

The IFSQN FSSC 22000 Food Packaging Implementation Package Start  
Up Guide

Welcome to the IFSQN FSSC 22000 Food Packaging Safety Management System Start-Up Guide which will guide you through the contents of the package.

# The IFSQN FSSC 22000 Food Packaging Implementation Package Start Up Guide

**When you download the package, you will find this Start Up Guide and 5 folders containing the package documents:**

**Your first job is to buy a copy of:**

**[ISO 22000 Food safety management systems -- Requirements for any organization in the food chain](#)**

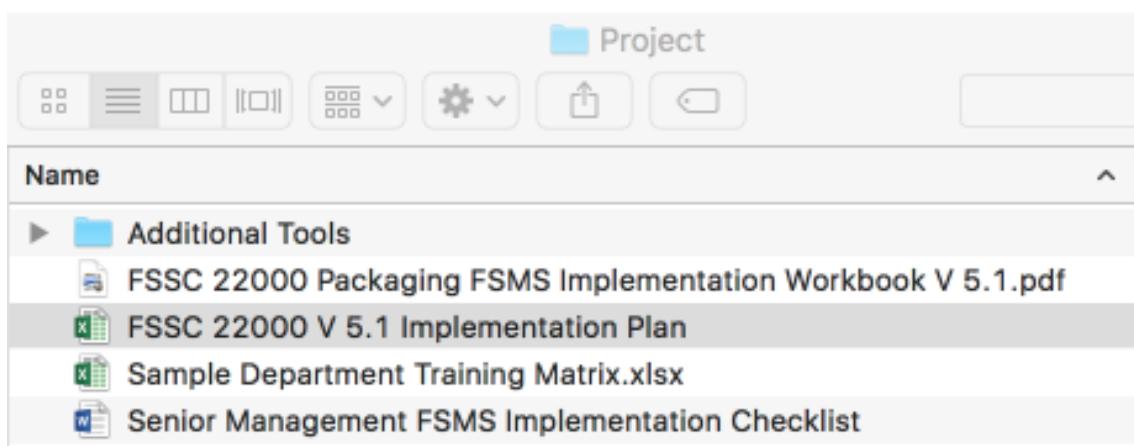

**and**

**[ISO/TS 22002-4:2013 Prerequisite programmes on food safety -- Part 4: Food packaging manufacturing](#)**

**Standards from ISO.**

**Also download the [FSSC 22000 Certification Scheme](#) documents (free to download)**

**Start by opening the Project folder**

# The IFSQN FSSC 22000 Food Packaging Implementation Package Start Up Guide

In this folder you will find an **FSSC 22000 FSMS Implementation Plan** which can be used to plan the development of your Food Packaging Safety Management System

## Senior Management Implementation Guidance & Checklists

An 11 step Senior Management Implementation Checklist is provided.

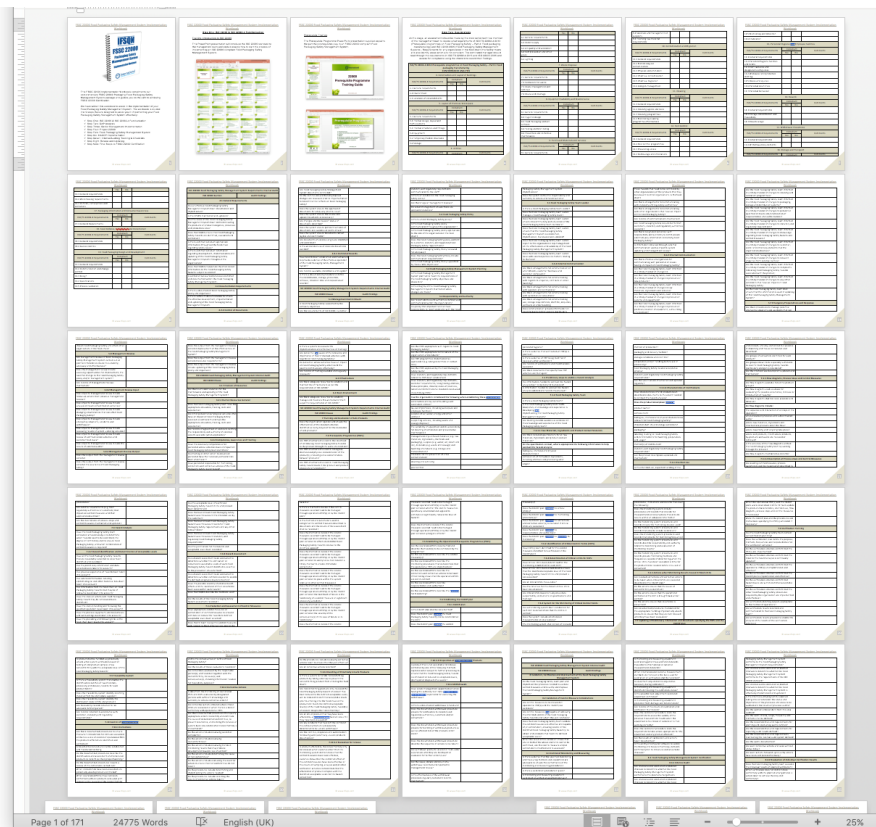

# The IFSQN FSSC 22000 Food Packaging Implementation Package Start Up Guide

The main document in the folder is the **FSSC 22000 Packaging FSMS Implementation Workbook Version 5.1**

An extensive workbook is provided to assist in the implementation of your FSSC 22000 compliant food packaging safety management system.

# The IFSQN FSSC 22000 Food Packaging Implementation Package Start Up Guide

In this folder, you will also find a Sample Training Matrix

Employee code	Name	Surname	Department	Position	CCP Procedural Training					OPRP Training		PRP 1	PRP 2	PRP 3	PRP 4	PRP 5

# The IFSQN FSSC 22000 Food Packaging Implementation Package Start Up Guide

**AFC**  
**Food Safety Management System**

For all products, the following information is traceable from the product batch code:

Stage	Details
Material Intake	Material, Time, Date, Batch Code, Supplier
Packaging Intake	Packaging, Time, Date, Batch Code, Supplier
In-Process batches	Product Mix, Record of all Materials mixed including Reworked material
Process Records	Product Mix, Time, Date, Temperature (if applicable), Batch Code
Bulk Storage Records	Product Mix, Time, Date, Temperature (if applicable), Batch Code
Production Records	Product Mix, Time, Date, Label, Code, Code of Packaging
Storage Record	Product, Date, Label, Code
Dispatch Records	Product, Time, Date, Label, Code, Customer
Critical Control Records	For all Control Points
Quality Control Records	For all stages
Cleaning Records	Product, Customer & Location Time, Date, Label, Code
Delivery Records	Material, Time, Date, Batch Code, Supplier

Full traceability exercises are undertaken regularly as part of product recall and withdrawal review to verify the Identification and Traceability system is effective. These exercises are documented and any corrective or preventative actions documented.

Records to enable full traceability are retained for a minimum period of 3 years taking into account the shelf life of the end products, customer and regulatory requirements.

You will also find the HACCP Calculator 22000 Packaging and Instructions:

The screenshot displays the 'HACCP Calculator ISO 22000' spreadsheet. The main table is titled 'HAZARD ANALYSIS AND CRITICAL CONTROL POINT CALCULATOR'. It contains a detailed hazard analysis with columns for Step Number, Step Name, Hazards Identified, Specific Details about the Hazard, Existing Prerequisite Programmes which assist in controlling the Hazard, Control Measure, and various assessment criteria including 'Assessment of control measures', 'Decision Tree', and 'Critical Control Point (CCP)'. The table lists multiple steps (e.g., AMF Delivery, SMP Delivery, WMP Delivery) and their associated hazards and control measures.

# The IFSQN FSSC 22000 Food Packaging Implementation Package Start Up Guide

**AFC** ISO 22000 HACCP Calculator Instruction

## Selection and Categorisation of Control Measures

Selection and categorization of control measures includes the following assessments in the Hazard Analysis Calculator worksheet:

The Control Measure Assessment section of the Hazard Analysis Calculator is **Colour Coded**. Control Measures that are **Not** likely to be **Effective** are highlighted by a **Black Box**. Control Measures that are likely to be **PRPs** are highlighted by a **Green Box**. Control Measures that are likely to be **Operational PRPs** are highlighted by an **Orange Box**. If all **Boxes are Red** after **Assessment** the team are to continue and use the **Decision Tree Section**. If a mixture of **Red and Orange Boxes** are highlighted then the **HACCP team** consider if to **proceed to the Decision Tree Section** or implement as an **Operational PRP**.

**Significant Hazards** which proceed to the **Decision Tree Section** are Categorised as **Critical Control Points** if they are highlighted in **Red** by the Hazard Analysis Calculator otherwise they are implemented as **Operational PRPs**.

Written by: Tony-C

**AFC** ISO 22000 HACCP Calculator Instruction

There are also HACCP document examples that you might find useful when implementing your Food Safety Plans.

Hazards	Control Measures
Glass and brittle plastics	Minimise glass in the factory and audit. Ensure glass breakage action and investigation systems are in place
Blades	System for safe issue, return and disposal of blades. Ensure blade loss/damage action and investigation systems are in place
Pests	Ensure pest control systems are in place
Microbiological	Clearly communicate personal hygiene rules and ensure hygienic conditions are monitored by audits
Dust and dirt	Ensure all cleaning requirements are specified and are carried out as scheduled
Wood splinters	Exclude wood from production areas
Hairs	Ensure hairnets and beard snoods are worn
Blood	Ensure accidents are reported immediately and cuts are suitably protected
Foodstuffs	Restrict food and drink to designated areas outside of production
Jewellery and personal items	Restrict wearing of jewellery and bringing of personal items into production areas
Raw material not approved for direct food contact	Ensure that all raw material is purchased approved for 'direct food contact' and the supplier provides all relevant specifications and certification
Generic contamination caused by poor handling and hygiene controls at suppliers	Only purchase raw material from approved suppliers who can demonstrate the required level of hygiene controls. Approval Questionnaire and auditing
Contaminated deliveries	Ensure all deliveries of lidding material are inspected for odour, damp or contamination
Generic contamination caused by poor handling and hygiene controls in Stores	Ensure that all raw material remains in original packaging until issued to production. Ensure that the stores department cleaning schedule is applied and external doors are kept closed when not in use
Generic contamination caused by poor handling and hygiene controls in Production	Ensure that all raw material is inspected for odour, damp or contamination when unpacking and is stored on clean plastic pallets for issue to production. Ensure that all personal hygiene rules are applied
Off-cuts	Ensure Inverter air pressure is > 1 bar

## 2.5 FSSC 22000 Additional Requirements 2.5.1 Management of Services and Purchased Materials now requires:

a) In addition to clause 7.1.6 of ISO 22000:2018, the organization shall ensure that where laboratory analysis services are used for the verification and/or validation of food safety, these shall be conducted by a competent laboratory (including both internal and external laboratories as applicable) that has the capability to produce precise and repeatable test results using validated test methods and best practices (e.g. successful participation in proficiency testing programs, regulatory approved programs or accreditation to international standards such as ISO 17025).

There are Laboratory document examples that you might find useful.

**AFC ISO 22000:2018 Audit Checklist**

Does the organization take action to reduce the consequences of the emergency situation, appropriate to the magnitude of the emergency or incident and the potential food safety impact?	
Does the organization periodically test procedures where practical?	
Does the organization review and, where necessary, update the documented information after the occurrence of any incident, emergency situation or tests? See NOTE in ISO 22000 - Examples of emergency situations	
<b>8.5 Hazard control</b>	
<b>8.5.1 Preliminary steps to enable hazard analysis</b>	
<b>8.5.1.1 General</b>	
To carry out the hazard analysis, is preliminary documented information collected, maintained and updated by the food safety team?	
Does the preliminary documented information include:	
- applicable statutory, regulatory and customer requirements?	
- the organization's products, processes and equipment?	
- food safety hazards relevant to the Food Safety Management System?	
<b>8.5.1.2 Characteristics of raw materials, ingredients and product contact materials</b>	
Does the organization ensure that all applicable statutory and regulatory food safety requirements are identified for all raw materials, ingredients and product contact materials?	
Does the organization maintain documented information concerning all raw materials, ingredients and product contact materials to the extent needed to conduct the hazard analysis (see 8.5.2), including the following, as appropriate:	
- biological, chemical and physical characteristics?	
- composition of formulated ingredients, including additives and processing aids?	
- source (e.g. animal, mineral or vegetable)?	
- place of origin (provenance)?	
- method of production?

<b>Food Safety Quality System Audit Form</b>			
Date of Audit: 1 <sup>st</sup> May 2018		Time of Audit: 14:00Hrs	
Procedure Document or Area Audited: Warehouse (All activities and procedures)			
Manual: Food Safety	Document Number: PRP 012	Title: Storage and Transport	Issue Number: 1
<b>Non-Conformances Found (To Be Completed by Auditor)</b>			
Non-Conformance Notification 0001 raised (Minor) - There was no spacing between pallets for inspection. Packaging in storage was not wrapped for protection.			
Non-Conformance Notification 0002 raised (Major) - Goods transferred to the factory were not covered. Where possible they should be on plastic pallets. Goods were found on the floor.			
Non-Conformance Notification 0003 raised (Minor) - The Quarantine Area was not separate from other storage and it was not maintained in a clean and tidy condition.			
Non-Conformance Notification 0004 raised (Minor) - Cold store door does not have strip curtains and was left open.			
Non-Conformance Notification 0005 raised (Major) - Ingredient storage was not controlled & segregation in place to prevent cross-contamination.			
Non-Conformance Notification 0006 raised (Major) - Each member of staff should have a training record, especially staff who are carrying out critical product checks.			
<b>Action to Be Taken (To Be Agreed Between Auditor and Auditee with Timescales)</b>			
Non-Conformance Notification 0001 - All staff to be briefed. Spacing is required in between pallets for inspection. Packaging in storage should be wrapped for protection To be completed by 25 <sup>th</sup> May 2018			
Non-Conformance Notification 0002 (Major) - All staff to be briefed. Goods transferred to the factory should be covered. Where possible they should be on plastic pallets. They should never be on the floor. To be completed by 8 <sup>th</sup> May 2018
