

This workbook is provided to assist in the implementation of your IFSQN SQF Code Edition 9 & FSMA Implementation Package.

The workbook is divided into 8 steps that are designed to assist you in implementing your food safety management system effectively:

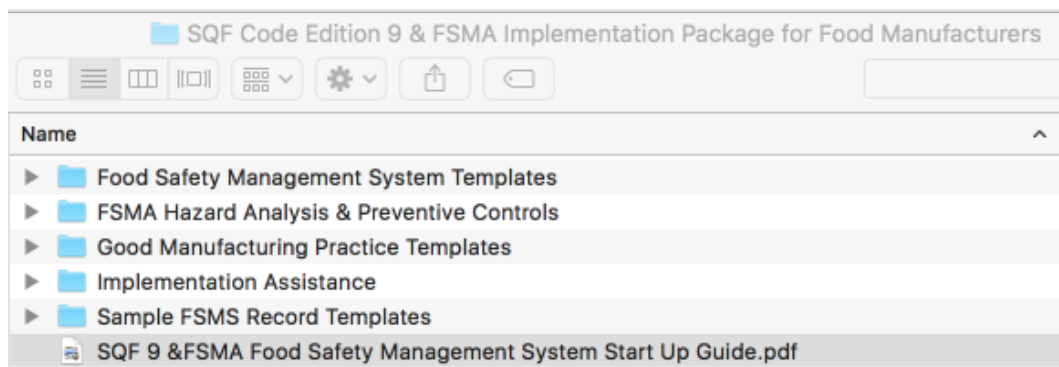

- ✓ Step One: Introducing the SQF Food Safety System
- ✓ Step Two: Senior Management Implementation
- ✓ Step Three: Food Safety Management Implementation
- ✓ Step Four: Good Manufacturing Practices Implementation
- ✓ Step Five: Project Planning
- ✓ Step Six: HACCP Implementation
- ✓ Step Seven: Training
- ✓ Step Eight: Final Steps to SQF Certification

Note: The IFSQN SQF Code Edition 9 & FSMA Implementation Package includes a Start Up Guide which should be consulted to guide you through the contents of the package.

As a preliminary to Step 1 we recommend that the you obtain a copy of the [SQF Food Safety Code: Food Manufacturing Edition 9](#) and the [Guidance for the Implementation of the Preventive Controls for Human Food Rule for SQF Certified Sites](#) from the SQFI website

(They are free to download)

When you download the package, you will find the Start-Up Guide and 5 folders containing the package contents:

## **Step One: Introduction to SQF Food Safety Management System**

Training Presentations for Module 2: SQF System Elements for Food Manufacturing and Module 11: Good Manufacturing Practices for Processing of Food Products are provided. The presentations will introduce the SQF Food Safety Management System Package to the management team and explain how the Food Safety Management System Tools & Templates match and comply with the SQF modules.

## **Step Two: Senior Management Implementation**

A Senior Management Implementation checklist is provided that establishes your Food Safety Management System fundamentals including Food Safety Policies and Objectives.

The checklist guides Senior Management:

- ✓ in planning the establishment of the FSMS
- ✓ in providing adequate support to establish the FSMS
- ✓ in ensuring there is adequate infrastructure and work environment
- ✓ in allocating responsibility and authority

This stage requires the Senior Management to meet and establish the foundations for the Food Safety Management System:

- ✓ Formulating a checklist of Customer, Regulatory, Statutory and other relevant Food Safety requirements
- ✓ Decide which Food Safety requirements the company should address and develop relevant policies.
- ✓ Based on the Food Safety Policy Management Policies establish Food Safety Objectives
- ✓ Define the scope and boundaries of the FSMS
- ✓ Plan the establishment of the FSMS using the project planner
- ✓ Provide adequate support to establish the FSMS
- ✓ Ensure there is adequate infrastructure and work environment
- ✓ Allocate responsibility and authority
- ✓ Assess, plan and establish appropriate internal and external communication (including the food chain) channels
- ✓ Plan to establish a food safety culture

A meeting should now be coordinated involving all the Senior Management Team.

## Senior Management FSMS Implementation Meeting

Date

Time

Venue

Agenda

1. Formulating a checklist of Customer, Regulatory, Statutory and other relevant Food Safety requirements
2. Decide which Food Safety requirements the company should address and develop relevant policies.
3. Based on the Food Safety Policy Management Policies establish Food Safety Objectives
4. Define the scope and boundaries of the FSMS
5. Plan the establishment of the FSMS using the project planner
6. Provide adequate support to establish the FSMS
7. Ensure there is adequate infrastructure and work environment
8. Allocate responsibility and authority
9. Assess, plan and establish appropriate internal and external communication (including the food chain) channels
10. Plan to establish a food safety culture

Attendees:

Senior Management Team		
Job Title	Name	Role in Team
Managing Director		Chairman
Operations Manager		Operations Reporting
Quality Manager		Food Safety Reporting
Planning Manager		Planning and Capacity Reporting
Distribution Manager		Distribution Reporting
Maintenance Manager		Services and Engineering Provision
Finance Manager		Financial Reporting
Human Resources Manager		Resource reporting

## Senior Management FSMS Implementation Checklist

The Senior Management FSMS Implementation Meeting should follow the guidelines of the Senior Management Implementation Checklist:

Action (i)	Senior management formulate a checklist of Customer, Regulatory, Statutory and other relevant Food Safety requirements	
	Customer/Regulatory/Statutory/Other	Record Details
	XYZ Customer Requires this	
	SQF Code Edition 9 2020	
	Food Regulations	
	FSMA Preventive Controls Rule for Human Food	
Action (ii)	Senior Management decides which Food Safety requirements the company should address and develop relevant policies.	
	Requirement	Policy Details

At a later stage, Senior Management will be required to carry out a management review		
After implementation and verification Senior Management take action to continually improve the FSMS		

The outputs from this meeting will be:

- ✓ Food Safety Policy
- ✓ Food Safety Objectives
- ✓ Defined Scope
- ✓ A Developed Project Planner
- ✓ Support Plan for Implementation/Training
- ✓ Plans for Infrastructure/Work Environment
- ✓ Allocation of Responsibility/Authority including the appointment of an SQF Practitioner
- ✓ Defined Communication Channels
- ✓ An Action Plan to lead and support a food safety culture within the site

Senior Management can choose/adapt the templates supplied with the system to assist in documenting policies and objectives:

## Food Safety Policy and Objectives

### Senior Management Define the Scope of the Food Safety Management System:

The scope of the Quality Management System includes all product categories, processes and activities conducted on site. These requirements are aligned with the policies and objectives of the site and include those of the SQF Food Safety Code for Manufacturing Edition 8.

The scope of the Food Safety Management System includes all customer, statutory and regulatory documents applicable to the business:

- Food Regulations
- National/International Standards
- Customer Codes of Practice
- [FSMA Final Rule for Preventive Controls for Animal Food](#)

The company has a system in place through the Industry Federation to ensure that it is kept informed of all relevant legislation, food safety issues, legislative scientific and technical developments and Industry Codes of Practice applicable in the country of production and, where known, the country where the product will be sold. This information is used for reference and Hazard Analysis.

Where products or services are outsourced the organization assumes full control of this process.

## Senior Management Establish the Project Plan

Using the Excel Project Planner Senior Management adapt the template supplied with the system to establish a Project Plan.

### Senior Management provide adequate support to establish the FSMS

Senior management establish and provide adequate support to establish the FSMS including the resource required to complete the implementation plan, establish, implement and maintain the Food Safety Management System, conduct Internal Audits and Monitor & Measure.

Action (vi)	Senior management provide adequate support to establish the FSMS	
	Resource requirement	Details
	Food Safety Team Leader/SQF Practitioner/PCQI	
	Food Safety Team	
	FSMS Steering Group	
	Trainers	
	Internal Auditors	

- Presenting FSMS information for senior management review so that actions for improvement can be determined.
- Ensuring that the Food Safety team are fully qualified and trained to meet the company requirements.
- Ensure the development of the Food Safety Fundamentals and the Food Safety Plan.
- Promotion of the awareness of customer requirements throughout the company.
- External communication and liaison regarding the management systems.

*Remember the SQF Practitioner is verified by the SQF Auditor at each Audit to ensure:*

- ✓ *They are employed by the Supplier as a permanent full time employee and hold a position of responsibility in managing of the Food Safety Management System*
- ✓ *Have completed a HACCP Training Course and be experienced and competent to implement and maintain HACCP Plans*
- ✓ *Have an understanding of the SQF Food Safety Code for Manufacturing Edition 9 (Completion of the “Implementing SQF Systems Training Course Exam” would meet this requirement)*

*The SQF Practitioner is also likely to be the PCQI: Preventive controls qualified individual means a qualified individual who has successfully completed training in the development and application of risk-based preventive controls at least equivalent to that received under a standardized curriculum recognized as adequate by FDA or is otherwise qualified through job experience to develop and apply a food safety system.*

## Key Personnel and Nominated Deputies

Job Title	Job Holder	Nominated Deputy
Emergency Response Coordinator		
Food Safety Team Leader		
General Manager		
Operations Manager		
Production Manager		
Warehouse Manager		
Maintenance Manager		
Factory Safety Manager		
Human Resource Manager		
Quality Manager		
Production Supervisor		
Packing Manager		
Quality Manager		
Planning Manager		
Goods Receipt Manager		
Design and Development Manager		
Planning Manager		
Customer Service Manager		
Laboratory Manager		
Distribution Manager		
Project Manager		

## Senior Management Establish Food Safety Management System Steering Group

Food Safety Management System Steering Group			
FSMS Team Member	Name	Position	Qualification
FSMS Team Leader			
FSMS Assistant Leader			
FSMS Team Members			

## Senior Management Establish a Food Safety Team

Food Safety and Quality Audit Team			
FSMS Audit Team	Name	Position	Qualification

## Senior Management Establish a Product Recall/Crisis Management Team

Crisis Management/Product Recall Team			
Crisis	Name	Crisis Coordinator	Contact Details
Fire or Site evacuation		Health and Safety Manager	
Utility Supply failure		Maintenance Manager	
IT systems failure		Operations Manager	
Water Supply Contamination		Quality Manager	
Breaches of security		Managing Director	
Distribution Failure		Distribution Manager	
Extortion or Sabotage		General Manager	
Product quality or safety		Quality Manager	

## Senior Management Establish Food Safety Responsibility & Authority Levels

Process	Responsible Persons	Activity

- Management Changes and changes in levels of responsibility and authority

The following additional key information should be communicated promptly to the food safety team so that they can ensure the information is included in updating the food safety management system where appropriate:

- Results of Inspections by Regulatory Authorities and any changes in regulatory requirements
- New information regarding Food Safety Hazards and Control Measures
- Food Safety Issues and Health Hazards associated with the product
- Anything else considered likely to have an impact on food safety

By communicating effectively with all employees all employees will be able to contribute to the effectiveness of the Food Safety Quality Management System.

Senior management assess plan and establish appropriate internal and external communication (including the food chain) channels		
Communication required	Details	Responsibility

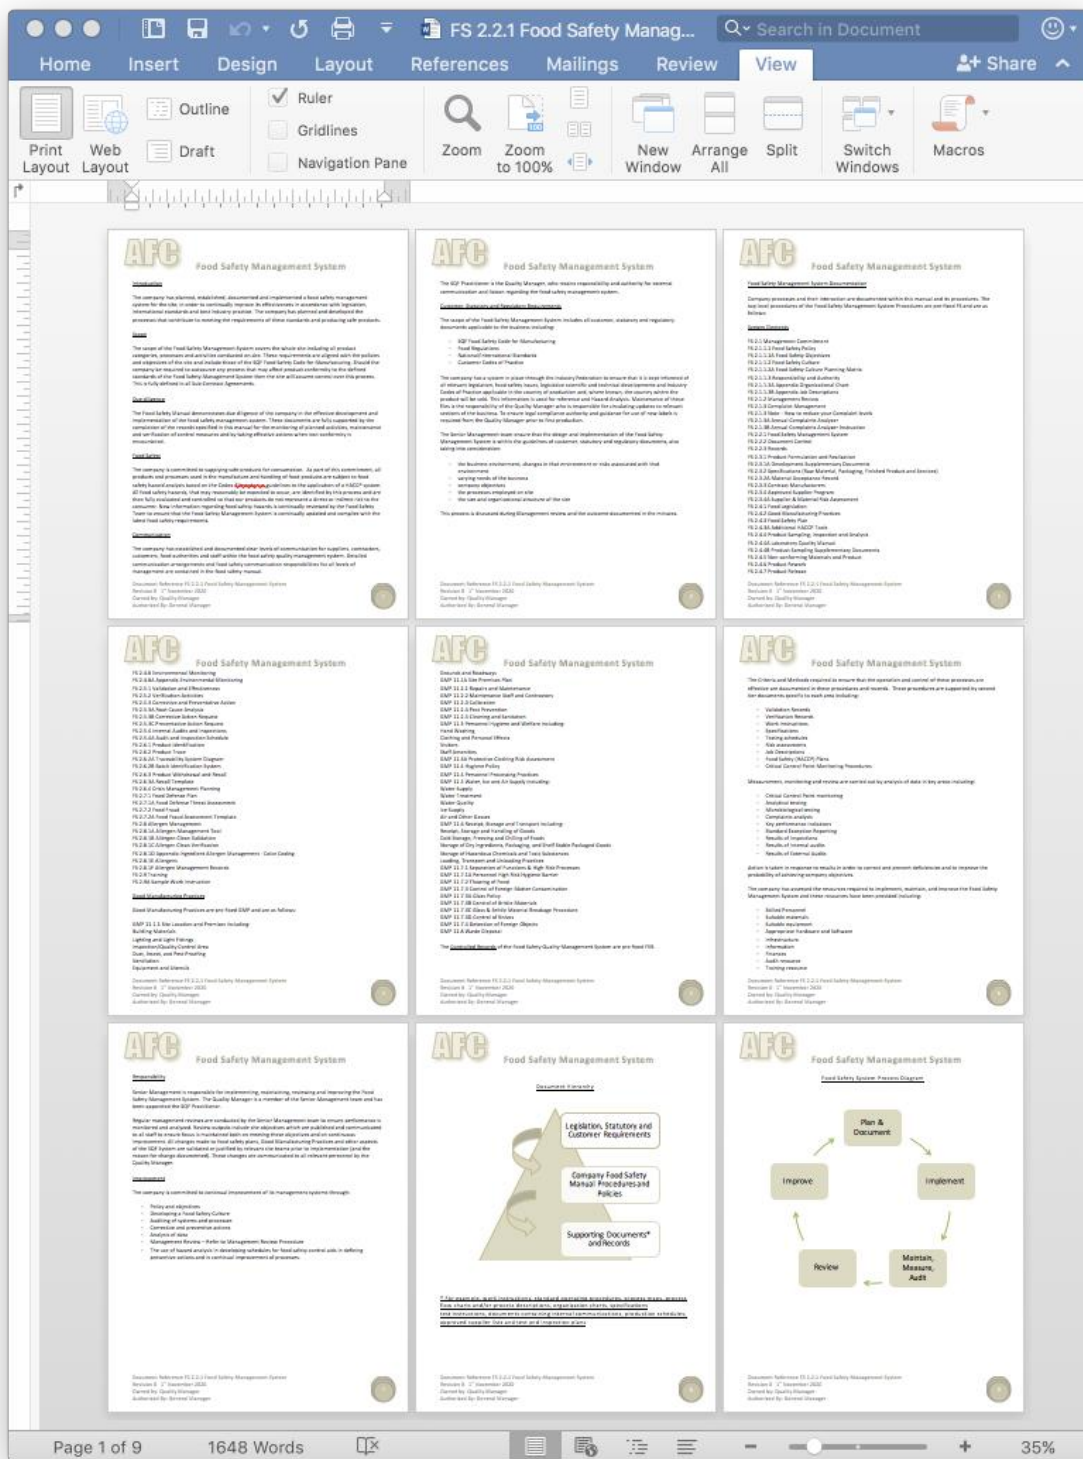

## **Step Three: Food Safety Management System**

The SQF Food Safety Management System Package contains a comprehensive top level Food Safety Management procedures templates that form the foundations of your Food Safety Management System so you don't have to spend 1,000's of hours writing compliant procedures:

### Food Safety Management System Elements Procedures

- FS 2.1 Management Commitment
  - FS 2.1.1.1 Food Safety Policy
    - FS 2.1.1.1A Food Safety Objectives
    - FS 2.1.1.2 Food Safety Culture
      - FS 2.1.1.2A Food Safety Culture Planning Matrix
    - FS 2.1.1.3 Responsibility and Authority
      - FS 2.1.1.3A Appendix Organizational Chart
      - FS 2.1.1.3B Appendix Job Descriptions
  - FS 2.1.2 Management Review
  - FS 2.1.3 Complaint Management
    - FS 2.1.3 Note - How to reduce your Complaint levels
    - FS 2.1.3A Annual Complaints Analyzer
    - FS 2.1.3B Annual Complaints Analyzer Instruction
- FS 2.2.1 Food Safety Management System
- FS 2.2.2 Document Control
- FS 2.2.3 Records
- FS 2.3.1 Product Formulation and Realization
  - FS 2.3.1A Development Supplementary Documents
  - FS 2.3.2 Specifications
    - FS 2.3.2A Material Acceptance Record
  - FS 2.3.3 Contract Manufacturers
  - FS 2.3.4 Approved Supplier Program
    - FS 2.3.4A Supplier & Material Risk Assessment
- FS 2.4.1 Food Legislation
- FS 2.4.2 Good Manufacturing Practices
- FS 2.4.3 Food Safety Plan
  - FS 2.4.3A Additional HACCP Tools
- FS 2.4.4 Product Sampling, Inspection and Analysis
  - FS 2.4.4A Laboratory Quality Manual
  - FS 2.4.4B Product Sampling Supplementary Documents
- FS 2.4.5 Non-conforming Materials and Product
- FS 2.4.6 Product Rework
- FS 2.4.7 Product Release

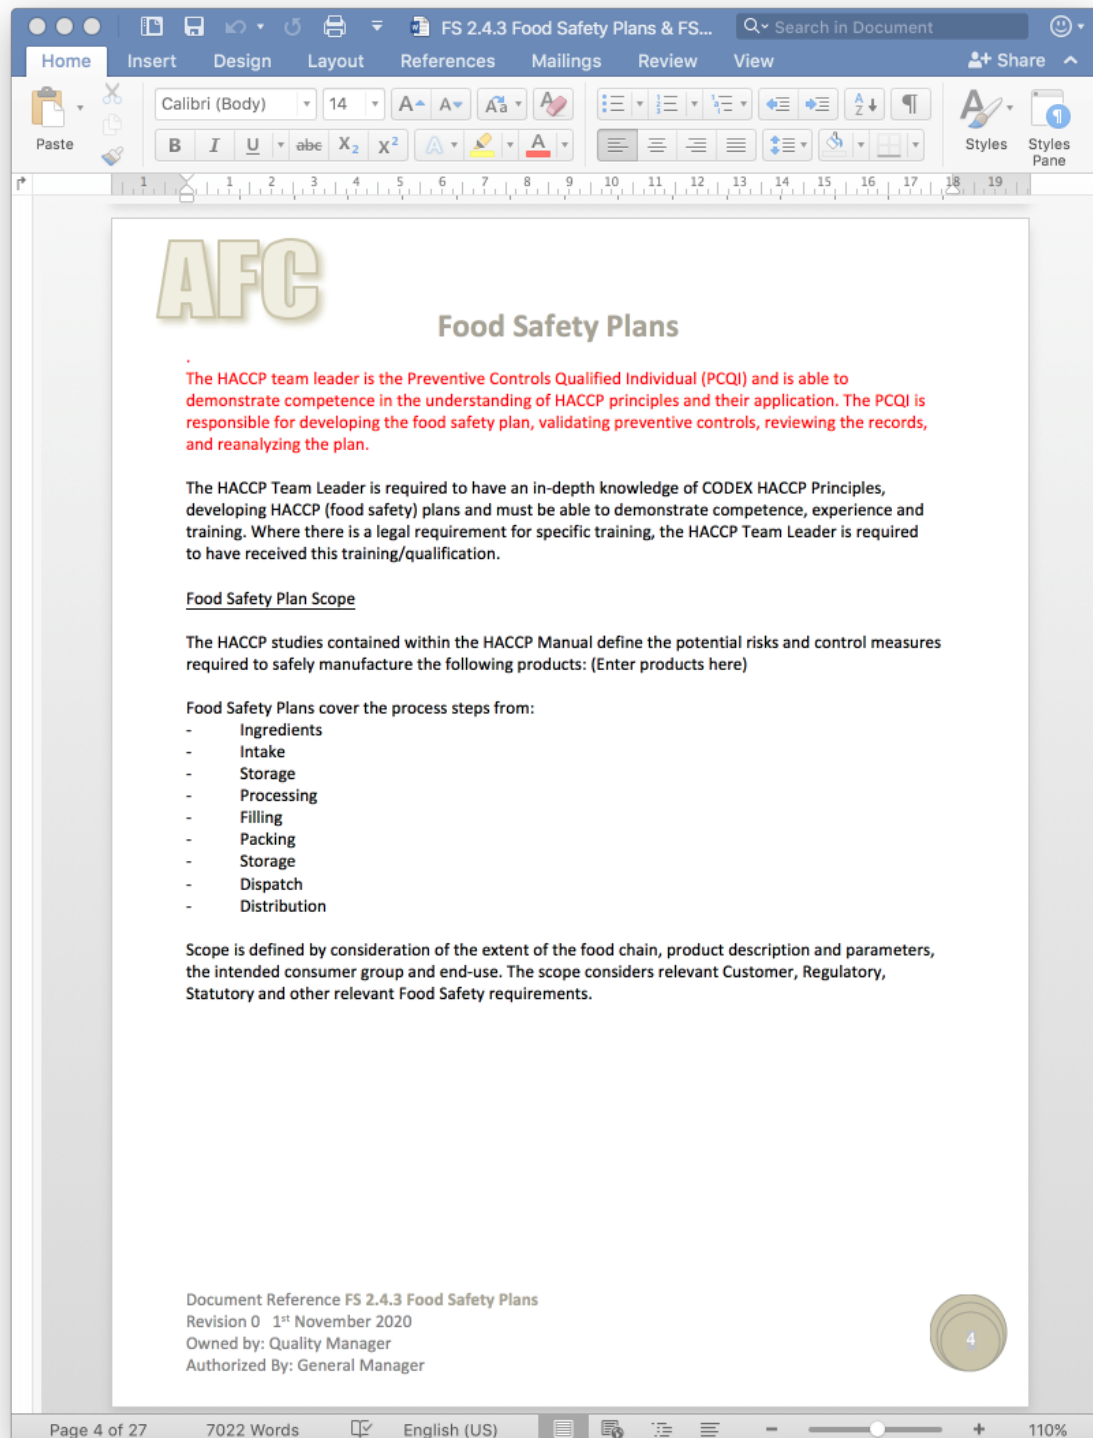

# SQF & FSMA Food Safety Management System Implementation Workbook

The documents are provided in Microsoft Word English (US) format and are easily edited to suit your organization.

Note: When there are additional FSMA requirements to the SQF Code based on SQFI Guidance for the Implementation of the Preventive Controls for Human Food Rule for SQF Certified Sites these requirements are identified in red text:

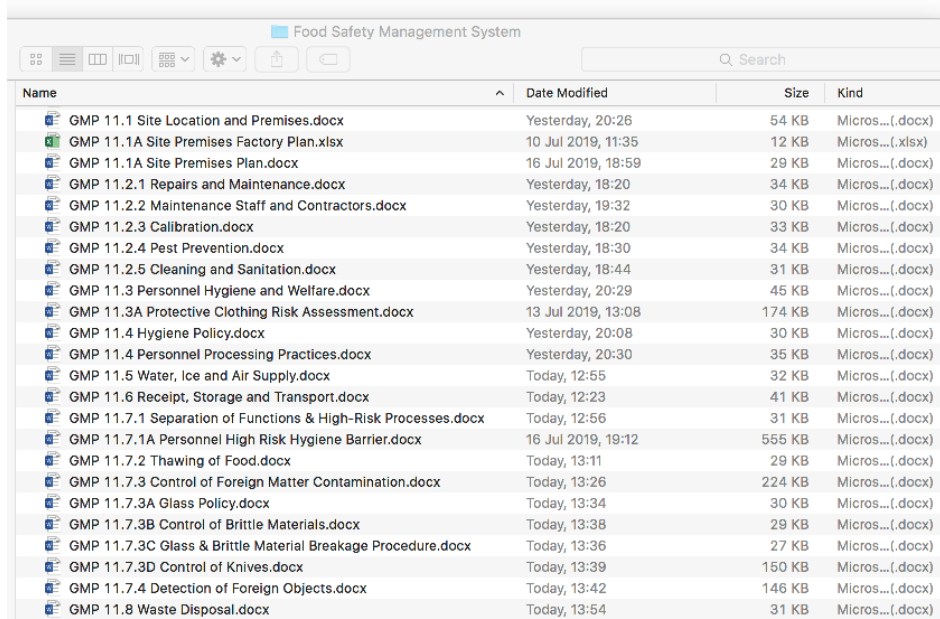

## Food Safety Management System Record Templates

A comprehensive range of easy to use food safety record templates:

FSMS Record Templates

## Step Four: Good Manufacturing Practices Implementation

The SQF Food Safety Management System Package contains a comprehensive Good Manufacturing Practice procedural templates that form the foundations of your Food Safety Management System so you don't have to spend 1,000's of hours writing compliant procedures:

Name	Date Modified	Size	Kind
GMP 11.1 Site Location and Premises.docx	Yesterday, 20:26	54 KB	Micros...(docx)
GMP 11.1A Site Premises Factory Plan.xlsx	10 Jul 2019, 11:35	12 KB	Micros...(xlsx)
GMP 11.1A Site Premises Plan.docx	16 Jul 2019, 18:59	29 KB	Micros...(docx)
GMP 11.2.1 Repairs and Maintenance.docx	Yesterday, 18:20	34 KB	Micros...(docx)
GMP 11.2.2 Maintenance Staff and Contractors.docx	Yesterday, 19:32	30 KB	Micros...(docx)
GMP 11.2.3 Calibration.docx	Yesterday, 18:20	33 KB	Micros...(docx)
GMP 11.2.4 Pest Prevention.docx	Yesterday, 18:30	34 KB	Micros...(docx)
GMP 11.2.5 Cleaning and Sanitation.docx	Yesterday, 18:44	31 KB	Micros...(docx)
GMP 11.3 Personnel Hygiene and Welfare.docx	Yesterday, 20:29	45 KB	Micros...(docx)
GMP 11.3A Protective Clothing Risk Assessment.docx	13 Jul 2019, 13:08	174 KB	Micros...(docx)
GMP 11.4 Hygiene Policy.docx	Yesterday, 20:08	30 KB	Micros...(docx)
GMP 11.4 Personnel Processing Practices.docx	Yesterday, 20:30	35 KB	Micros...(docx)
GMP 11.5 Water, Ice and Air Supply.docx	Today, 12:55	32 KB	Micros...(docx)
GMP 11.6 Receipt, Storage and Transport.docx	Today, 12:23	41 KB	Micros...(docx)
GMP 11.7.1 Separation of Functions & High-Risk Processes.docx	Today, 12:56	31 KB	Micros...(docx)
GMP 11.7.1A Personnel High Risk Hygiene Barrier.docx	16 Jul 2019, 19:12	555 KB	Micros...(docx)
GMP 11.7.2 Thawing of Food.docx	Today, 13:11	29 KB	Micros...(docx)
GMP 11.7.3 Control of Foreign Matter Contamination.docx	Today, 13:26	224 KB	Micros...(docx)
GMP 11.7.3A Glass Policy.docx	Today, 13:34	30 KB	Micros...(docx)
GMP 11.7.3B Control of Brittle Materials.docx	Today, 13:38	29 KB	Micros...(docx)
GMP 11.7.3C Glass & Brittle Material Breakage Procedure.docx	Today, 13:36	27 KB	Micros...(docx)
GMP 11.7.3D Control of Knives.docx	Today, 13:39	150 KB	Micros...(docx)
GMP 11.7.4 Detection of Foreign Objects.docx	Today, 13:42	146 KB	Micros...(docx)
GMP 11.8 Waste Disposal.docx	Today, 13:54	31 KB	Micros...(docx)

The documents are provided in Microsoft Word English (US) format and are easily edited to suit your organization.

## **Step Five: Project SQF Implementation**

The package contains project tools to assist in achieving SQF certification. In this part of the package you will need to:

- ✓ Make sure that the Steering Group are established and briefed
- ✓ Make sure that the Steering Group take control of the Project Plan established by Senior Management

Food Safety Management System Steering Group			
FSMS Team Member	Name	Position	Qualification
FSMS Team Leader			
FSMS Assistant Leader			
FSMS Team Members			

# SQF & FSMA Food Safety Management System Implementation Workbook

## Project Plan

The Steering Group use the Excel Project Plan developed by Senior Management as a step by step guide to implementing the Food Safety Management System.

## SQF & FSMA Food Safety Management System Implementation Workbook

Project Planning Tasks		Responsibility	Comments	Due Date for Completion	Date Completed
1)	Senior management demonstrate a commitment to food safety	Senior Management Team	Completed in Step 2		
2)	Senior management issue a food safety policy and objectives	Senior Management Team	Completed in Step 2		
3)	Senior management plan to establish a food safety culture	Senior Management Team	Completed in Step 2		
4)	Senior management define the scope and boundaries of the FSMS	Senior Management Team	Completed in Step 2		
5)	Senior management plan the establishment of the FSMS.	Senior Management Team	Completed in Step 2		
6)	Senior management provide adequate support to establish the FSMS.	Senior Management Team	Completed in Step 2		
7)	Senior management ensure there is adequate infrastructure and work environment.	Senior Management Team	Completed in Step 2		
8)	Senior management appoint a food safety team leader/SQF Practitioner	Senior Management Team	Completed in Step 2		
9)	Senior management appoint the food safety team.	Senior Management Team	Completed in Step 2		
10)	FSMS responsibilities and authorities are documented and communicated	Senior Management Team	Completed in Step 2		
11)	Food safety communication systems are put in place	Senior Management Team	Completed in Step 2		

## SQF & FSMA Food Safety Management System Implementation Workbook

	described		Implementation Guide		
20)	The characteristics of end products are described and documented		Step Six: HACCP Implementation Guide		
21)	The intended use of the end product is described including vulnerable groups		Step Six: HACCP Implementation Guide		
22)	Flow diagrams are prepared for all products and processes including all the steps in the process		Step Six: HACCP Implementation Guide		
23)	Food safety control measures are identified		Step Six: HACCP Implementation Guide		
24)	The food safety team perform a food safety hazard analysis		Step Six: HACCP Implementation Guide		
25)	The food safety team identify and document food safety hazards		Step Six: HACCP Implementation Guide		
<p>**** FSMA Preventive Controls for Human Food Rule requires §117.126 Food safety plans and §117.135 Preventive controls: (a) (1) You must identify and implement preventive controls to provide assurances that <u>any hazards</u> requiring a preventive control will be significantly minimized or prevented ... Your team will need to also follow guidelines in the FSMA Hazard Analysis &amp; Preventive Controls Folder and document Preventive Controls and CCPs in a Food Safety Plan.</p>					
26)	The food safety team specify acceptable levels for each hazard		Step Six: HACCP Implementation Guide		

## \*\*\*\* Subpart C—Hazard Analysis and Risk-Based Preventive Controls

### §117.126 Food safety plan.

#### (a) Requirement for a food safety plan.

(1) You must prepare, or have prepared, and implement a written food safety plan.

(2) The food safety plan must be prepared, or its preparation overseen, by one or more preventive controls qualified individuals.

#### (b) Contents of a food safety plan. The written food safety plan must include:

(1) The written hazard analysis as required by §117.130(a)(2);

(2) The written preventive controls as required by §117.135(b);

(3) The written supply-chain program as required by subpart G of this part;

(4) The written recall plan as required by §117.139(a); and

(5) The written procedures for monitoring the implementation of the preventive controls as required by §117.145(a)(1);

(6) The written corrective action procedures as required by §117.150(a)(1); and

(7) The written verification procedures as required by §117.165(b).

(c) Records. The food safety plan required by this section is a record that is subject to the requirements of subpart F of this part.

### §117.135 Preventive controls.

#### (a)

(1) You must identify and implement preventive controls to provide assurances that any hazards requiring a preventive control will be significantly minimized or prevented and the food manufactured, processed, packed, or held by your facility will not be adulterated under section 402 of the Federal Food, Drug, and Cosmetic Act or misbranded under section 403(w) of the Federal Food, Drug, and Cosmetic Act.

(2) Preventive controls required by paragraph (a)(1) of this section include:

(i) Controls at critical control points (CCPs), if there are any CCPs; and

(ii) Controls, other than those at CCPs, that are also appropriate for food safety.

#### (b) Preventive controls must be written.

(c) Preventive controls include, as appropriate to the facility and the food:

##### (1) Process controls.

Process controls include procedures, practices, and processes to ensure the control of parameters during operations such as heat processing, acidifying, irradiating, and refrigerating foods. Process controls must include, as appropriate to the nature of the applicable control and its role in the facility's food safety system:

(i) Parameters associated with the control of the hazard; and

(ii) The maximum or minimum value, or combination of values, to which any biological, chemical, or physical parameter must be controlled to significantly minimize or prevent a hazard requiring a process control.

##### (2) Food allergen controls.

Project Task 18 Management establish, implement and maintain Good Manufacturing Practices to assist in controlling food safety hazards: Use documents from Step Four: Good Manufacturing Practices

GMP 11.1.1 Site Location and Premises including:

Building Materials

Lighting and Light Fittings

Inspection/Quality Control Area

Dust, Insect, and Pest Proofing

Ventilation

Equipment and Utensils

Grounds and Roadways

GMP 11.1A Site Premises Plan

GMP 11.2.1 Repairs and Maintenance

GMP 11.2.2 Maintenance Staff and Contractors

GMP 11.2.3 Calibration

GMP 11.2.4 Pest Prevention

GMP 11.2.5 Cleaning and Sanitation

GMP 11.3 Personnel Hygiene and Welfare including:

Hand Washing, Clothing and Personal Effects, Visitors, Staff Amenities

GMP 11.3A Protective Clothing Risk Assessment

GMP 11.4 Hygiene Policy

GMP 11.4 Personnel Processing Practices

GMP 11.5 Water, Ice and Air Supply including:

Air and Other Gasses

GMP 11.6 Receipt, Storage and Transport including:

Receipt, Storage and Handling of Goods

Cold Storage, Freezing and Chilling of Foods

Storage of Dry Ingredients, Packaging, and Shelf Stable Packaged Goods

Storage of Hazardous Chemicals and Toxic Substances

Loading, Transport and Unloading Practices

GMP 11.7.1 Separation of Functions & High-Risk Processes

GMP 11.7.1A Personnel High Risk Hygiene Barrier

GMP 11.7.2 Thawing of Food

GMP 11.7.3 Control of Foreign Matter Contamination

GMP 11.7.4 Detection of Foreign Objects

GMP 11.8 Waste Disposal

The Steering Group now need to allocate responsibility to implement and maintain these Good Manufacturing Practices.

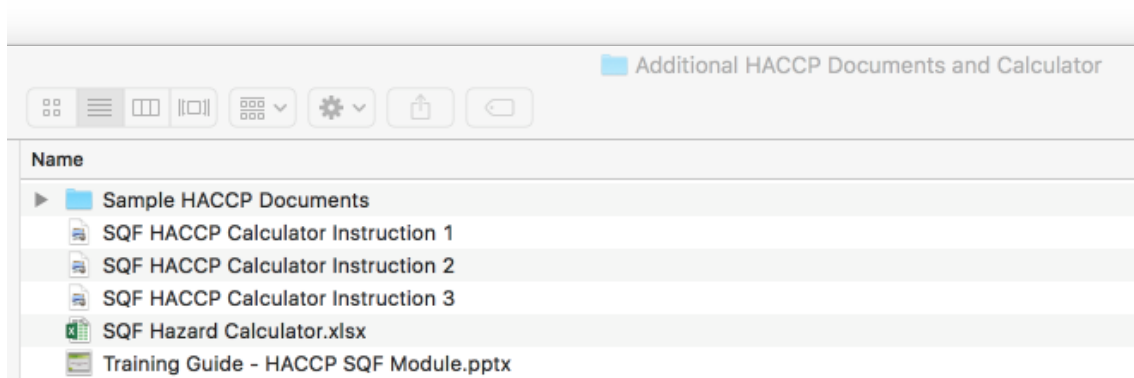

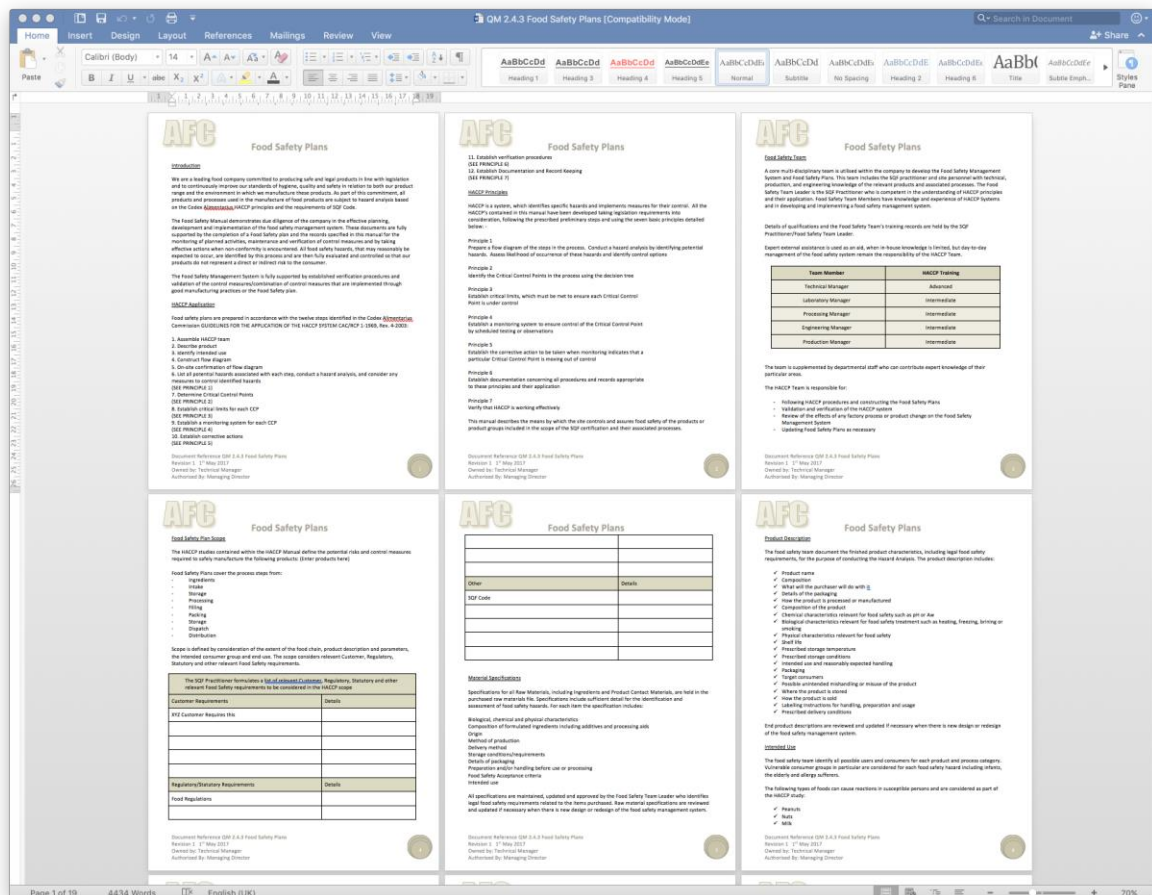

### Project Tasks 19 – 36

Project Tasks 19 – 36 are to be completed by the Food Safety Team. Guidelines for these tasks are included in Step 6 HACCP Implementation Section.

19)	Product characteristics are described
20)	The characteristics of end products are described and documented
21)	The intended use of the end product is described including vulnerable groups
22)	Flow diagrams are prepared for all products and processes including all the steps in the process
23)	Food safety control measures are identified
24)	The food safety team perform a food safety hazard analysis
25)	The food safety team identify and document food safety hazards
26)	The food safety team specify acceptable levels for each hazard
27)	The food safety team assess the food safety hazards
28)	The food safety team select and assess control measures for each food safety hazard
29)	The food safety team prepare the HACCP plan (Food Safety Plan)
30)	The food safety team identify critical control points (CCP)s for each food safety hazard
31)	The food safety team determine the critical limit for each CCP
32)	The food safety team determine and establish monitoring procedures and records for each CCP
33)	The food safety team determine the corrections and corrective actions to be taken when monitoring results exceed critical limits
34)	The management team allocate responsibility and authority for monitoring, recording, corrections and corrective actions
35)	The food safety team document the HACCP plan
36)	The food safety team validate the control measures and combination of control measures

## Step Six: HACCP Implementation Guide

Included in the package are FS 2.4.3 Food Safety Plan and supplementary HACCP documents in the Additional HACCP Tools Folder including the SQF Hazard Assessment & Critical Control Point Tool:

## HACCP Calculator Instruction 2

HAZARD ANALYSIS AND CRITICAL CONTROL POINT CALCULATOR

Taking the Prerequisite Programmes and Control Measure into consideration Rate the Severity of the Hazard  
1 = Not Severe  
3 = Severe

Step Number	Step Name	Hazards Identified	Specific Details about the Hazard	Existing Prerequisite Programmes which assist in controlling the Hazard	Control Measure	Probability	Severity
1	AMF Delivery	Bacteria (spore-forming) General		1. Hygiene and Housekeeping	Pasteurisation > 71.7 °C > 15 seconds	3	3
1	AMF Delivery	Listeria monocytogenes		Hygiene General	Storage 1 - 5 °C	3	3
1	AMF Delivery	Personal effects		Protective Work Wear	Storage < -18 °C	3	3
1	AMF Delivery	Wood		4. Storage Prerequisite Programme	Filtration 3mm maximum	3	1
1	AMF Delivery	Nuts		Identification and segregation of allergens during storage	Filtration 3mm maximum	1	3
1	AMF Delivery	Stones		2. Manufacturing Control	CIP to specification	2	2
1	AMF Delivery	Allergens		Glass Breakage and Investigation Procedures	Hot Water Disinfection	1	1
1	AMF Delivery	Cryptosporidium parvum		5. Stock Control	Incubation pH Control	3	3
1	AMF Delivery	Contamination with Bacteria from Pests		9. Pest Control	Positive Release of Finished product for micro	3	1
1	AMF Delivery	Antibiotics		2. Supplier Approval and Monitoring	CIP to specification	3	2
1	AMF Delivery	Staphylococcus aureus		Personnel Hygiene Facilities	Filtration 3mm maximum	3	3

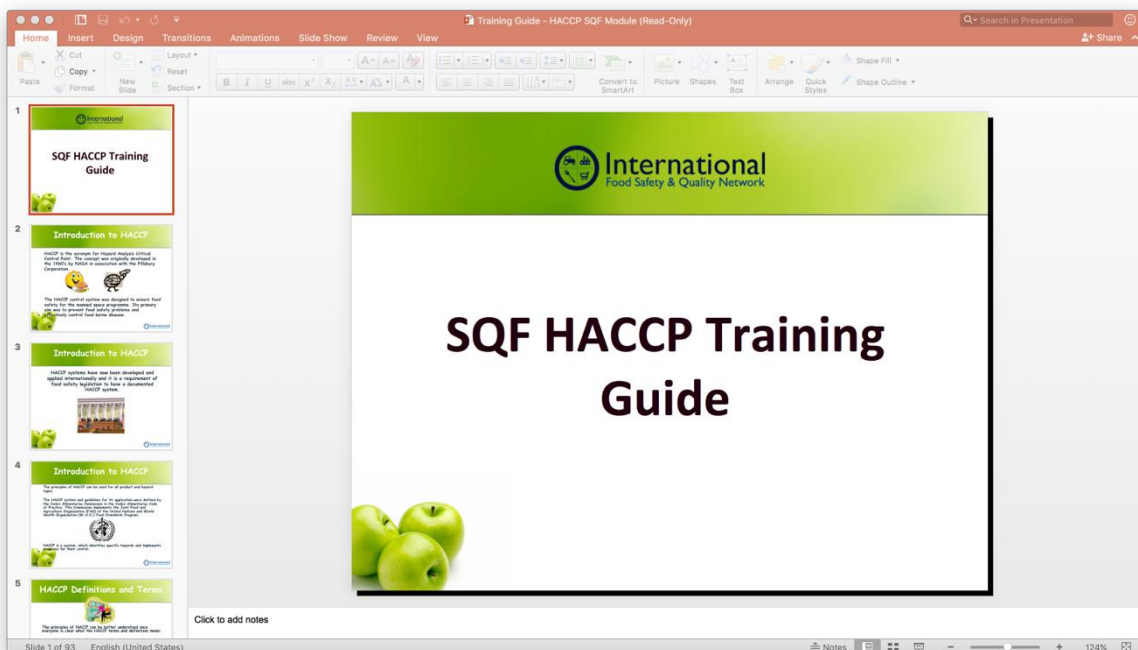

Document Reference HACCP Calculator Instruction 2

Revision 1 8<sup>th</sup> May 2017

Owned by: Technical Manager

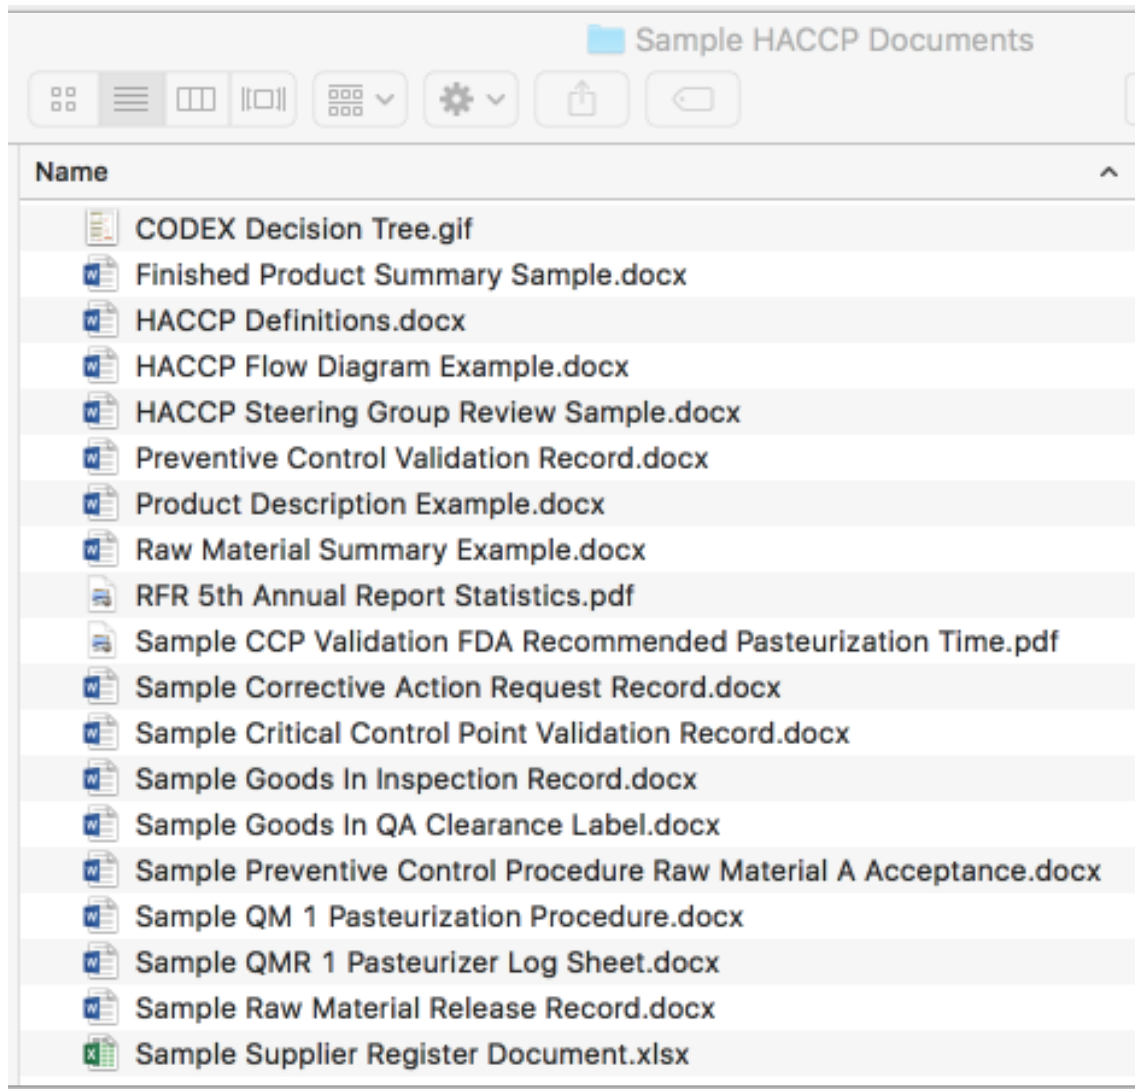

Authorised By: General Manager

This folder also contains a HACCP Training PowerPoint Presentation which is supplied to train your food safety team in the preliminary steps to a Hazard analysis, the principles of HACCP and how to utilize the HACCP calculator in implementing your HACCP system.

There is a Sample HACCP Documents Sub-Folder

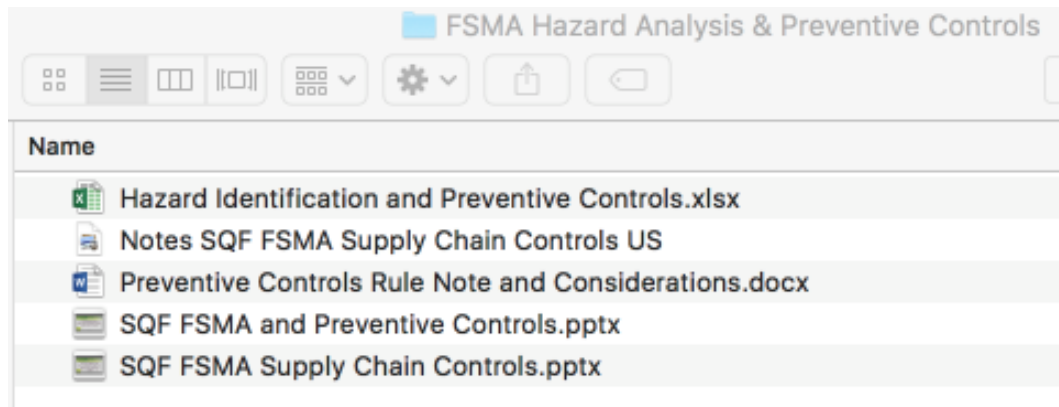

These are supplementary documents and examples that you might find useful when implementing your Food Safety Plans

Follow the step by step guide to implementing your HACCP using the document supplied and the SQF Hazard Assessment & Critical Control Point Calculator.

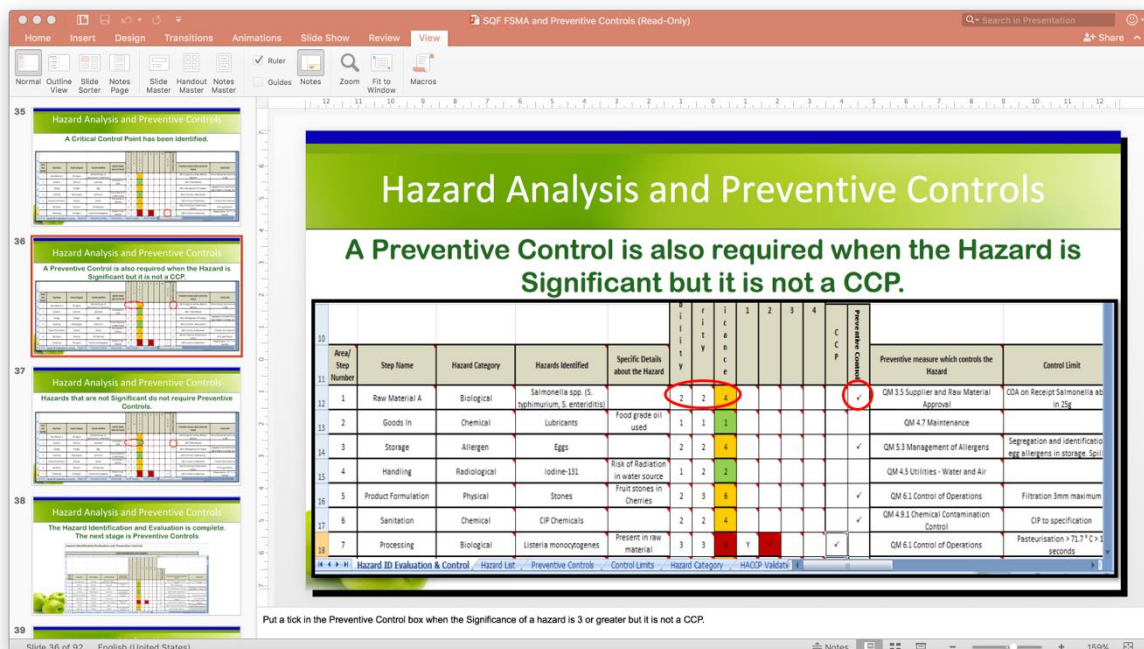

## FSMA Hazard Analysis & Preventive Controls Folder

This folder contains Guidance and Tools for the Implementation of the Preventive Controls for Human Food

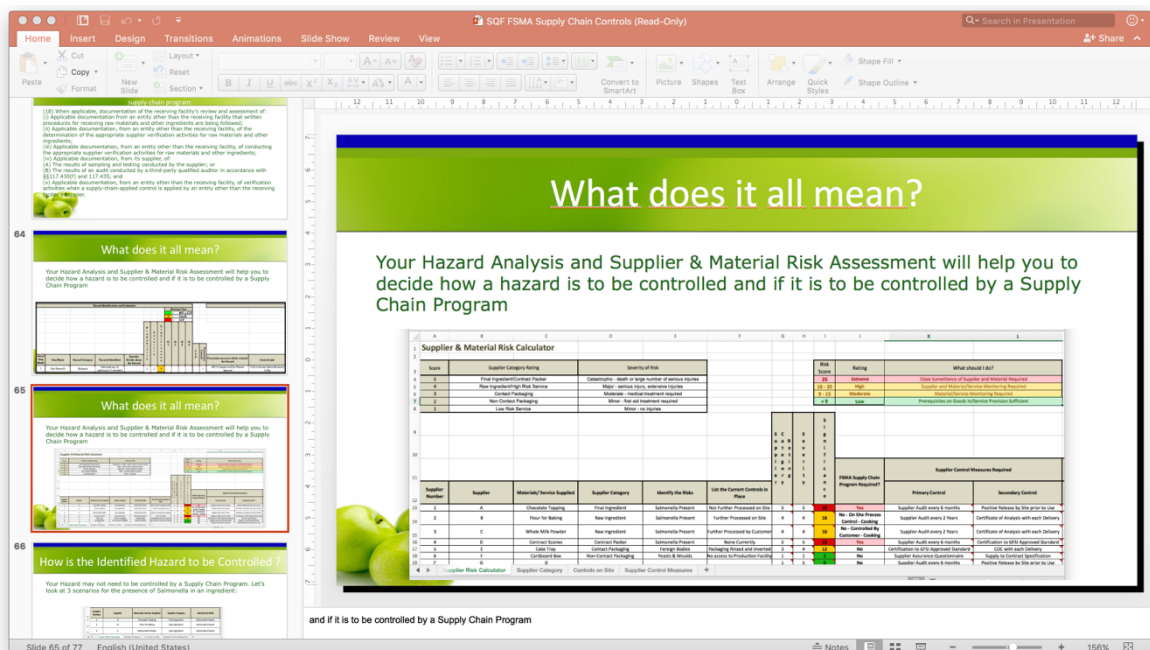

## SQF FSMA and Preventive Controls Presentation

The presentation contains Guidance and Tools for the Implementation of the Preventive Controls for Human Food.

Area/Step Number	Step Name	Hazard Category	Hazards Identified	Specific Details about the Hazard	Preventive Control	Preventive measure which controls the Hazard	Control Limit
1	Raw Material A	Biological	Salmonella spp. (S. typhimurium, S. enteritidis)	Food grade oil used	<input checked="" type="checkbox"/>	QM 2.5 Supplier and Raw Material Approval	COA on Receipt Salmonella and in 25g
2	Goods In	Chemical	Lubricants		<input checked="" type="checkbox"/>	QM 4.7 Maintenance	
3	Storage	Allergen	Eggs		<input checked="" type="checkbox"/>	QM 5.3 Management of Allergens	Degradation and identification egg allergens in storage. Soil
4	Handling	Radiological	Iodine 131	Risk of Radiation in water source	<input checked="" type="checkbox"/>	QM 4.5 Utilities - Water and Air	
5	Product Formulation	Physical	Stones	Fruit stones in Cherries	<input checked="" type="checkbox"/>	QM 6.1 Control of Operations	Filtration 3mm maximum
6	Sanitation	Chemical	CIP Chemicals		<input checked="" type="checkbox"/>	QM 4.9.1 Chemical Contamination Control	CIP to specification
7	Processing	Biological	Listeria monocytogenes	Present in raw material	<input checked="" type="checkbox"/>	QM 6.1 Control of Operations	Pasteurisation > 73.7°C > 30 seconds

## Guidance and Tools for the Implementation of Supply Chain Controls

Follow the step by step guide to implementing your HACCP/Food Safety Plans using the documents supplied and the Hazard Identification & Preventive Controls Tool.

- Intended use and reasonably expected handling
- Packaging
- Target consumers
- Possible unintended mishandling or misuse of the product
- Where the product is stored
- How the product is sold
- Labelling Instructions for handling, preparation and usage
- Prescribed delivery conditions

## Product Description

Product Description Questions	Details
What is the product name?	
What will the purchaser do with it?	
Details of the packaging?	
How is the product processed or manufactured?	
What is the composition of the product?	
Is there preservation from chemical composition such as pH or Aw?	
Does the product receive microcidal treatment such as heating, freezing, brining or smoking?	
What is the Shelf life?	
What is the prescribed storage temperature?	
What are the prescribed storage conditions?	
Who are the target consumers?	
Where is the product stored?	
How is the product sold?	
Labelling Instructions?	
Prescribed delivery conditions?	

Task 22 Flow diagrams are prepared for all products and processes including all the steps in the process

The Food Safety Team should be responsible for constructing flow diagrams for the products and process categories covered by the scope of the food safety management system as an overview of the process

The steps in the process should be logged:

Step Number	Step Name
1	Delivery of Ingredient A
2	Delivery of Ingredient B
3	Delivery of Ingredient C
4	Delivery of Ingredient D
5	Packaging Removed
6	Filtration
7	Batch Mixing
8	Standardization
9	Filtration

The flow diagram should be confirmed physically on site by the Food Safety team who should conduct a walk through verifying all steps in the process flow chart.

The food safety team can also use our hazard analysis prompt to identify potential food safety hazards:

Food Safety Hazard Analysis Prompt	
1	Are the raw materials, ingredients or food contact packaging likely to have microbiological hazards present? (Refer to Hazards worksheet)
2	Are the raw materials, ingredients or food contact packaging likely to have chemical hazards present? (Refer to Hazards worksheet)
3	Are the raw materials, ingredients or food contact packaging likely to have physical hazards present? (Refer to Hazards worksheet)
4	Are there any characteristics in the composition of the food during which can prevent a hazard? E.g. Preservatives, pH, Water Activity
5	Does the food permit survival or multiplication of pathogens and at which stages?
6	Does the process include a controllable step that destroys pathogens or their toxins? (Consider spores)
7	Is it possible the product could be subject to recontamination?
8	Is product contamination (consider direct and indirect contamination) with hazardous microbiological organisms from equipment, process environment or personnel likely to occur?
9	Is product contamination (consider direct and indirect contamination) with hazardous chemical substances from equipment, process environment or personnel likely to occur?
10	Is product contamination (consider direct and indirect contamination) with hazardous physical objects from equipment, process environment or personnel likely to occur?
11	Will the food be heated by the consumer?
12	Is it likely that the food contains viable spore forming pathogens?
13	Is it likely that the food contains viable non-spore forming pathogens?
14	What is the normal microbial content of the food stored under proper conditions?
15	Does the microbial population increase during the time the food is stored before consumption?
16	Does that increase in microbial population alter the safety of the food?
17	Does the layout of the facility provide an adequate separation of raw materials from ready-to-eat foods?

### Task 26 The food safety team specify acceptable levels for each hazard

For each Food Safety Hazard Identified, the acceptable level of the hazard in the end product is determined, justified and recorded taking into account regulatory requirements, customer food safety requirements, historic information, scientific literature, professional experience and intended use by the customer.

This hazard list is referred to as a preliminary hazard list and covers all hazards that could potentially occur in the product.

\*\*\*\* FSMA Preventive Controls for Human Food Rule requires §117.126 Food safety plans and §117.135 Preventive controls: (a) (1) You must identify and implement preventive controls to provide assurances that any hazards requiring a preventive control will be significantly minimized or prevented ...

Your team will need to also follow guidelines in the FSMA Hazard Analysis & Preventive Controls Folder and document Preventive Controls and CCPs in a Food Safety Plan.

**Task 27 The food safety team assess the food safety hazards**

Each potential food safety hazard should now be risk assessed by the Food Safety Team to determine whether its elimination or reduction to acceptable levels is required to produce a safe product and also any controls required to achieve the acceptable levels.

For each step grades of impact (severity of adverse health effects) and probability (likelihood of a food safety hazard occurring) need to be allotted and the combined matrix used to judge the severity and priority for elimination or minimization of the hazard.

The Food Safety Team should identify the hazards that need to be prevented, eliminated or reduced to acceptable levels.

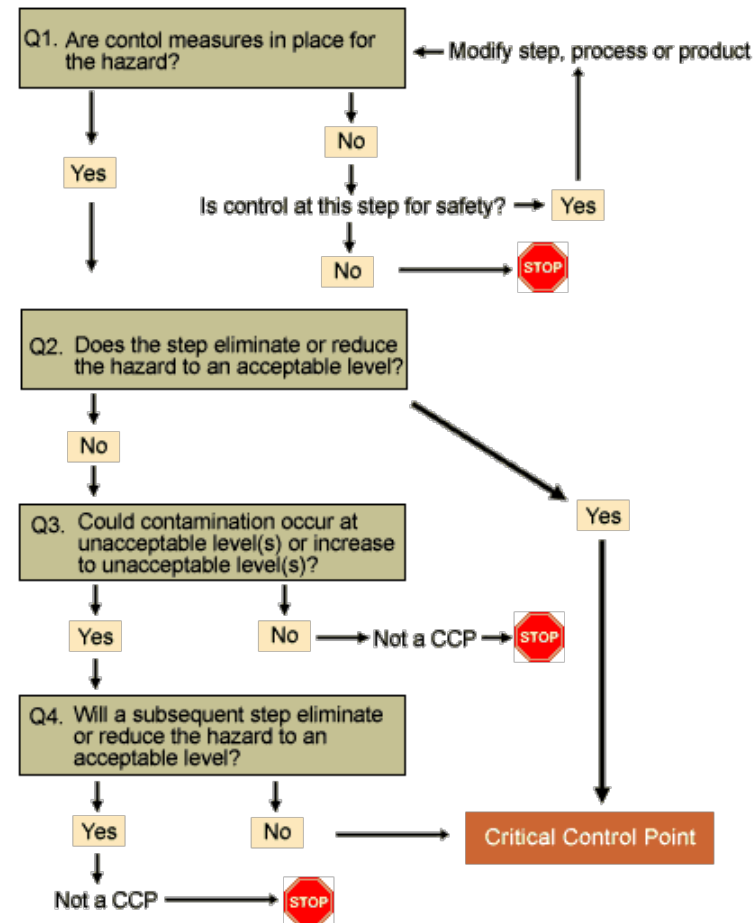

The Food Safety Team need to consider the probability of the hazard occurring, the severity of the hazard on the consumer, the vulnerability of the targeted consumer, the survival and multiplication of any biological hazards and any likely toxin production, the presence of chemicals or foreign bodies, contamination at any stage in the process and possible deliberate contamination or adulteration. This process is assisted using the worksheet Hazard Analysis Calculator:

Taking these factors into account a rating is given for probability and severity. Use the templates provided in the HACCP Manual to assist you.:

Step Number	Step Name	Hazards Identified	Probability	Severity	Significance
1	Delivery of Ingredient A	Bone	1	3	3
1	Delivery of Ingredient A	Campylobacter spp.	2	3	6
1	Delivery of Ingredient A	Contamination with Bacteria from pests	3	3	9
1	Delivery of Ingredient A	Pesticides	3	1	3
1	Delivery of Ingredient A	Salmonella spp. (S. typhimurium, S. enteritidis)	3	3	9
1	Delivery of Ingredient A	Bacteria (spore-forming) General	2	2	4
1	Delivery of Ingredient A	Pest control chemicals	1	1	1

## SQF & FSMA Food Safety Management System Implementation Workbook

This is carried out using the HACCP decision tree. Hazards identified at critical control points by the decision tree are controlled in the HACCP plan.

Task 35 The food safety team document the HACCP plan

The Food Safety Team should complete the relevant columns in the HACCP Plan Sheet:

Critical Limits	Monitoring Procedures	Corrective Action	Responsibility	HACCP Record
Minimum / Maximum acceptable levels to ensure condition is in control	<ul style="list-style-type: none"><li>- measurements to be taken (or observations) method of measurement</li><li>- devices used (including applicable calibration procedures)</li><li>- frequency of monitoring</li><li>- responsibility and authority for monitoring and evaluation of the monitoring results</li></ul>	Action to be taken when outside of critical limits to regain control and ensure unsafe product is controlled	Who is taking the action	Where is it recorded

Control Measure Validation

<b>Product Category</b>			
<b>Step Number</b>			
<b>Hazard</b>

# SQF & FSMA Food Safety Management System Implementation Workbook

\*\*\*\* FSMA Preventive Controls for Human Food Rule requires §117.126 Food safety plans and §117.135 Preventive controls: (a) (1) You must identify and implement preventive controls to provide assurances that any hazards requiring a preventive control will be significantly minimized or prevented ...

Your team will need to also follow guidelines in the FSMA Hazard Analysis & Preventive Controls Folder and document Preventive Controls and CCPs in a Food Safety Plan.

**Use Hazard Identification and Preventive Controls Excel file:**

Area/Step Number	Area or Step Name	Hazard Category	Hazards Identified	Specific Details about the Hazard	Probability	Severity	Significance	CCP	Preventive Control	Preventive measure which controls the Hazard	Control Limit
1	Raw Material A	Biological	Salmonella spp. (S. typhimurium, S. enteritidis)		2	2	4			QM 2.4.4 Approved Supplier Program	COA on Receipt Salmonella absent in 25g
2	Goods In	Chemical	Lubricants	Food grade oil used	1	1	1			QM 2.4.4 Approved Supplier Program	COA on Receipt Salmonella absent in 25g
3	Storage	Allergen	Eggs		2	2	4			QM 2.4.2 Good Manufacturing Practices	Segregation and identification of egg allergens in storage. Swillase procedures
4	Mixing	Radiological	Iodine-131	Risk of Radiation in water source	1	2	2			QM 11.5.1 - 3 Water and Ice Supply	Annual Testing Report from Water Company
5	Product Formulation	Physical	Stones	Fruit stones in Cherries	2	3	6			QM 2.4.4 Approved Supplier Program	COC on Receipt
6	Sanitation	Chemical	CIP Chemicals		2	2	4			QM 11.2.13 Cleaning and Sanitation	CIP to specification

Hazards requiring a Preventive Control need to be in the Food Safety Plan:

Area/Step Number	Area or Step Name	Hazards Identified	Probability	Severity	Significance	CCP	Preventive Control	Preventive measure which controls the Hazard	Control Limit
1	Raw Material A	Salmonella spp. (S. typhimurium, S. enteritidis)	2	2	4			QM 2.4.4 Approved Supplier Program	COA on Receipt Salmonella absent in 25g

# SQF & FSMA Food Safety Management System Implementation Workbook

At this stage, you will now be able to complete Tasks 38 – 44 using the document templates provided:

Task 38: The management establish a product traceability system - FS 2.6.2 Product Trace

Task 39: The system is used to identify and correct nonconforming products. Evaluate data and take corrective actions. - FS 2.4.5 Control of Non-Conforming Product or Equipment & FS 2.5.3 Corrective Action and Preventative Action

Task 40: A system is put in place to control allergens - FS 2.8 Allergen Management

Task 41: A food fraud prevention system is put in place - FS 2.7.2 Food Fraud

Task 42: A food defense system is put in place - FS 2.7.1 Food Defense Plan

Task 43: A system is put in place to control products that are potentially unsafe including withdrawal procedures - FS 2.6.3 Product Withdrawal and Recall

Task 44: A system is put in place to control monitoring and measuring methods and monitoring devices - GMP 11.2.3 Calibration

Step Seven: Training

A significant part of the implementation process is training. Job Descriptions should be available for all staff and they should be briefed and aware of their food safety responsibilities.

A training matrix and plans should be drawn up for all staff and the relevant training given based on responsibility and authority.

We have provided a Staff Training Matrix Template in Microsoft Excel Format.

For each employee and individual training record should be completed. FSR 002 Training Record is provided in the documentation pack as a template:

## QMR 002 Training Record

**AFC Training Record**

Name: \_\_\_\_\_ Employee Number: \_\_\_\_\_

Company Start Date: \_\_\_\_\_ Position: \_\_\_\_\_

Prior External Qualification(s), Skills & Experience:

Period Training Required	Details of Internal Training or External Training Course	Dates of Training	Signed (Trainee)	Assessed as Competent Signed (Trainer)
Weeks 1 - 4	Induction			
	Food Safety & Quality Policy Briefing			
	Food Safety & Quality Objectives			
	Health and Safety Procedure			
	Records monitoring and control			
Weeks 5 - 13	Environment and Waste Management			
	Packing Procedure			
	Operating Procedure			
	Coding Procedure			
	Labelling Procedure			

Document Reference Training Record QMR 002  
Revision 0 1st November 2020  
Owned by: Quality Manager  
Authorized By: General Manager

Basic Site Training should be given to all staff and also training in:

- ✓ Implementing HACCP for staff involved in developing and maintaining food safety plans;
- ✓ Monitoring and corrective action procedures for all staff engaged in monitoring critical control points (CCPs);
- Personal hygiene for all staff involved in the handling of food products and food contact surfaces;
- Good Manufacturing Practices and work instructions for all staff engaged in food handling, food processing, and equipment;
- ✓ Sampling and test methods for all staff involved in sampling and testing of raw materials, packaging, work-in-progress, and finished products;
- ✓ Environmental monitoring for relevant staff;
- ✓ Allergen management, food defense, and food fraud for all relevant staff; and
- ✓ Tasks identified as critical to meeting the effective implementation and maintenance of the SQF code.

The Food Safety Team should receive extra training:

- ✓ Internal Audit Training
- ✓ HACCP Training – Previously mentioned

Remember all food handlers should receive Basic Food Hygiene Training

## Internal Auditing Training & Checklists

Internal Auditor Training - An interactive and illustrated Internal Audit training presentation to train your Internal Audit procedure.

There is also a GMP audit training presentation provided.

### **Stage Eight: Final Steps to SQF Certification**

There are a few final steps to achieving SQF Certification:

- ✓ Verify that the FSMS is implemented effectively including internal audits
- ✓ Evaluate the results of verification activities
- ✓ Carry out Management Reviews
- ✓ Carry out an assessment of your system to make sure that it meets the requirements of the SQF Code and have the appropriate Good Manufacturing using the [SQF System Self-Assessment Checklists for Suppliers](#)
- ✓ Ensure any areas requiring corrective action are addressed
- ✓ Choose your Certification Body
- ✓ Agree a Contract with a Certification Body
- ✓ Pre-audit Document Review
- ✓ On-Site Audit
- ✓ Audit Review
- ✓ Certification Body Review
- ✓ Celebrate!
- ✓ Communicate your success!

## Verification Record Example

### Glass Policy Verification

Glass Policy Verification Audit	
Auditor Name	
Date	
Site Standards	Audit Findings
Are all employees including agency staff, visitors and contractors familiar with and follow the Glass & Perspex Policy?	
Is the use of glass on the manufacturing site minimized?	
Wherever possible are alternative materials to glass used?	
Are all personnel prevented from taking glass into production areas?	
Is there a comprehensive list of all glass (and glass-like materials) in each department for all factory production areas?	
Are these items checked every day by the Supervisor responsible for the department at the start of production and at the end of production to ensure they are not damaged?	
Are the results of the inspection recorded on a Glass Register and signed off?	
Is any breakage of glass occurring reported and dealt with immediately using the glass breakage procedure and record?	
Is glass used on food vessels such as 'sight glass' in viewing ports and vessel level indicators replaced where possible with suitable alternative materials which are capable of withstanding the production process?	
Where glass cannot be replaced due to process pressures and temperatures, is it 'toughened' and conform to international standards?	
Are glass components which are present in equipment such as temperature recorders and clocks replaced with suitable non-brittle alternatives?	
Are mirrors where permitted outside of production areas made of non-glass material or covered in a security film?	
Are internal or external glass windows present in production areas, raw materials, finished goods and packaging stores; engineering workshops replaced or made of toughened glass and be covered by a protective film?	
Where replacement of glass is not possible or the cost of replacement is unreasonable, is a suitable shatter-resistant

1

### Glass Policy Verification

security film applied to the total inner surface of the glass?	
Does the film used have a minimum of 100-micron thickness and qualify as a glazing safety material?	
Are all fluorescent light tubes and other forms of lighting fully protected against possible damage?	
Are fluorescent tubes either surface coated with a shatter-resistant material or housed within a fully protective unit?	
Are lighting fittings in production areas cleaned and changed during non-production hours?	
Are electronic fly-killing units fitted with tubes which are protected against damage?	
Are the EFK tubes either surface coated with a shatter-resistant material or housed within a protective outer tube made of a suitable alternative material?	
Are EFK units sited away from open food processing equipment?	
Are glass bottles or containers prohibited from being used for delivery of food ingredients?	
Where the use of glass containers is unavoidable, is each container carefully examined for any sign of chipping or breakage and must be safely disposed of or rejected where necessary?	
Are contents of glass containers destined for use in production areas either sieved or filtered in a separated area prior to transfer for production?	
Is this process recorded together with appropriate action taken where glass contamination is evident?	
Is the location of all glass and glass-like (i.e. that which may shatter like glass) materials within all production areas identified and recorded on a Glass Register?	
Are brittle Perspex and plastic items are also highlighted on these audit sheets?	
Are inspections carried out daily?	
Are brittle materials in production areas, checked at the beginning and end of production with the time and date being recorded?	
Does the auditing of light fittings include inspection for damaged or missing protective units/covers in addition to any obvious signs of breakage of glass tubes?	
Are all records signed and dated by the Manager of the department concerned and retained for a minimum of one year by the Technical department?

## Task 46 The food safety team evaluate the results of verification activities

The Food Safety Team should define the methods, frequencies and responsibilities for verification activities. Verification activities should be put in place by the Food Safety Team to confirm the effective operation of the Food Safety Management System.

The aim of the evaluation of the results of verification activities by the Food Safety Team is to confirm that:

- ✓ HACCP plan is implemented and effective
- ✓ GMPP(s) are implemented and effective
- ✓ Infrastructure and Maintenance standards are satisfactory
- ✓ Hazards are below identified acceptable levels
- ✓ All other procedures required for the effective operation of the Food Safety Management System are implemented and effective.

## Management Review Record

Management Review Meeting - Date xx-month YEAR

Meeting Objective

To review and assess the effectiveness of the Food Safety Quality Management System and to formulate action plans for improvement.

Attendees

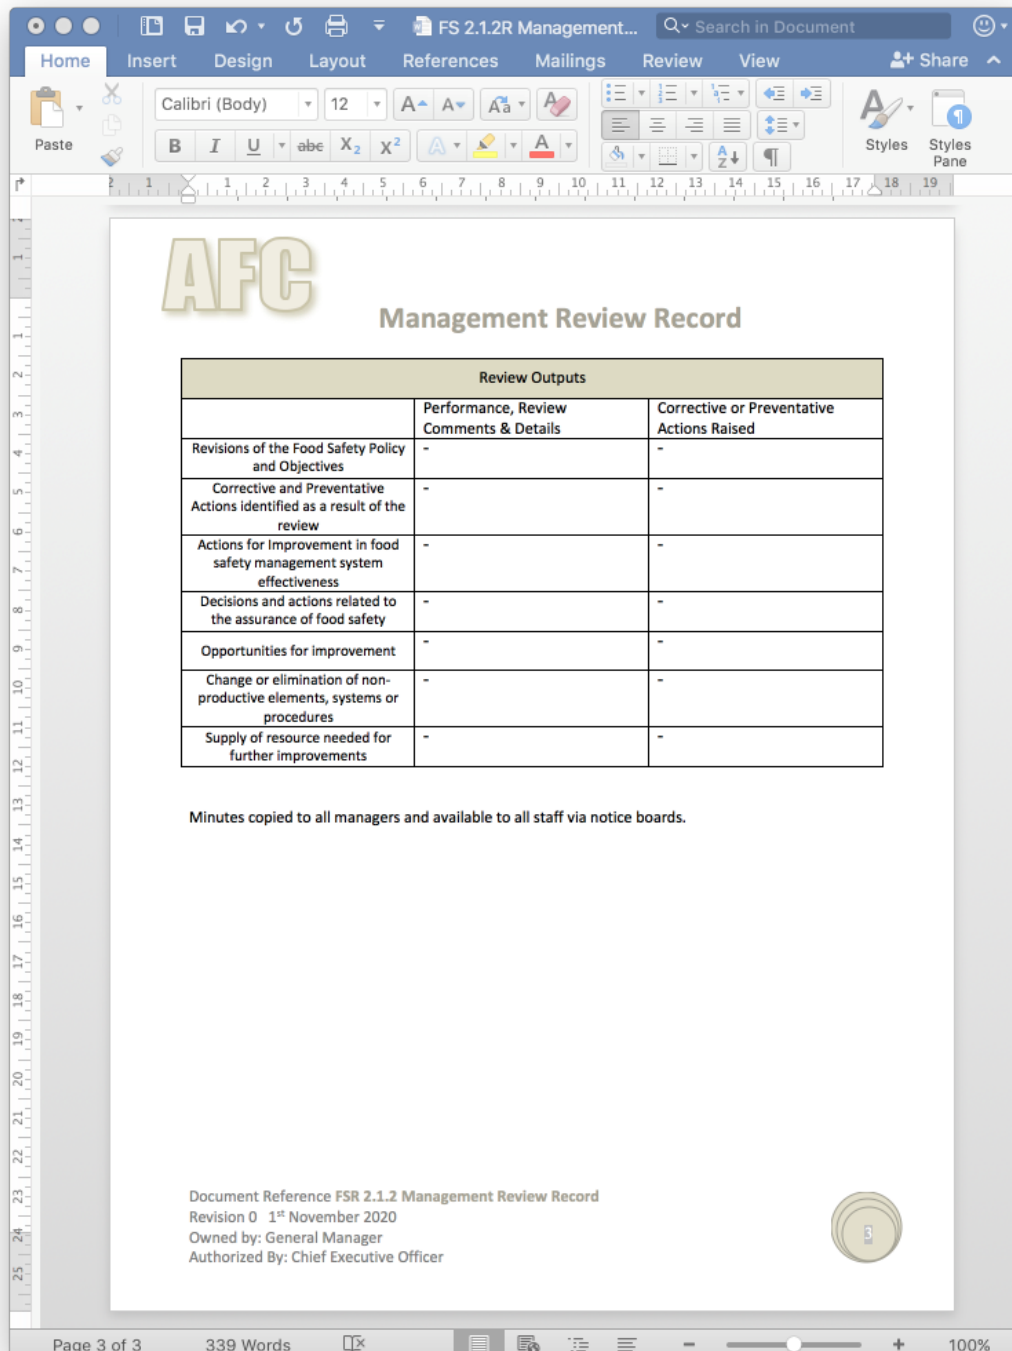

Chief Executive Officer - Chairman  
 General Manager - Deputy Chair  
 Operations Manager  
 Engineering Manager  
 Supply Chain Manager  
 Distribution Manager  
 Quality Manager

Review Inputs	Performance, Review Comments & Details	Corrective or Preventative Action Required
Review of the Food Safety Policy	-	-
Review of the Food Safety Objectives	-	-
Review of Management Changes	-	-
Minutes and Follow-up actions from previous management review meeting	-	-
Review of changes to food safety management system documentation including policies, procedures, specifications, food safety plan(s)	-	-
Hazard and risk management system review	-	-
Food Safety Culture performance review	-	-
Results and Outstanding Non-conformances from internal and external audits	-	-

## Task 48: The senior management team implement actions to continually improve the FSMS

Senior Management should implement actions to improve the Food Safety Management System. This will normally be as outputs from the Management Review:

The screenshot shows a Microsoft Word document titled "FS 2.1.2R Management Review Record". The document features the AFC logo and a table titled "Management Review Record" with the subtitle "Review Outputs". The table has three columns: "Performance, Review Comments & Details" and "Corrective or Preventative Actions Raised". The table contains seven rows of review items, all with hyphens in the other two columns. Below the table, a note states: "Minutes copied to all managers and available to all staff via notice boards." At the bottom, document metadata is provided: "Document Reference FSR 2.1.2 Management Review Record", "Revision 0 1<sup>st</sup> November 2020", "Owned by: General Manager", and "Authorized By: Chief Executive Officer". A circular stamp with the number "3" is also visible.

Review Outputs		
	Performance, Review Comments & Details	Corrective or Preventative Actions Raised
Revisions of the Food Safety Policy and Objectives	-	-
Corrective and Preventative Actions identified as a result of the review	-	-
Actions for Improvement in food safety management system effectiveness	-	-
Decisions and actions related to the assurance of food safety	-	-
Opportunities for improvement	-	-
Change or elimination of non-productive elements, systems or procedures	-	-
Supply of resource needed for further improvements	-	-

Minutes copied to all managers and available to all staff via notice boards.
