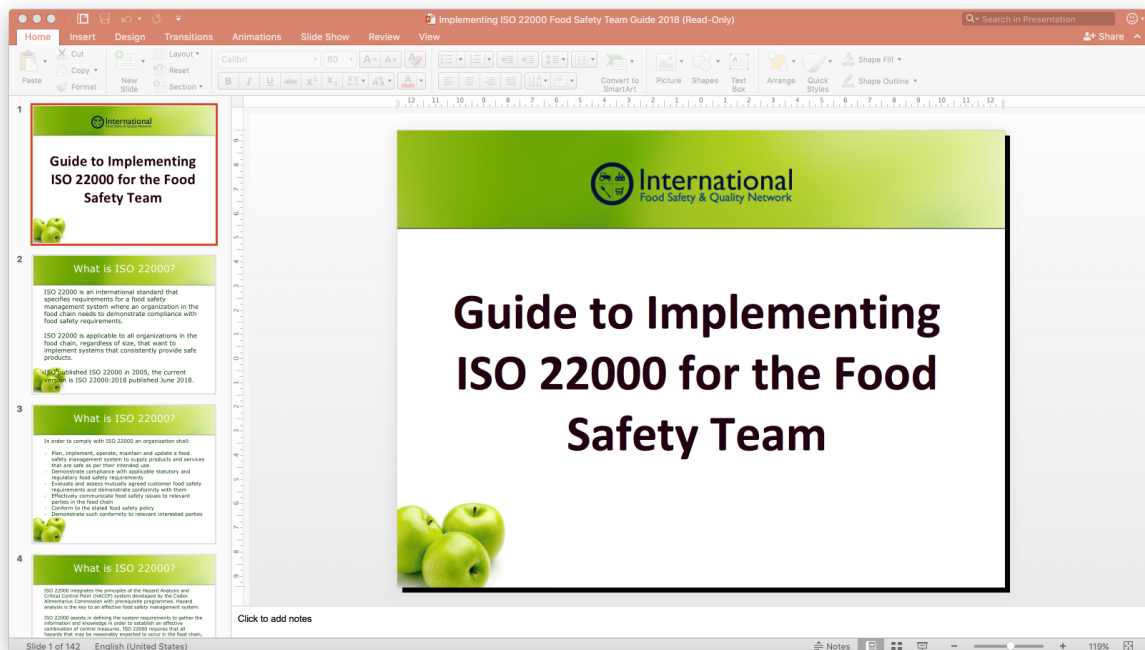

Prerequisite Programmes (As per ISO 22002-1) Training

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

Implementing ISO 22000:2018 Food Safety Team Guide

The Food Safety Team: ISO 22000 Implementation Guide PowerPoint presentation supplied with the system explains to the Food Safety Team their role in implementing an ISO 22000:2018 compliant Food Safety Management System.

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

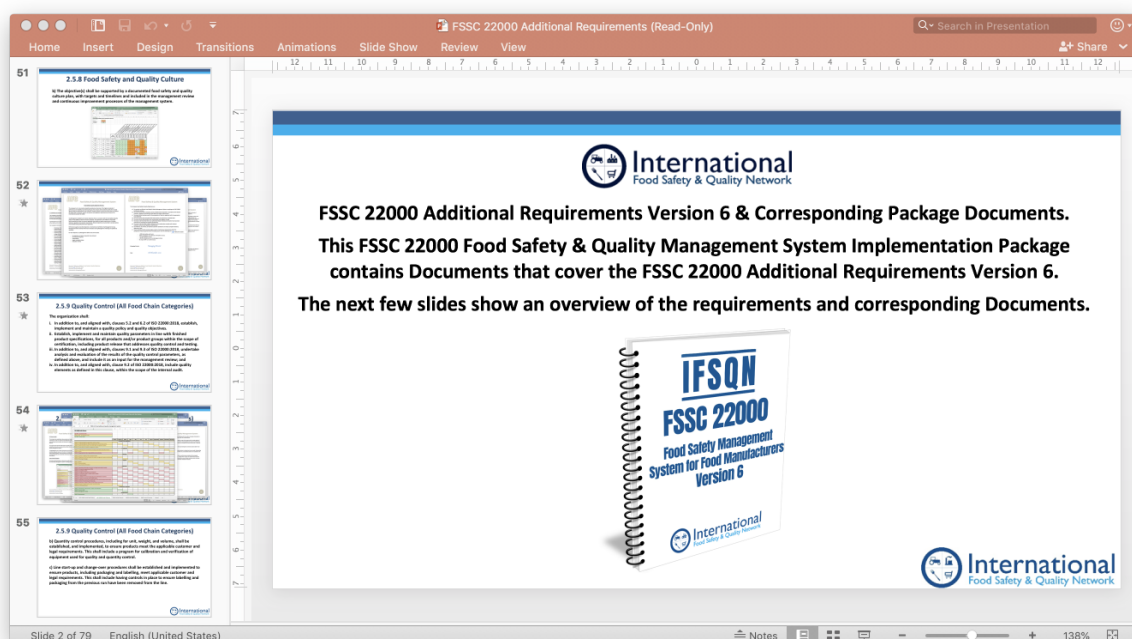

HACCP Training Guide ISO 22000:2018 Version

An illustrated PowerPoint HACCP training presentation is supplied to train your food safety team.

FSSC 22000 Additional Requirements Version 6

A PowerPoint explanation of the FSSC 22000 Additional Requirements Version 6 requirements for certification and how the documents supplied comply with these additional requirements.

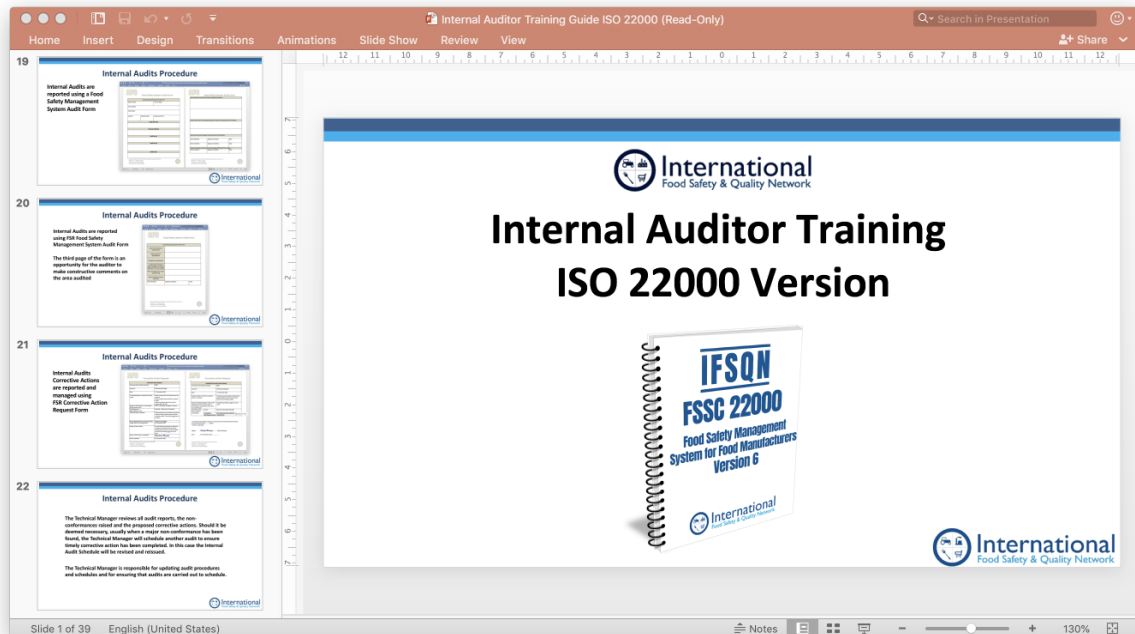

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

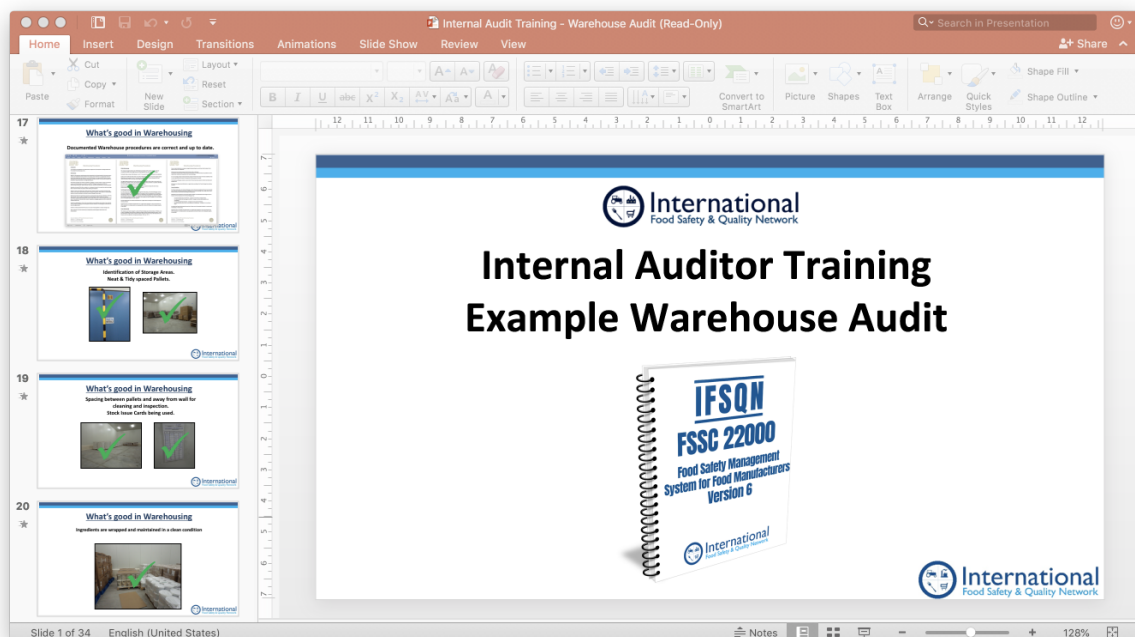

There are three PowerPoint Internal Auditor training presentations

Internal Auditor Training Guide

A PowerPoint Internal Auditor training presentation is included and can be used to train your Internal Auditors

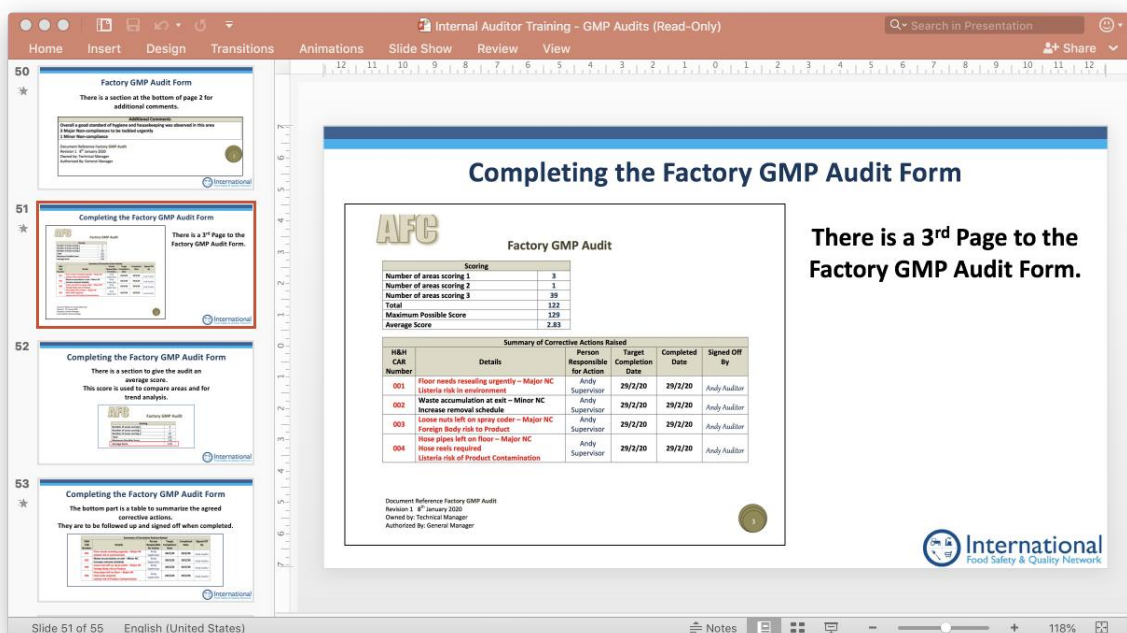

Example Internal Audit Training Guide

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

GMP Auditor Training Guide

FSSC 22000 Certification Scheme Additional Requirements Version 6 include 2.5.12 PRP Verification and the requirement to establish, implement, and maintain routine site inspections/PRP checks. This PowerPoint training presentation of a GMP Audit/Facility Inspection System is included.

Implementation Assistance

A range of tools that assist in developing your Food Safety Management System including a Start-Up Guide, Implementation Workbook, Instructions, Guidance and Technical Support

Additional FSSC 22000 HACCP Documentation including the HACCP Calculator

The HACCP System is defined in the following FSMS documents:

	FSMS 8.5.1 Preliminary steps to enable hazard analysis.docx
	FSMS 8.5.2 Hazard Analysis.docx
	FSMS 8.5.3 Validation of control measures and combinations of control measures.docx
	FSMS 8.5.4 Hazard control plan (HACCP/OPRP Plan).docx
	FSMS 8.6 Updating the information specifying the PRPs and the hazard control plan
	FSMS 8.7 Control of monitoring and measuring.docx
	FSMS 8.8 Appendix Verification Plan
	FSMS 8.8 Verification related to PRPs and the hazard control plan.docx

There are also supplementary HACCP documents including the FSSC 22000 HACCP Calculator & Instructions:

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

FSSC 22000 HACCP Calculator & Instructions 2023

A screenshot of the "FSSC 22000 HACCP Calculator Master 2023" spreadsheet. The spreadsheet is a complex tool for calculating HACCP critical limits. It includes a table with columns for "Step Number", "Step Name", "Hazard Identified", "Hazard Category", "Control Measure", "Critical Limit", "Monitoring Frequency", "Monitoring Procedure", "Corrective & Corrective Action", "Responsibility & Authority", "HACCP Record", and "HACCP Validation". The table is filled with data for various steps and hazards, with cells color-coded in red, yellow, and green to indicate different levels of risk or control effectiveness. The spreadsheet also includes a "Decision Tree" section on the right side, which provides guidance on how to proceed based on the results of the calculations.

ISO 22000 HACCP Calculator Instruction

A screenshot of the "ISO 22000 HACCP Calculator" spreadsheet. The spreadsheet is a tool for calculating HACCP critical limits. It includes a table with columns for "Step Number", "Step Name", "Hazard Identified", "Hazard Category", "Control Measure", "Critical Limit", "Monitoring Frequency", "Monitoring Procedure", "Corrective & Corrective Action", "Responsibility & Authority", "HACCP Record", and "HACCP Validation". The table is filled with data for various steps and hazards, with cells color-coded in red, yellow, and green to indicate different levels of risk or control effectiveness. The spreadsheet also includes a "Decision Tree" section on the right side, which provides guidance on how to proceed based on the results of the calculations.

d) What is the feasibility of monitoring to detect any failure to remain within critical limit and/or measurable/observable action criteria?

Can be monitored to detect any failure 100% of the time
Good proportion of product monitored
Some monitoring
Very little monitoring

Based on the above select from the drop-down list if it is likely to be a CCP, OPRP, PRP or Not Effective.

If Not Effective Modify or look for a different Control Measure

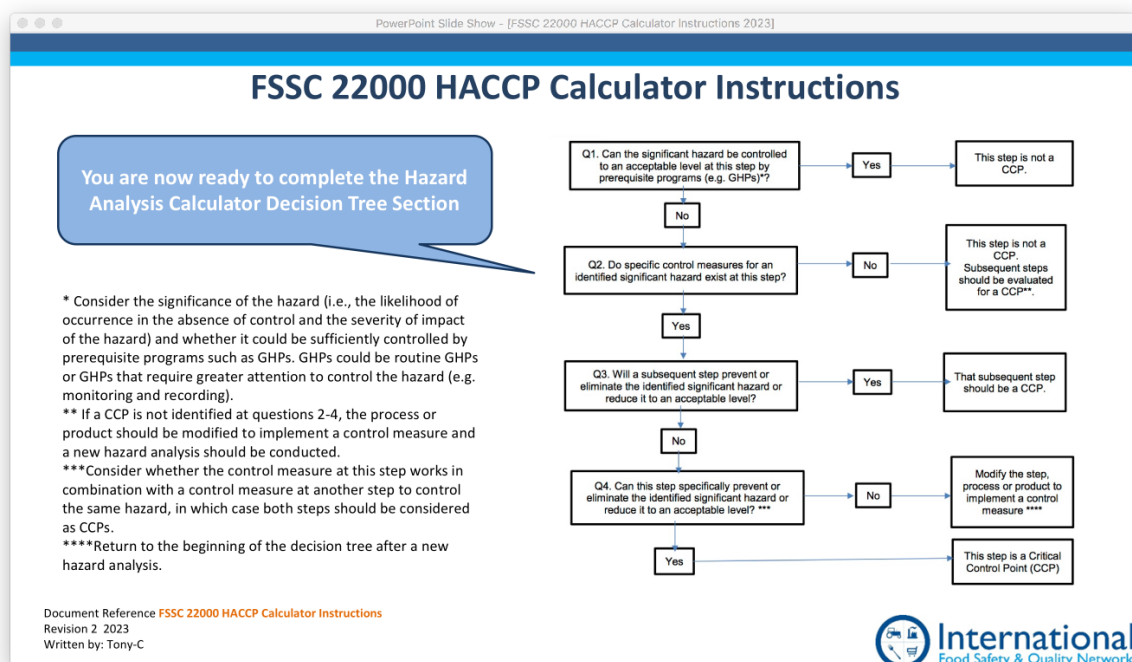

How does the FSSC 22000 HACCP Calculator help?

The FSSC 22000 HACCP Calculator assists the Food Safety Team in implementing a Hazard Control System compliant with ISO 22000 Section 8.5 Hazard control from Process Flow Steps to the Hazard Control Plan including:

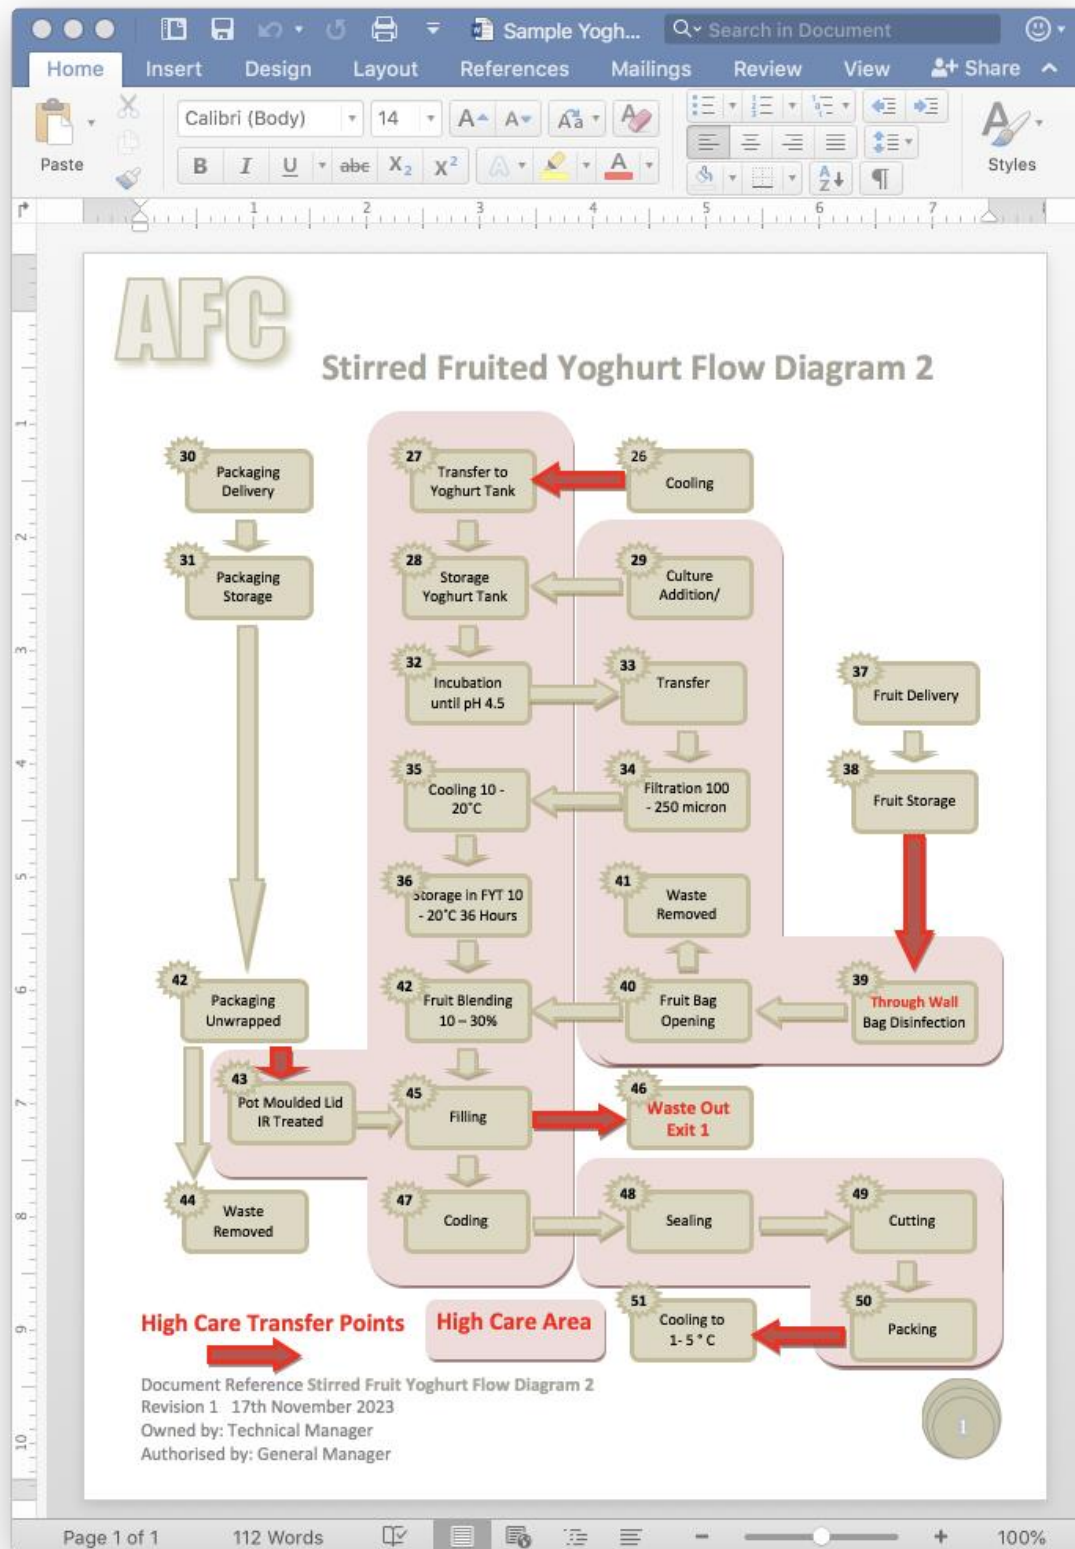

- ✓ 8.5.2 Hazard analysis
- ✓ 8.5.2.2 Hazard identification and determination of acceptable levels
- ✓ 8.5.2.3 Hazard assessment
- ✓ 8.5.2.4 Selection and categorization of control measure(s)
- ✓ 8.5.4 Hazard control plan (HACCP/OPRP Plan)

The FSSC 22000 HACCP Calculator provides the Food Safety Team with a system to assess each of the control measures selected and formulating a Hazard Control Plan of Critical Control Points and Operational Prerequisite Programmes as per the new requirements in ISO 22000:2018 and in accordance with CODEX Recommended International Code of Practice General Principles of Food Hygiene 2022 Edition HACCP System and Guidelines for its Application.

The decision-making process and results of the selection and categorization of the control measures is maintained as documented information by the FSSC 22000 HACCP Calculator.

There are also supplementary HACCP documents that might be useful

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

Internal Audit Checklists

There is a checklist for each section of the ISO 22000 standard plus there are sample audit/inspection records.

AFC

ISO 22000:2018 Audit Checklist

ISO 22000 Food Safety Management System Requirements Internal Audit	
ISO 22000 Clause	Audit Findings
8 Operation	
8.1 Operational planning and control	
Does the organization plan, implement, control, maintain and update the processes needed to meet requirements for the realization of safe products, and to implement the actions determined in 6.1, by:	
- establishing criteria for the processes?	
- implementing control of the processes in accordance with the criteria?	
- keeping documented information to the extent necessary to have the confidence to demonstrate that the processes have been carried out as planned?	
Does the organization control planned changes and review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary?	
Does the organization ensure that outsourced processes are controlled (see 7.1.6)?	
8.2 Prerequisite programmes (PRPs)	
8.2.1 Has the organization established, implemented, maintained and updated PRP(s) to facilitate the prevention and/or reduction of contaminants (including food safety hazards) in the products, product processing and work environment?	
8.2.2 Are the PRP(s):	
- appropriate to the organization and its context with regard to food safety?	
- appropriate to the size and type of the operation and the nature of the products being manufactured and/or handled?	
- implemented across the entire production system, either as programmes applicable in general or as programmes applicable to a particular product or process?

Food Safety Management System Audit Form

Food Safety Management System Audit Form			
Date of Audit: 1 st December 2022		Time of Audit: 14:00Hrs	
Auditor: Anne Auditor		Auditee: Warehouse Manager	
Procedure Document or Area Audited: Warehouse (All activities and procedures)			
Manual: Food Safety	Document Number: PRP 16	Area: PRP 16.1 Warehousing Prerequisites/PRP 16.2 Warehousing Procedures	Issue Number: 0
Summary of Audit including Conformances (Completed by Auditor)			
Generally, Receipt, Storage and Transport Procedures were found to be current and in order.			
Documents PRP 16.1 Warehousing Prerequisites/PRP 16.2 Warehousing Procedures were found to be the current revision and dated 7 th November 2022.			
3 Major and 3 minor non-conformances have been raised.			
The major non-conformances require urgent attention.			
Non-Conformances Found (Completed by Auditor)			
Non-Conformance Notification 0001 raised (Minor) - There was no spacing between pallets for inspection. Packaging in storage was not wrapped for protection.			
Non-Conformance Notification 0002 raised (Major) - Goods transferred to the factory were not covered. Where possible they should be on plastic pallets. Goods were found on the floor.			
Non-Conformance Notification 0003 raised (Minor) - The Quarantine Area was not separate from other storage and it was not maintained in a clean and tidy condition.			
Non-Conformance Notification 0004 raised (Minor) - Cold store door does not have strip curtains and was left open.			
Non-Conformance Notification 0005 raised (Major) - Ingredient storage was not controlled & segregation in place to prevent cross-contamination.			
Non-Conformance Notification 0006 raised (Major) - Each member of staff should have a training record, especially staff who are carrying out critical product checks.

The IFSQN FSSC 22000 Version 6 FSMS Implementation Package

FSSC 22000 Implementation Package Start Up Guide

We provide a Start Up Guide to help you navigate around the package and get to understand the contents.

New Comprehensive Version 6 Implementation Workbook

This workbook is provided to guide you in the implementation of your Food Safety Management System. The workbook is divided into 7 steps that are designed to assist you in implementing your food safety management system effectively:

- ✓ Step One: ISO 22000 Training for Management
- ✓ Step Two: Top Management Implementation
- ✓ Step Three: Food Safety Management System
- ✓ Step Four: Project 22000 including HACCP Implementation
- ✓ Step Five: Internal Auditing & Checklists
- ✓ Step Six: Review and Updating
- ✓ Step Seven: Final Steps to ISO 22000 Certification

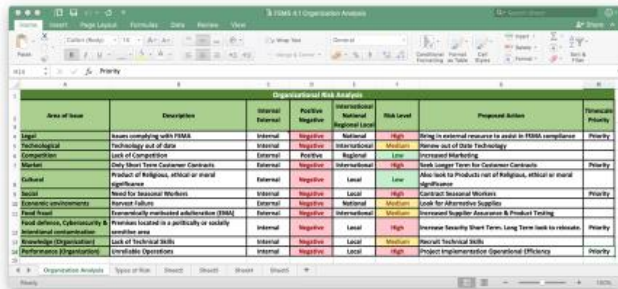

The workbook includes extensive Top Management and Food Safety Team Implementation Guidance

ISO 22000 Food Safety Management System Implementation Workbook

Top Management: Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS

Top Management need to determine the internal and external issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS. In order to achieve this aim Top Management should out an Organization Analysis considering external and internal issues, including legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization.

This analysis can be carried out using the FSMS 4.1 Organization Risk Analysis Tool included in the package:

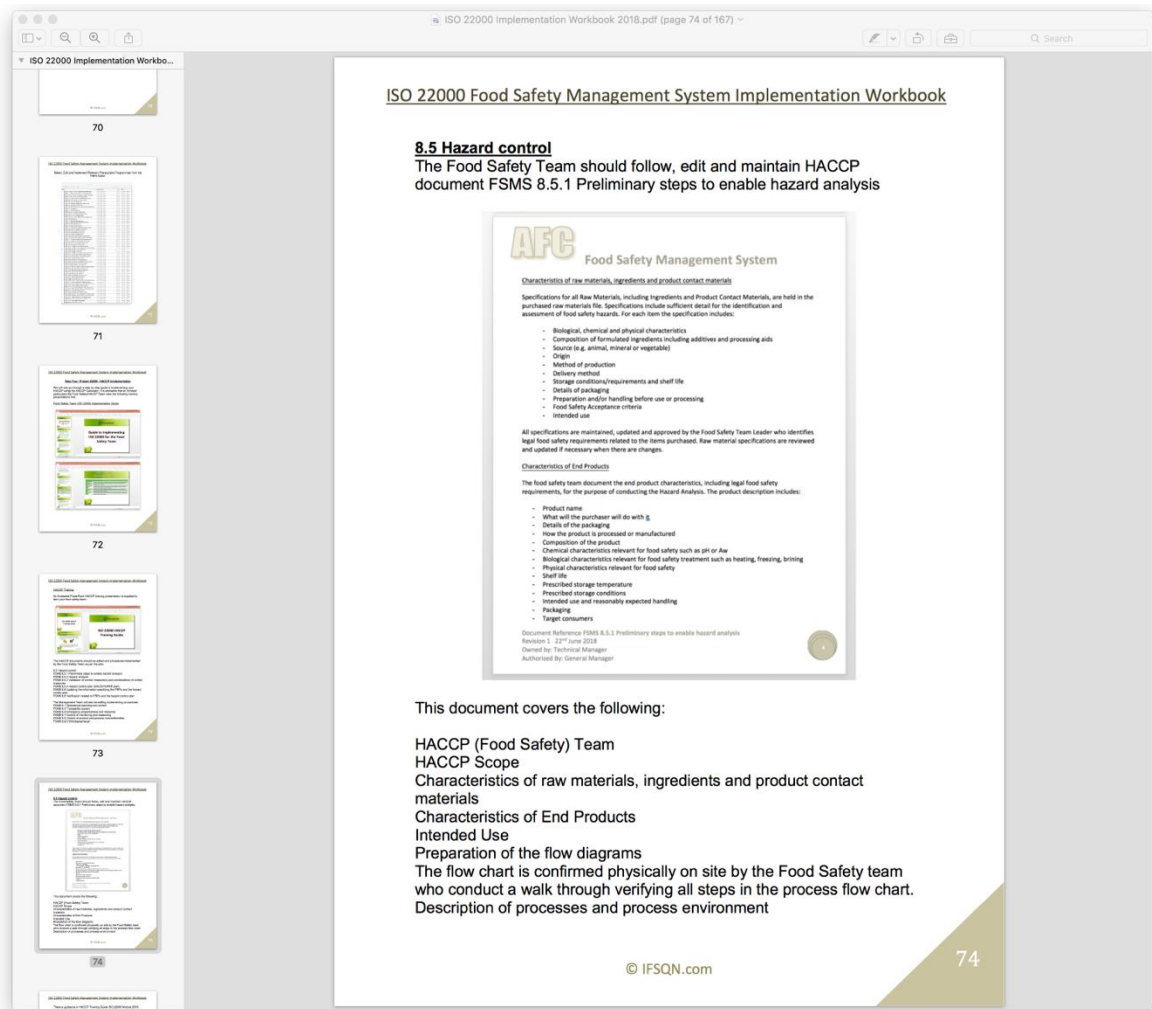

Area of Issue	Description	Organizational Risk Analysis		Risk Level	Proposed Action	Timescale Priority
		Internal/External	Positive/Negative			
Legal	Team complying with FSMS	Internal	Negative	High	Bring in external resources to audit in FSMS compliance	Priority
Technological	Technology out of date	Internal	Negative	Medium	Review out of date Technology	
Competitive	Lack of Competence	Internal	Positive	Low	Increased Marketing	
Supplier	Only Short Term Customer Contracts	External	Negative	High	Look longer term for Customer Contracts	Priority
Cultural	Product of Religious, ethical or moral significance	External	Negative	Low	Also look to Products not of Religious, ethical or moral significance	
Social	Need for Seasonal Workers	Internal	Negative	High	Contract Seasonal Workers	Priority
Economic environments	Harvest Failure	Internal	Negative	National	Look for Alternative Supplies	
Food Fraud	Increasingly sophisticated adulteration (FSMA)	External	Negative	Medium	Increased Supplier Assessment & Product Testing	
Food Defects, Cybersecurity & Intentional contamination	Procedures located in a particularly or socially sensitive area	Internal	Negative	Low	Increase Security Short Term, Long Term look to relocate	Priority
Knowledge (Organization)	Lack of Technical Skills	Internal	Negative	Low	Recruit Technical Skills	
Performance (Organization)	Unreliable Operations	Internal	Negative	Low	Project Implementation Operational Efficiency	Priority

Benefits of FSSC 22000 Certification

When a business has a good understanding of Food Safety principles and has the commitment and resources to carry them out, a Food Safety Management System will deliver the promised benefits. Small to medium organisations found in the food industry, have fewer resources compared with large companies, and so find it difficult to implement an effective system.

The FSSC 22000 Food Safety Management System is designed to help organisations tackle the task of implementing an effective system and progress to certification. As Tony Connor of IFSQN explains the FSSC 22000 Food Safety Management System gives organisations a head start in developing their system and preparing for certification:

“The system includes Food Safety Procedures covering a comprehensive range of prerequisite programmes which enable an organisation to put in place fundamental food safety procedures that are compliant with the ISO 22000:2018 Standard for Food Safety Management Systems, Technical Specification TS ISO 22002 part 1 Prerequisite Programmes for Food Manufacturers and FSSC 22000 Additional Requirements Version 6. The system also provides guidance on how to manage and implement a HACCP system and develop sound Hazard Control Plans. This process is aided by our implementation tools, training guides, instructions and checklists which completely simplify the implementation process.”

“As a bonus our FSSC 22000 Food Safety Management System is backed up by expert support which is always available to provide guidance in developing the system.”
