

FSSC 22000 S&D Food Safety Management System Implementation Workbook

This FSSC 22000 Implementation Workbook compliments our comprehensive FSSC 22000 Storage and Transport Food Safety Management System package and guides you on the path to achieving FSSC 22000 Certification.

We have written this workbook to assist in the implementation of your Food Safety Management System. The workbook is divided into 9 steps that are designed to assist you in implementing your Food Safety Management System effectively:

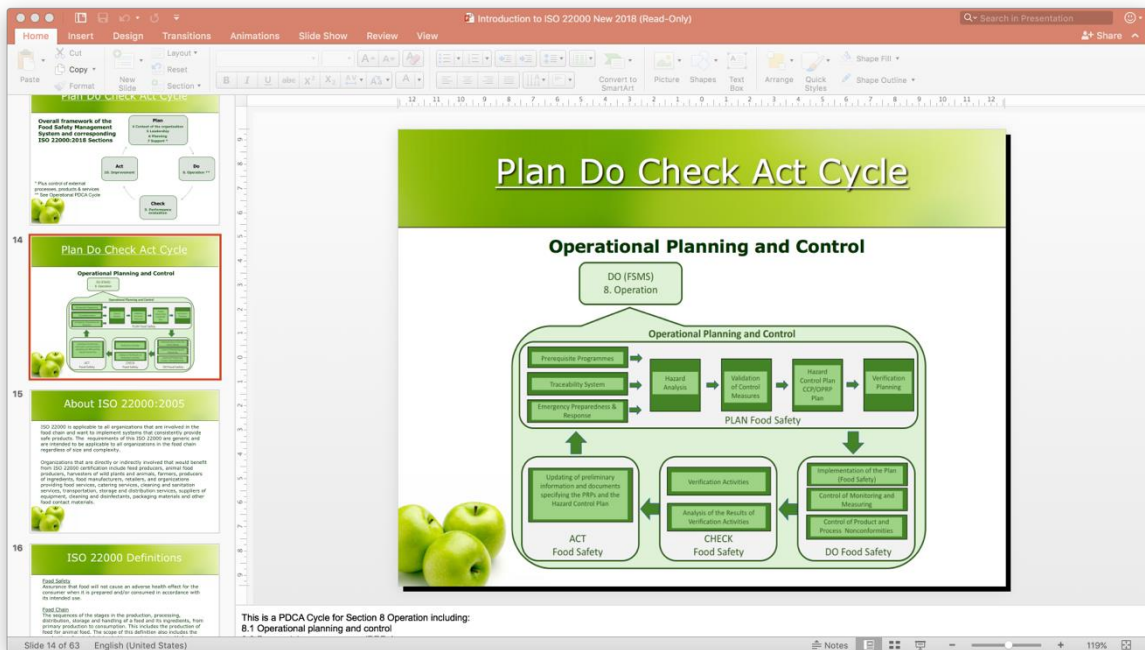

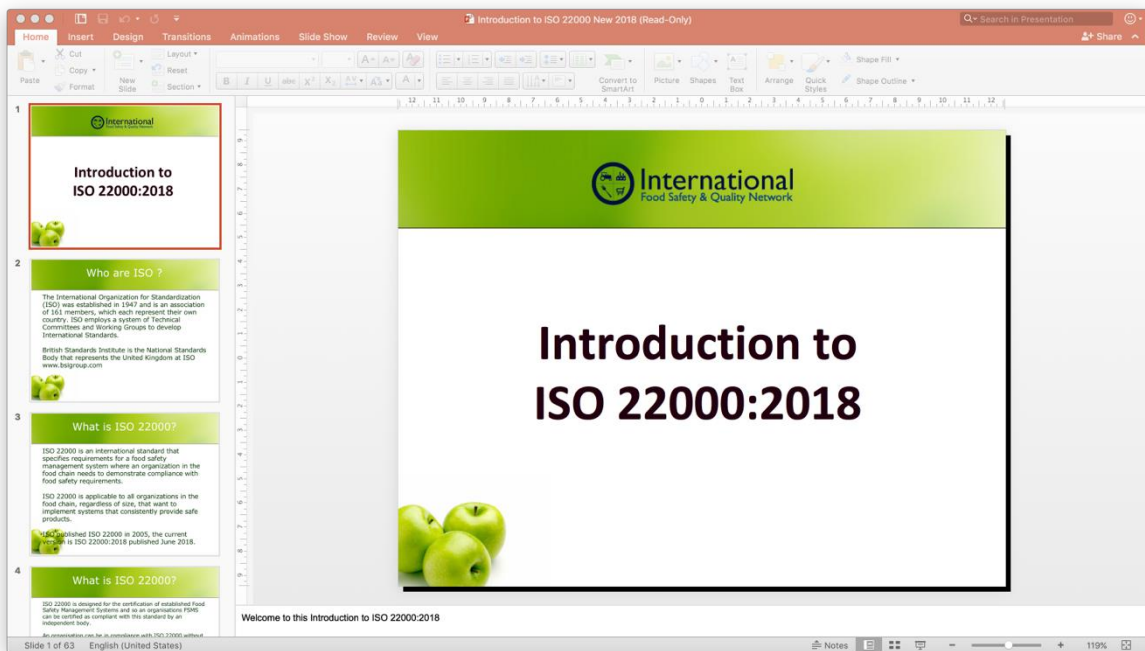

- ✓ Step One: ISO 22000 & ISO 22002-5 Familiarisation
- ✓ Step Two: GAP Analysis
- ✓ Step Three: Senior Management Implementation
- ✓ Step Four: Project 22000
- ✓ Step Five: Food Safety Management System
- ✓ Step Six: HACCP Implementation
- ✓ Step Seven: Internal Auditing Training & Checklists
- ✓ Step Eight: Review and Updating
- ✓ Step Nine: Final Steps to FSSC 22000 Certification

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Step One: ISO 22000 & ISO 22002-5 Familiarisation

Training: Introduction to ISO 22000

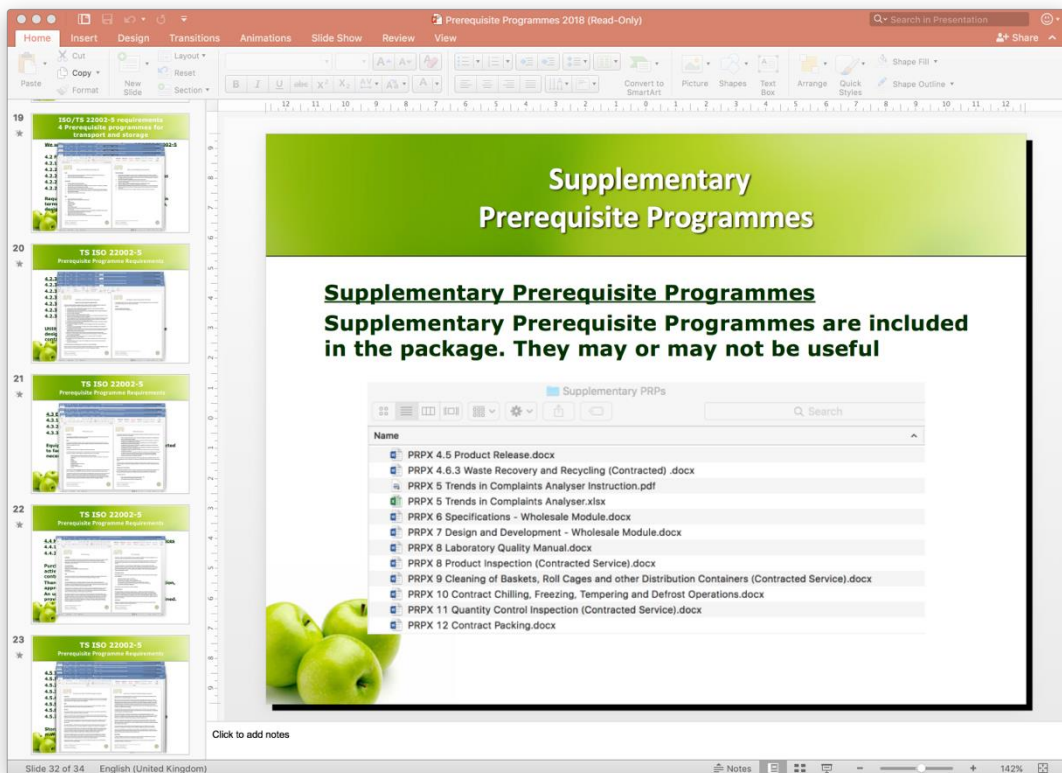

This PowerPoint presentation will introduce the ISO 22000 standard to the management team and explain exactly how to start the process of implementing an ISO 22000 compliant Food Safety Management System.

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Prerequisite Training

The Prerequisite Programme PowerPoint presentation supplied explains the part that prerequisites play in an FSSC 22000 compliant Food Safety Management System.

FSSC 22000 S&D Food Safety Management System Implementation
Workbook

Step Two: Gap Analysis

At this stage, an assessment should be made by the most senior technical member of the management team to decide what requirements of ISO/TS 22002-5:2019 (Prerequisite programmes on Food Safety -- Part 5: Transport and storage) and ISO 22000:2018 (Food Safety Management Systems - Requirements for any organization in the food chain) the facility meets and also identify areas which are not compliant. The nominated manager should read through the requirements in ISO/TS 22002-5:2019 and ISO 22000:2018 and assess for compliance using the checklist to record their findings.

ISO/TS 22002-5:2019 Prerequisite programmes on Food Safety -- Part 5: Transport and Storage - CONFORMANCE ANALYSIS			
4.1 General requirements			
ISO/TS 22002-5 Requirements	Compliant		Comments
	Yes	No	
4.1 General requirements			
4.2 Facilities			
ISO/TS 22002-5 Requirements	Compliant		Comments
	Yes	No	
4.2.1 External Layout			
4.2.2 Internal layout and work space			
4.2.2.1 Internal design, layout and traffic patterns			
4.2.2.2 Internal structures and fittings			
4.2.2.3 Drains and drainage			
4.2.3 Utilities			
ISO/TS 22002-5 Requirements	Compliant		Comments
	Yes	No	
4.2.3.1 General requirements			
4.2.3.2 Water supply			

FSSC 22000 S&D Food Safety Management System Implementation

Workbook

Does the scope include the activities, processes, products or services that can have an influence on the food safety of its end products?	
When determining this scope, has the organization considered:	
- the external and internal issues referred to in 4.1?	
- the requirements referred to in 4.2?	
Is the scope available and maintained as documented information?	
4.4 Food safety management system	
Has the organization established, implemented, maintained, updated and continually improved the Food Safety Management System, including the processes needed and their interactions, in accordance with the requirements of ISO 22000?	
ISO 22000 Food Safety Management System Requirements Internal Audit	
ISO 22000 Clause	Audit Findings
5 Leadership	
5.1 Leadership and commitment	
Has Top Management demonstrated leadership and commitment with respect to the Food Safety Management System by:	
- ensuring that the food safety policy and the objectives of the Food Safety Management System are established and are compatible with the strategic direction of the organization?	
- ensuring the integration of the Food Safety Management System requirements into the organization's business processes?	
- ensuring that the resources needed for the Food Safety Management System are available?	
- communicating the importance of effective food safety management and conforming to the Food Safety Management System requirements, applicable statutory and regulatory requirements, and mutually agreed customer requirements related to food safety?	
- ensuring that the Food Safety Management System is evaluated and	

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Ensure any areas requiring action are identified

Areas requiring improvement identified in the assessment of compliance with ISO/TS 22002-5 & ISO 22000 should be logged.

Date	ISO/TS 22002-5 or ISO 22000 Clause	Details of Non-Compliance	Corrective Action Required	Responsibility	Target completion Date	Date Completed

Step Three: Senior Management Implementation

Top Management need to start the implementation process.

Determine the Context of the organization, how to demonstrate Leadership and Planning establish the Food Safety Management System fundamentals including Food Safety Policies and Objectives ensuring the integration of the FSMS requirements into the organization's business processes.

At this stage, Top Management need to:

- ✓ determine the Context of the organization
- ✓ demonstrate Leadership
- ✓ plan the establishment of the FSMS
- ✓ plan to provide adequate support and resources to establish the FSMS
- ✓ ensure there is adequate infrastructure and work environment
- ✓ allocating responsibility and authority

This stage requires the Top Management to meet and establish the foundations for the Food Safety Management System:

- ✓ Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS
- ✓ Determine the interested parties (Customer, Regulatory, Statutory and other) that are relevant to the FSMS
- ✓ Determine Customer, Regulatory, Statutory and other relevant Food Safety requirements
- ✓ Define the scope and boundaries of the FSMS
- ✓ Develop a Food Safety Policy
- ✓ Based on the Food Safety Policy establish Food Safety Objectives
- ✓ Plan the establishment of the FSMS using the project planner
- ✓ Provide adequate support to establish the FSMS
- ✓ Ensure there is adequate infrastructure and work environment
- ✓ Allocate responsibility and authority
- ✓ Assess, plan and establish appropriate internal and external communication (including the food chain) channels

A meeting should now be co-ordinated involving all the Top Management Team.

FSSC 22000 S&D Food Safety Management System Implementation
Workbook

Top Management FSMS Implementation Meeting

Date/Time

Venue

Agenda

1. Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS
2. Determine the interested parties (Customer, Regulatory, Statutory and other) that are relevant to the FSMS
3. Determine Customer, Regulatory, Statutory and other relevant Food Safety requirements
4. Define the scope and boundaries of the FSMS
5. Develop a Food Safety Policy
6. Based on the Food Safety Policy establish Food Safety Objectives
7. Plan the establishment of the FSMS using the project planner
8. Provide adequate support to establish the FSMS
9. Ensure there is adequate infrastructure and work environment
10. Allocate responsibility and authority
11. Assess, plan and establish appropriate internal and external communication (including the food chain) channels

Attendees:

Top Management Team		
Job Title	Name	Role in Team
Managing Director		Chairman
General Manager		Deputy Chair
Operations Manager		Operations Reporting
Quality Manager		Food Safety Reporting Management Representative
Planning Manager		Planning and Capacity Reporting
Distribution Manager		Distribution Reporting
Maintenance Manager		Services and Engineering Provision
Finance Manager		Financial Reporting
Human Resources Manager		Resource reporting

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Top Management: Determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS

Top Management need to determine the internal and external issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS. In order to achieve this aim Top Management should out an Organization Analysis considering external and internal issues, including legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization.

This analysis can be carried out using the FSMS 4.1 Organization Risk Analysis Tool included in the package:

Organizational Risk Analysis							
Area of Issue	Description	Internal External	Positive Negative	International National Regional Local	Risk Level	Proposed Action	Timescale Priority
Legal	Issues complying with FSMA	Internal	Negative	National	High	Bring in external resource to assist in FSMA compliance	Priority
Technological	Technology out of date	Internal	Negative	International	Medium	Renew out of Date Technology	
Competition	Lack of Competition	External	Positive	Regional	Low	Increased Marketing	
Market	Only Short Term Customer Contracts	External	Negative	International	High	Seek Longer Term for Customer Contracts	Priority
Cultural	Product of Religious, ethical or moral significance	External	Negative	Local	Low	Also look to Products not of Religious, ethical or moral significance	
Social	Need for Seasonal Workers	Internal	Negative	Local	High	Contract Seasonal Workers	Priority
Economic environments	Harvest Failure	External	Negative	National	Medium	Look for Alternative Supplies	
Food fraud	Economically motivated adulteration (EMA)	External	Negative	International	Medium	Increased Supplier Assurance & Product Testing	
Food defence, Cybersecurity & Intentional contamination	Premises located in a politically or socially sensitive area	Internal	Negative	Local	High	Increase Security Short Term. Long Term look to relocate.	Priority
Knowledge (Organization)	Lack of Technical Skills	Internal	Negative	Local	Medium	Recruit Technical Skills	
Performance (Organization)	Unreliable Operations	Internal	Negative	Local	High	Project Implementation Operational Efficiency	Priority

The FSMS 4.1 Organization Risk Analysis Tool allows Top Management to summarise the Analysis by Area of Issue; Description of Issue; Whether Internal or External; Whether Positive or Negative; Whether International, National, Regional or Local; Risk Level; Proposed Action; Timescale and Priority.

Top Management FSMS Implementation Checklist

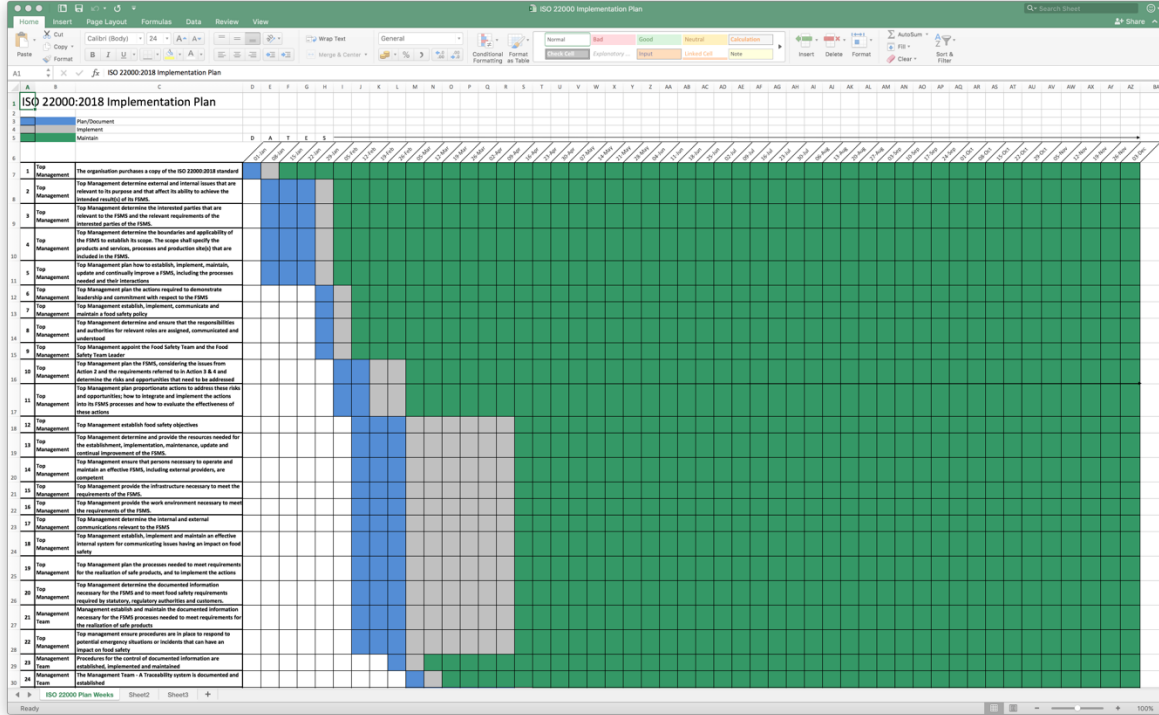

The Top Management FSMS Implementation Meeting should follow the guidelines of the Top Management Implementation Checklist:

1	Top Management determine external and internal issues that are relevant and affect its ability to achieve the intended result(s) of its FSMS	
	External & Internal Issues	Actions to address risks and opportunities
2	Top Management Determine the interested parties (Customer, Regulatory, Statutory and Other) that are relevant to the FSMS.	
	Interested Parties (Customer, Regulatory, Statutory and Other)	Details

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Top Management Establish the Project Plan

Using the Excel Project Planner Top Management adapt the template supplied with the system to establish a Project Plan.

ISO 22000:2018 Implementation Plan

Step	Responsible Team	Implementation Task
1	Top Management	The organisation purchases a copy of the ISO 22000:2018 standard
2	Top Management	Top Management determine external and internal issues that are relevant to its purpose and that affect its ability to achieve the intended result(s) of its FSMS.
3	Top Management	Top Management determine the interested parties that are relevant to the FSMS and the relevant requirements of the interested parties of the FSMS.
4	Top Management	Top Management determine the boundaries and applicability of the FSMS to establish its scope. The scope shall specify the products and services, processes and production site(s) that are included in the FSMS.
5	Top Management	Top Management plan how to establish, implement, maintain, update and continually improve a FSMS, including the processes needed and their interactions
6	Top Management	Top Management plan the actions required to demonstrate leadership and commitment with respect to the FSMS
7	Top Management	Top Management establish, implement, communicate and maintain a food safety policy
8	Top Management	Top Management determine and ensure that the responsibilities and authorities for relevant roles are assigned, communicated and understood
9	Top Management	Top Management appoint the Food Safety Team and the Food Safety Team Leader
10	Top Management	Top Management plan the FSMS, considering the issues from Action 2 and the requirements referred to in Action 3 & 4 and determine the risks and opportunities that need to be addressed
11	Top Management	Top Management plan proportionate actions to address these risks and opportunities; how to integrate and implement the actions into its FSMS processes and how to evaluate the effectiveness of these actions
12	Top Management	Top Management establish food safety objectives
13	Top Management	Top Management determine and provide the resources needed for the establishment, implementation, maintenance, update and continual improvement of the FSMS.

Top Management Establish Food Safety Responsibility & Authority Levels

Process	Responsible Persons	Activity

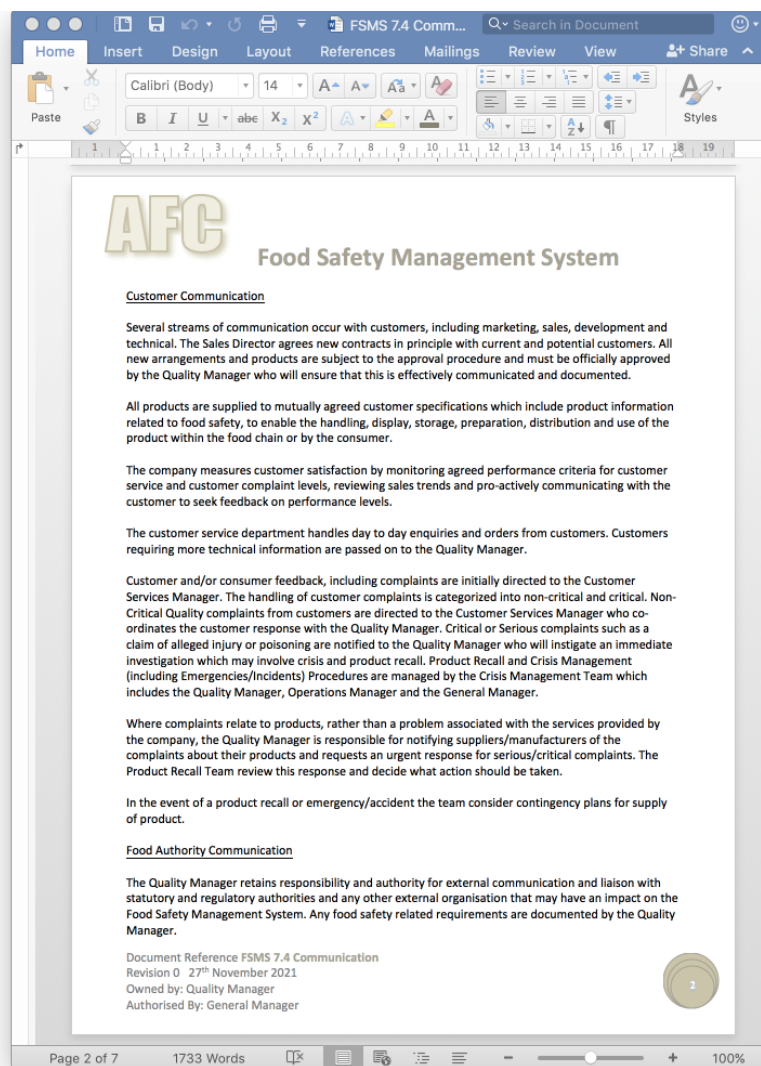

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Top Management establish Communication Channels

Top Management must establish and document clear levels of communication for suppliers, contractors, customers, food authorities and staff within the food safety management system. Detailed communication arrangements and food safety communication responsibilities for all levels of management should be contained in the food safety and quality manual. The communication procedures should apply to all members of staff, both full time and temporary.

Procedures should be in place to address communication including:

- Suppliers and Contractor Communication
- Customer Communication
- Food Authority Communication

AFC Food Safety Management System

4.3 Determining the scope of the food safety management system

The company has planned, established, documented and implemented a food safety management system, which is maintained in order to continually improve its effectiveness in accordance with legislation, international standards and best industry practice.

Scope

The scope of the Food Safety Management System includes all product categories, processes, activities conducted, production sites and any outsourced activities that can affect food safety.

The scope has been defined considering the Top Management Organization Analysis of external and internal issues, including legal, technological, competitive, market, cultural, social and economic environments, cybersecurity and food fraud, food defence and intentional contamination, knowledge and performance of the organization.

Top management has determined relevant interested parties and the food safety requirements of those interested parties and these have been considered in defining the scope of the Food Safety Management System.

These requirements are aligned with the policies and objectives of the company and include those of the following standards:

- Food Safety - ISO 22000
- Food Safety - ISO 22002-1

Scope of the Food Safety Management System

AFC Food Safety Management System

5.1 Leadership and commitment

Top management demonstrate clear and visible commitment to the Food Safety Management System by establishing and implementing, then fully communicating and supporting its policies, procedures and objectives. Top Management is committed to continually improve the effectiveness of the Food Safety Management System by regular monitoring, review and pro-active actions.

Top Management has a total commitment to food safety observing all legal, moral and ethical codes and this is the concern of every employee.

Top management demonstrate clear and visible leadership commitment by:

- Establishing and implementing a Food Safety Policy compatible with the strategic direction of the organization
- Communicating and Maintaining the Food Safety Policy
- Establishing and implementing Food Safety Objectives compatible with the strategic direction of the organization
- Communicating and Maintaining the Food Safety Objectives
- Ensuring the integration of the Food Safety Management System requirements into business processes
- Conducting regular pro-active management reviews and communicating outputs.
- Communicating commitment to satisfying customer requirements including food safety, quality and service
- Communicating commitment to meeting applicable statutory and regulatory requirements related to food safety
- Supporting and planning the development and operation of the Food Safety Management System
- Ensuring the Food Safety Management System is maintained when changes are planned and implemented.
- Establishing documentation required for the effective development, implementation and updating of the Food Safety Management System and communicating pertinent information throughout the organisation.
- Providing the resources and training to achieve company Policies and Objectives
- Providing the infrastructure and work environment to meet company Policies and Objectives
- Supporting other relevant management roles to ensure that the Food Safety Management System is effectively implemented
- Promoting an ethic of continuous improvement throughout the company.
- Directing and supporting persons to ensure the strict observation of all food safety system procedures, the use of correct materials and equipment, recording and reporting of both standard and non-standard events and compliance with the company rules

FSMS 6.1 Actions to address risks and opportunities

FSMS 6.2 Objectives of the food safety management system and planning to achieve them

FSMS 6.3 Planning of changes

AFC Food Safety Management System

6.1 Actions to address risks and opportunities

Top Management are responsible for establishing and planning the implementation, maintenance and updating of the Food Safety Management System in order to ensure it meets customer, statutory and regulatory requirements and the requirements of international standards.

Scope

When planning the Food Safety Management System all product categories, processes, activities conducted, production sites and any outsourced activities that can affect food safety are considered.

Procedure

When planning the Food Safety Management System, Top Management consider the issues and requirements referred to in:

- 4.1 Understanding the organization and its context
- 4.2 Understanding the needs and expectations of interested parties; and
- 4.3 Scope of the Food Safety Management System

As a result, Top Management determines the risks and opportunities that need to be addressed to ensure that the FSMS can achieve its intended result(s); enhance any desirable effects; whilst preventing or reducing undesired effects and achieve continual improvement.

Top Management plan actions to address these risks and opportunities and evaluate the effectiveness of these actions whilst considering the impact on food safety requirements; the conformity of food products and services to customers; and requirements of interested parties in the food chain.

In order to integrate and implement the actions into the Food Safety Management System processes, Top Management identifies the processes needed for product realization and plans the food safety management system accordingly. The product realization process involves the planning, development, manufacture, and delivery of the end product. In planning product realization processes, all of the objectives and requirements for the product including the provision of the necessary resources for product realization are included. The Food Safety Management System includes a comprehensive approach to getting from the product concept to the finished product.

Food Safety Management System planning takes into consideration the following:

- product requirements including customer, regulatory, statutory and industry codes of practice
- creation of the processes, documents, and resources needed for product realization
- required validation, verification, monitoring, inspection, and test activities

Top Management are responsible for considering the capability of existing internal resources, any requirement for external resources, in ensuring adequate resources are provided to establish, implement, maintain, update and continually improve the Food Safety Management System.

People

The company has established, implemented maintains and updates a Food Safety Management System for the site. A requirement of this system is the review and provision of human resources and training. In the process of establishing the Food Safety Management System the Top Management team has established and provided the resources required.

The scope for the provision of human resources includes processes, activities conducted, production sites and any outsourced activities that can affect food safety. The company ensures that all employees carrying out work that can affect product quality and safety are adequately qualified, trained, instructed and supervised commensurate with their activity and are demonstrably competent to carry out their tasks.

Senior management team identify and provide the human resources and training needed to maintain the food safety systems, meet site policies and objectives, and to meet customer requirements. Careful consideration is given to the amount of competent trained personnel required whilst also ensuring there are also adequate infrastructure and a suitable work environment.

Competence

Resource to identify staff competence levels required, provision of training, periodic evaluation of its effectiveness and staff awareness training is provided. It is company policy that all personnel, including temporary staff, affecting conformity to product requirements shall be competent on the basis of appropriate education and training, and/or where applicable, on the basis of skills and experience and be adequately supervised. A training programme and adequate supervision is put in place for all new personnel until they have been assessed as competent.

More specifically the Food Safety Team and personnel that can affect food safety are required to be competent and have the appropriate level of education, training skills and experience. The Technical Manager is responsible for ensuring that the food safety team has a combination of multi-disciplinary knowledge and experience in developing and implementing the FSMS (including the products, processes, equipment and food safety hazards).

Prerequisite Programme Document Implementation

The Prerequisite Programme documents should be edited and procedures implemented as per the plan and relevant training given. It is advisable that all involved particularly the Food Safety/HACCP Team view the Prerequisite Programmes training presentation first.

FSMS 8.2 Prerequisite programmes (PRPs)

Prerequisite Programmes Manual

A comprehensive set of prerequisite programmes templates that you can use to define your Infrastructure and Maintenance Standards and those prerequisites defined in ISO/TS 22002-5 Prerequisite programmes on food safety – Part 5 Transport and storage

PRPR 4.2 Facilities

PRP 4.2.3 Utilities and Chemical Control

PRPR 4.3 Equipment

PRP 4.3 Equipment Calibration

PRP 4.3.3 Maintenance

PRP 4.4 Purchasing

PRP 4.4 Contractual Arrangements

PRP 4.4 Management of Subcontractors

PRPR 4.5 Transport and Storage Operations

PRP 4.5.7 Control of Non-Conforming Product

PRP 4.6.1 Personnel Hygiene Policy

PRP 4.6.1 Open Products - Hygiene Code of Practice

PRP 4.6.1 Staff Facilities

PRP 4.6.1.4 Layout & Protective Clothing Risk Assessment

PRPR 4.6.2 Cleaning and disinfection

PRP 4.6.3 Waste Management

PRPR 4.6.4 Pest Management

PRP 4.7 Traceability

PRP 4.8 Product Recall and Withdrawal

PRPR 4.9 Safeguarding of goods

PRP 5 Allergen Management*

* Required as part of FSSC 22000 Certification Scheme Additional Requirements:

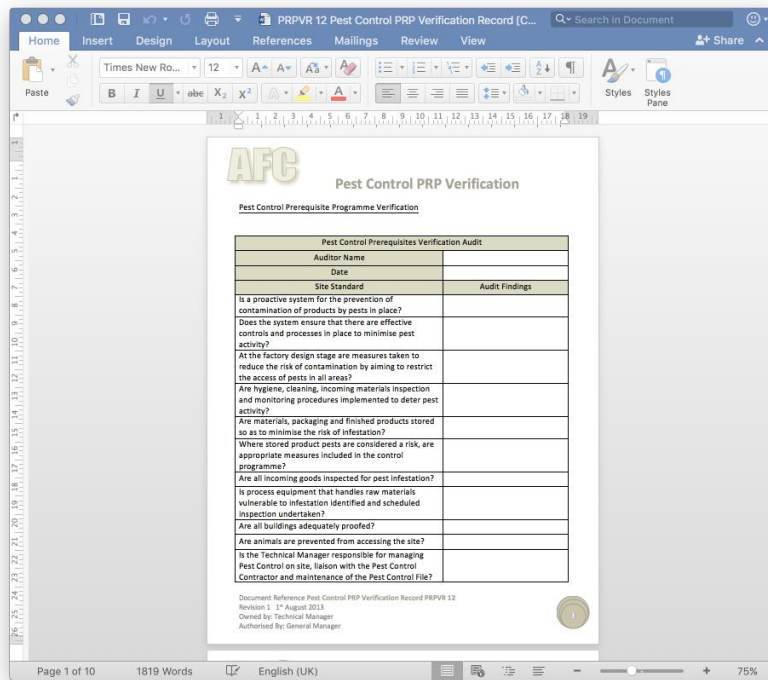

2.5.6 MANAGEMENT OF ALLERGENS (FOOD CHAIN CATEGORIES C, E, FI, G, I & K)

The organization shall have a documented allergen management plan that includes:

- a) Risk assessment covering all potential sources of allergen cross-contamination and;
- b) Control measures to reduce or eliminate the risk of cross-contamination.

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Step Six: HACCP Implementation

We will now go through a step by step guide to implementing your HACCP using the HACCP Calculator. It is advisable that all involved particularly the Food Safety/HACCP Team view the following training presentations first:

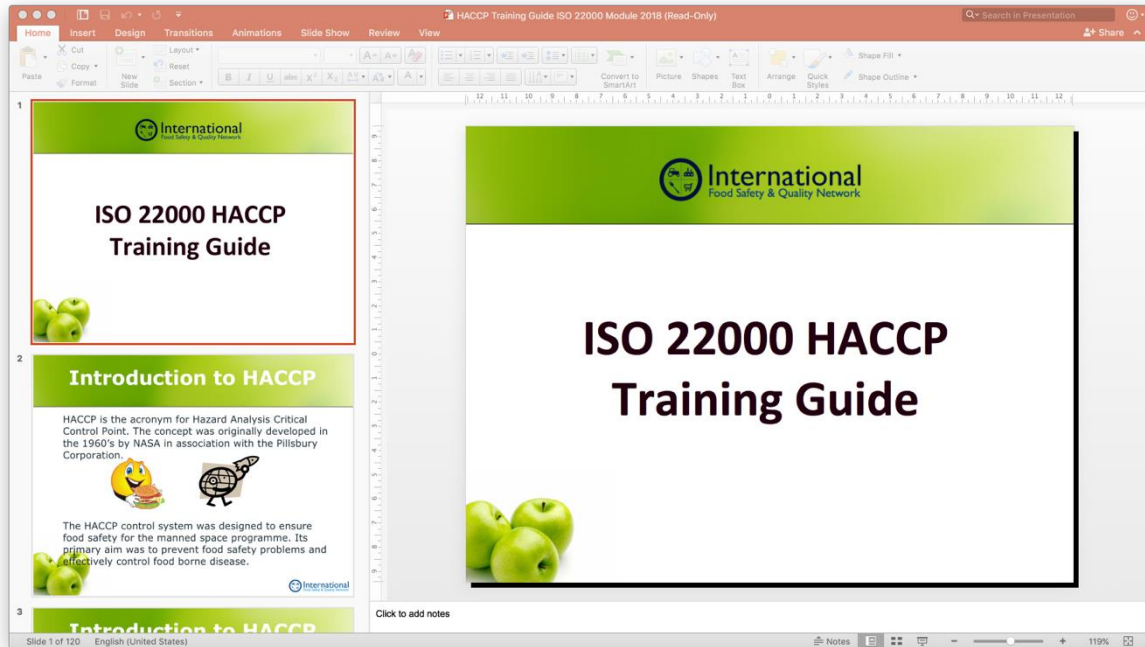

Food Safety Team: ISO 22000 Implementation Guide

FSSC 22000 S&D Food Safety Management System Implementation Workbook

HACCP Training

An illustrated PowerPoint HACCP training presentation is supplied to train your food safety team.

The HACCP documents should be edited and procedures implemented by the Food Safety Team as per the plan.

8.5 Hazard control

FSMS 8.5.1 Preliminary steps to enable hazard analysis

FSMS 8.5.2 Hazard analysis

FSMS 8.5.3 Validation of control measure(s) and combinations of control measures

FSMS 8.5.4 Hazard control plan (HACCP/OPRP plan)

FSMS 8.6 Updating the information specifying the PRPs and the hazard control plan

FSMS 8.8 Verification related to PRPs and the hazard control plan

The Management Team will also be editing implementing procedures:

FSMS 8.1 Operational planning and control

FSMS 8.3 Traceability system

FSMS 8.4 Emergency preparedness and response

FSMS 8.7 Control of monitoring and measuring

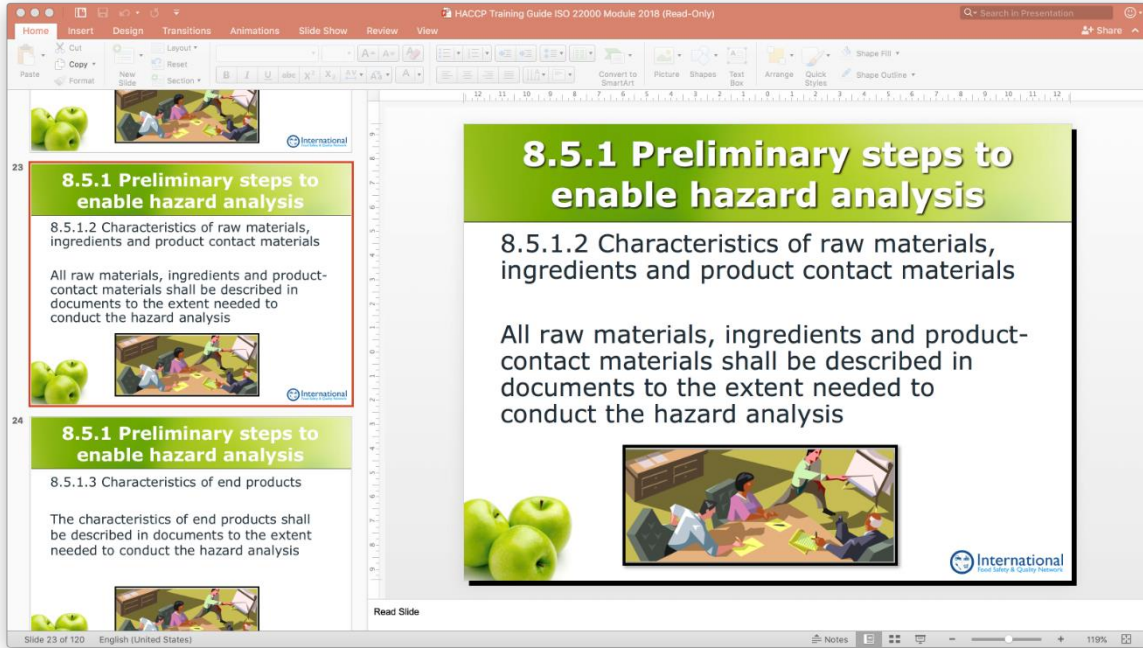

FSMS 8.9 Control of product and process nonconformities

FSMS 8.9.5 Withdrawal/recall

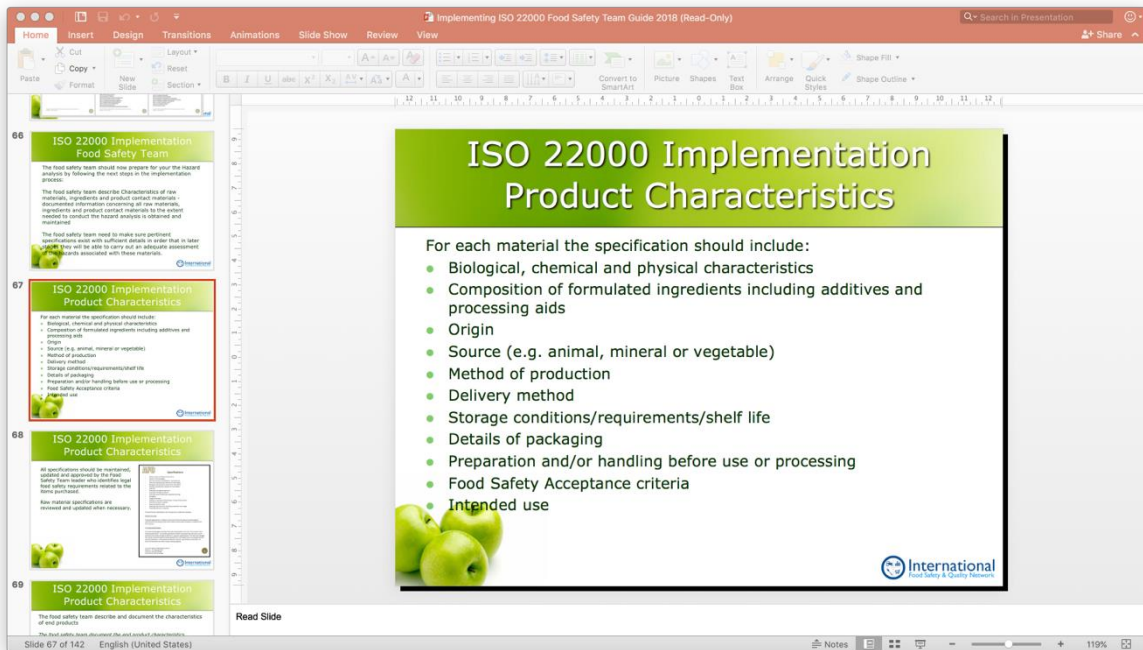

FSSC 22000 S&D Food Safety Management System Implementation Workbook

Description of processes and process environment

There is guidance in HACCP Training Guide ISO 22000 Module 2018

There is also guidance in Implementing ISO 22000 Food Safety Team Guide 2018

FSSC 22000 S&D Food Safety Management System Implementation Workbook

The Food Safety Team should follow, edit and maintain HACCP document FSMS 8.5.2 Hazard Analysis

8.5.2 Hazard Analysis

Hazard Identification

The Food Safety Team conducts a hazard analysis for food safety hazards that are reasonably likely to occur for each product and process category. A hazard analysis is conducted every time there are relevant changes.

The Food Safety Team record the food safety hazards that are reasonably likely to occur for each product and process category in each process facility as identified by the information gathered in the steps so far:

- Scope of the HACCP Study
- Characteristics of raw materials, ingredients and product contact materials
- Characteristics of End Products
- Intended use
- Flow diagrams
- Description of processes and process environment
- Control Measures

In **addition** Food Safety Hazards are identified and recorded based on:

- Experience (Food Safety Team knowledge)
- External and internal Information such as epidemiological studies, scientific and other historical information relating to the product food safety
- Information from the Food Chain on Food Safety Hazards of relevance for intermediate products, end products and the food at the time of consumption
- Customer, regulatory and statutory requirements
- Customer complaints
- Previous internal non-conformances are used to help assess the risk.

The Food Safety Team:

- Identify hazards taking into account the steps preceding and following the specified operation, process equipment, process services and surroundings, persons, all steps in the flow diagram and preceding and following links in the food chain
- Consider hazards in sufficient detail to enable hazard assessment and the selection of appropriate control measures
- Identify step(s) (e.g. receiving raw materials, processing, distribution and delivery) at which each food safety hazard can be present, be introduced, increase or persist.

Authorised By: General Manager

This document covers the following:

Hazard Identification
Food Safety Hazard Analysis Prompt
Determination of Acceptable Levels
Hazard Assessment
Selection and Assessment of Control Measures

FSSC 22000 S&D Food Safety Management System Implementation Workbook

There is guidance in HACCP Training Guide ISO 22000 Module 2018

Conduct a Hazard Analysis Identify Biological Hazards

Biological hazards can be associated with the raw materials from which products are made and may be introduced during the process by people, the environment or the process itself.

Identifying the biological hazards to which your production processes might be subjected is an important part of the hazard analysis so it is important that someone with microbiological knowledge is on your team. Some of the major pathogens that may be associated with food products are *Salmonella*, *Escherichia coli* 0157:H7, *Listeria monocytogenes*, *Clostridium botulinum*, and *Staphylococcus aureus*.

For a comprehensive list of Biological Hazards refer Hazards in the HACCP Calculator. You are able to edit the calculator and add your own.

International Food Safety & Quality Network

ISO 22000 Implementation Hazard Assessment

The food safety team assess the food safety hazards using the HACCP calculator

Firstly the Food Safety Team assess the likelihood of the hazard occurring and enter:

- 1 for Highly Unlikely
- 2 for Possible
- 3 for Likely

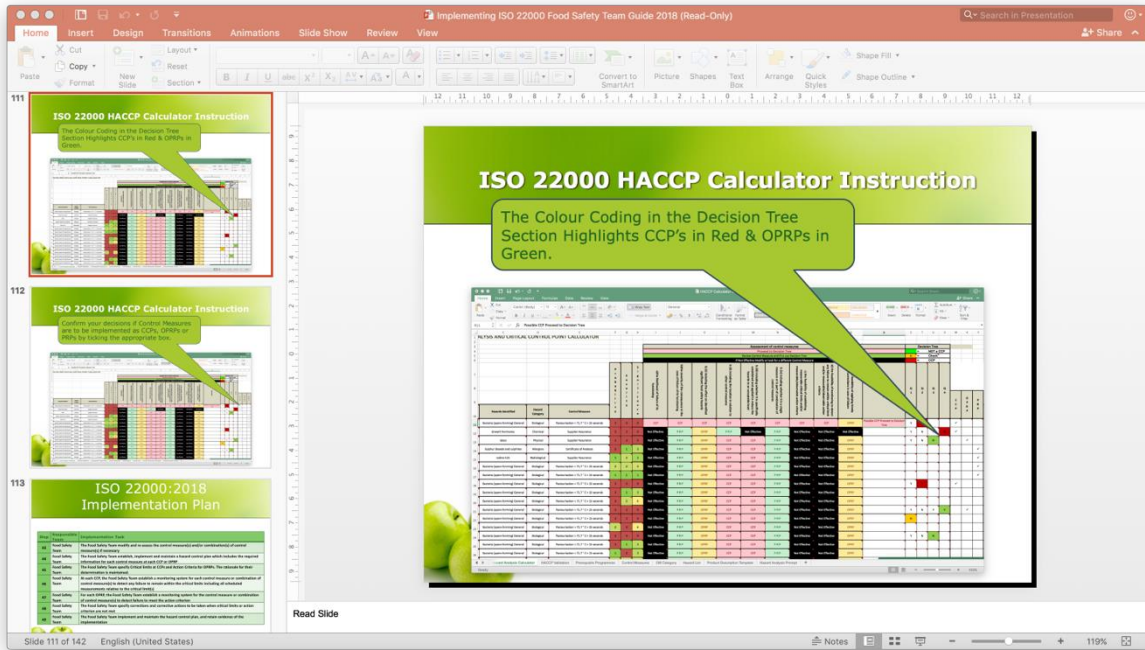

Then the Food Safety Team assesses the severity of the hazard and enters:

- 1 for Not Severe
- 2 for Could possibly cause illness
- 3 for Severe (Could be fatal)

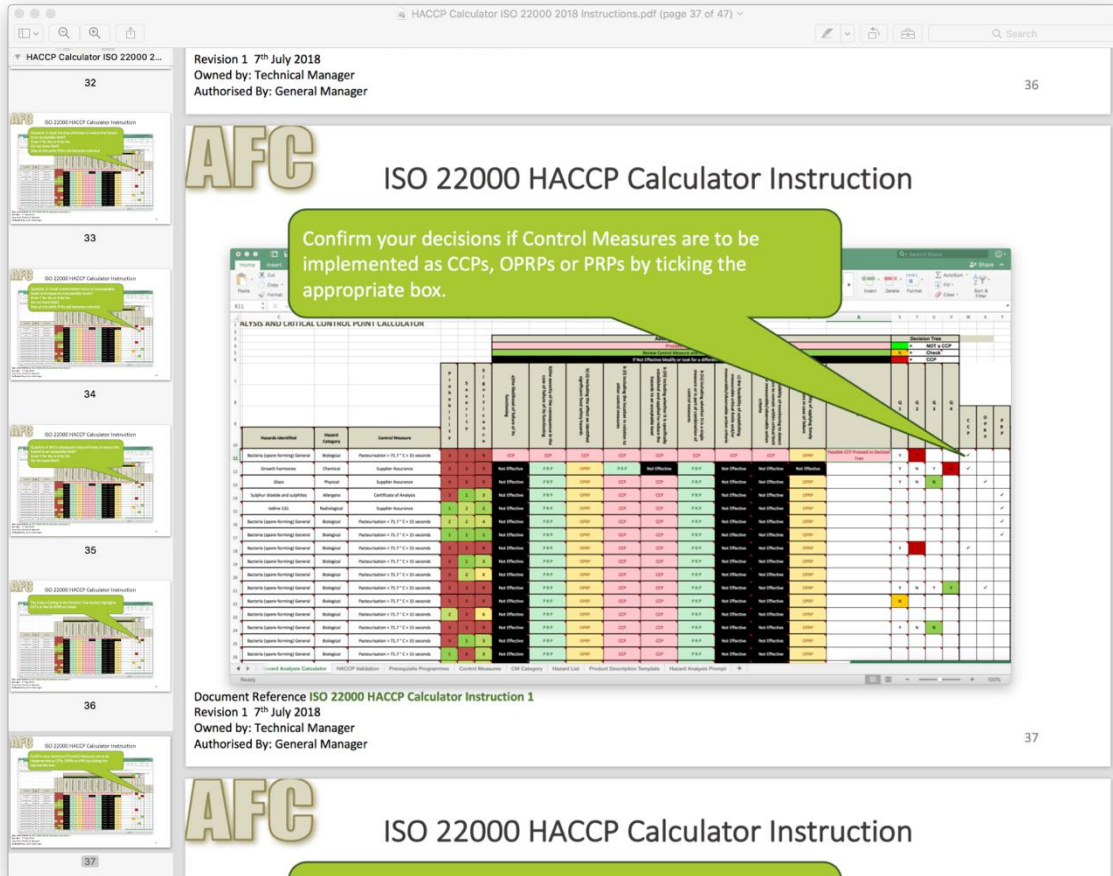

International Food Safety & Quality Network

FSSC 22000 S&D Food Safety Management System Implementation Workbook

There is also guidance in Implementing ISO 22000 Food Safety Team Guide 2018

There is also guidance in HACCP Calculator ISO 22000 2018 Instructions

FSSC 22000 S&D Food Safety Management System Implementation Workbook

There is guidance in Implementing ISO 22000 Food Safety Team Guide 2018, HACCP Calculator ISO 22000 2018 Instructions and HACCP Training Guide ISO 22000 Module 2018.

At the same time as HACCP Implementation the Management Team will also need to be editing and implementing procedures:

8 Operation

FSMS 8.1 Operational planning and control

FSMS 8.3 Traceability system

36 What's Not Good
Hose pipes should have a risk and be moved off the floor
Score of 1 for this
Auditor's Name: Andy Supervisor
Auditee's Name: Andy Auditor

37 Audit Form
Equipment Area in the 3rd section.
A score is entered for the hygiene condition of the tools listed.
There is a column for further comments if you wish.

38 Audit Form
At all times auditors need to consider:
- Are items in good condition?
- Are items clean?
- Do they represent a risk to food safety?
- Are there loose items that could fall into product?

39 Review Audit Findings
After the audit arrange a review meeting with the Department Manager and Auditee.
Present your positive findings, observations and non-conformances.
Agree corrective actions and timescales.

40 Audit Reporting
Present your completed Audit Form.

International Food Safety & Quality Network

Completing the Audit Form

The bottom part is a table to summarize the agreed corrective actions. They are to be followed up and signed off when completed.

HRH CAR Number	Details	Person Responsible for Action	Target Completion Date	Completed Date	Signed Off By
001	Floor needs resealing urgently - Major NC Listeria risk in environment	Andy Supervisor	29/2/20	29/2/20	Andy Auditor
002	Waste accumulation at exit - Minor NC Increase removal schedule	Andy Supervisor	29/2/20	29/2/20	Andy Auditor
003	Loose nuts left on spray coder - Major NC Foreign Body risk to Product	Andy Supervisor	29/2/20	29/2/20	Andy Auditor
004	Hose pipes left on floor - Major NC Hose reels required Listeria risk of Product Contamination	Andy Supervisor	29/2/20	29/2/20	Andy Auditor

Internal Audit Checklists

There is a checklist for each section of the ISO 22000 standard plus sample verification records for prerequisite programmes.

ISO 22000:2018 Audit Checklist

ISO 22000 Food Safety Management System Requirements Internal Audit	
ISO 22000 Clause	Audit Findings
8 Operation	
8.1 Operational planning and control	
Does the organization plan, implement, control, maintain and update the processes needed to meet requirements for the realization of safe products, and to implement the actions determined in 6.1, by:	
- establishing criteria for the processes?	
- implementing control of the processes in accordance with the criteria?	
- keeping documented information to the extent necessary to have the confidence to demonstrate that the processes have been carried out as planned?	
Does the organization control planned changes and review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary?	
Does the organization ensure that outsourced processes are controlled (see 7.1.6)?	
8.2 Prerequisite programmes (PRPs)	
8.2.1 Has the organization established, implemented, maintained and updated PRP(s) to facilitate the prevention and/or reduction of contaminants (including food safety hazards) in the products, product processing and work environment.?	
8.2.2 Are the PRP(s):	
- appropriate to the organization and its context with regard to food safety?	
- appropriate to the size and type of the operation and the nature of the products being manufactured and/or handled?	
- implemented across the entire production system, either as programmes applicable in general or as programmes applicable to a

Date of Audit: 1st May 2018 Time of Audit: 14:00Hrs

Procedure Document or Area Audited: Warehouse (All activities and procedures)

Manual: Food Safety	Document Number: PRP 012	Title: Storage and Transport	Issue Number: 1
---------------------	--------------------------	------------------------------	-----------------

Non-Conformances Found (To Be Completed by Auditor)

Non-Conformance Notification 0001 raised (Minor) - There was no spacing between pallets for inspection. Packaging in storage was not wrapped for protection.

Non-Conformance Notification 0002 raised (Major) - Goods transferred to the factory were not covered. Where possible they should be on plastic pallets. Goods were found on the floor.

Non-Conformance Notification 0003 raised (Minor) - The Quarantine Area was not separate from other storage and it was not maintained in a clean and tidy condition.

Non-Conformance Notification 0004 raised (Minor) - Cold store door does not have strip curtains and was left open.

Non-Conformance Notification 0005 raised (Major) - Ingredient storage was not controlled & segregation in place to prevent cross-contamination.

Non-Conformance Notification 0006 raised (Major) - Each member of staff should have a training record, especially staff who are carrying out critical product checks.

Action to Be Taken (To Be Agreed Between Auditor and Auditee with Timescales)

Non-Conformance Notification 0001 - All staff to be briefed. Spacing is required in between pallets for inspection. Packaging in storage should be wrapped for protection To be completed by 25th May 2018

Non-Conformance Notification 0002 (Major) - All staff to be briefed. Goods transferred to the factory should be covered. Where possible they should be on plastic pallets. They should **never** be on the floor. To be completed by 8th May 2018

Step Eight: Review and Updating

Top Management and the Management Team follow procedures:

9 Performance evaluation

FSMS 9.1 Monitoring, measurement, analysis and evaluation

FSMS 9.3 Management review

10 Improvement

FSMS 10 Improvement

FSMS 9.1 Monitoring, measurement, analysis and evaluation

Food Safety Management System

9.1 Monitoring, measurement, analysis and evaluation

Measuring and Monitoring

The company has identified and implemented the monitoring, measurement, and analytical processes required to maintain the food safety management system.

Measurement and Monitoring Procedures have been established, documented and implemented to meet Hazard Control Plan and PRP requirements.

Hazard Control Plan and PRP requirements are defined in the HACCP Manual and individual PRP procedures. The establishment of Hazard Control Plan control measures, monitoring procedures, critical control points, control limits, OPRPs, action criteria, corrections and corrective actions are documented in Hazard Control Plans and the HACCP Manual.

Quality requirements for measurement and monitoring have been designed using a similar approach to hazard analysis in identifying the monitoring, measurement, and analytical processes required to maintain product conformity to requirements. All the monitoring, measurement, and analytical processes required have been planned by following the process below which identifies the specific processes at each stage of manufacturing:

- Stage 1 A flow diagram is prepared of the steps in the process.
An analysis is conducted by identifying control options
- Stage 2 The Control Points in the process are identified
- Stage 3 Monitoring, measurement and analytical limits which must be met to ensure control are established
- Stage 4 Measurement, monitoring and analysis procedures are established and scheduled for each stage.
- Stage 5 The corrective action to be taken when limits are exceeded are established.
- Stage 6 All procedures and records appropriate to the monitoring, measurement and analysis processes including acceptable limits at each stage are documented and implemented in a Product Control Plan. Methodology and Standard tests are specified in the Industry Code of Practice.
- Stage 7 Verification that the monitoring, measurement and analysis processes are working effectively is carried out.

This system considers each stage of the process from ingredient intake to product despatch. Releases of ingredients, in-process and finished product are controlled and documented by authorised personnel.

Stage 9 Final Steps to FSSC 22000 Certification

There are a few final steps to achieving FSSC 22000 Certification:

- ✓ Carry out an assessment of your system to make sure that it meets the requirements of the ISO 22000 standard using our ISO 22000 Checklists. Using our comprehensive FSSC 22000 Requirements Checklists assess your Food Safety Management System to ensure that you are satisfied that it meets the requirements of the standard
- ✓ Ensure any areas requiring corrective action are addressed
- ✓ Choose your Certification Body
- ✓ Make contact with the Certification Body
- ✓ Pre-assessment
- ✓ Formal assessment
- ✓ Certification
- ✓ Celebrate!
- ✓ Communicate your success!

FSSC 22000 S&D Food Safety Management System Implementation

Workbook

Choose your Certification Body

Before you can begin preparing for your application, you'll need to decide which Certification Body to use. Do some research and pick one which has a good reputation, after all you will have their logo on your certificate!

Make contact with the Certification Body

Contact the Certification Body and tell them what you need. They should provide you with a proposal detailing the cost and time involved in a formal assessment.

Pre-assessment

Arrange a pre-assessment of your Food Safety Management System with the Certification Body.

Formal Assessment

Arrange your formal assessment which will be conducted on site.

Certification

Once the assessment has been successfully completed the Certification Body will issue a certificate of registration for your Food Safety Management System.

The certificate is normally valid for three years, subject to satisfactory surveillance visits during this period.

[Click here to order our FSSC 22000 Packaging Food Safety Management System Certification Package](#)
