Save 1,000's of hours writing your own documents by purchasing our new Small Business Food Safety Management System.

The Small Business Food Safety Management System Package provides any small business with key core food safety management system documents, good manufacturing practices, a HACCP manual and record templates.
Small Business Food Safety Management System

The Small Business Food Safety Management System has been designed to cover the elements prescribed in Part III of the GFSI Benchmarking Requirements which gives guidance and specifies the requirements for a food safety certification program owners. This means the package is suitable for smaller food manufacturing organizations looking to gain certification to a GFSI benchmarked standard for food manufacturers.

GFSI Benchmarking Requirements prescribe the principle elements required of a food safety management system including those required for the production of safe food and defines the key elements required in a Certification Program in relation to:
- Hazard Analysis and Critical Control Points (HACCP) or HACCP based systems
- Food Safety Management Systems
- Good Manufacturing Practices

Small to medium organizations in the food industry, have fewer resources compared with large companies, and so find it difficult to implement an effective system. The Small Business Food Safety Management System Package is designed to help organizations tackle the task of implementing an effective system and progress towards certification.

The package gives organizations a head start in developing their system and preparing for certification by enabling them to put in place:

- Fundamental Food Safety Procedures - A set of top level food safety management system documents are included
- Good Manufacturing Practices - A set of Fundamental Good Manufacturing Practice Procedures are included
- A HACCP based System – A HACCP Manual is included. There is also guidance on how to manage and implement a HACCP system and determine critical control points (CCPs).

As a bonus the Package is backed up by expert support which is available to provide assistance in developing the system.

The main Small Business Food Safety Management System documents are in Microsoft Word English (US) format, so easily adapted to suit any small business.

See more details of the contents on the following pages.
Small Business Food Safety Management System

Food Safety Management System Procedures

A Comprehensive set of top level documents that form the basis of your food safety management system are included:

FSM 1 Management Responsibility
FSM 2 Management Commitment
FSM 3 Management Review
FSM 4 Food Safety Legislation
FSM 5 Food Safety Management System
FSM 6 Food Safety Policy
FSM 7 Food Defense
FSM 8 Food Fraud
FSM 9 Documentation Requirements
FSM 10 Specifications
FSM 11 Procedures
FSM 12 Resource Management
FSM 13 Purchasing and Supplier Performance
FSM 14 Traceability
FSM 15 Product Development
FSM 16 Allergen Management
FSM 17 Control of Measuring and Monitoring Devices
FSM 18 Product Labelling and Product Information
FSM 19 Laboratory Testing
FSM 20 Internal Audit
FSM 21 Complaint Handling
FSM 22 Serious Incident Management
FSM 23 Product Release
FSM 24 Control of Non-Conformity
FSM 25 Corrective Actions
AFC

Purchasing

The new material, service or supplier is assessed by the food safety team then approved by the Quality Manager prior to supply. Criteria for selection, evaluation and approval of suppliers are recorded.

A documented risk analysis of each raw material or group of raw materials to identify potential risks to product safety, integrity, legality and quality is carried out by the Food Safety Team taking into account the potential for:

- Chemical, Microbiological or Physical contamination
- Allergens and possible allergen contamination
- Possible substitution or fraud
- Effect on product quality

Consideration is given to the significance of a material to the quality of the final product. The results of the risk analysis dictate the criteria for supplier assurance, testing and acceptance of raw materials and procedures for supplier monitoring. All risk assessments are reviewed when there are changes to materials and at a minimum annually.
Auditor Training Guides

A PowerPoint Internal Auditor Training Guide Presentation is included.

A PowerPoint GMP Audit Training Guide Presentation is included.

Small Business Food Safety Management System

HACCP Manual Documents

A set of HACCP Documents to enable the development of a HACCP System based on "Hazard Analysis and Critical Control Point (HACCP) system and Guidelines for its Application" (Codex Alimentarius Commission, Geneva).

HACCP 1 HACCP Team
HACCP 2 Product Descriptions & Scope
HACCP 2 Appendix 1 Sugar Specification
HACCP 2 Appendix 2 Raw Material Summary
HACCP 2 Appendix 3 Product Description
HACCP 3 Intended Use
HACCP 4 Flow Diagrams
HACCP 4 Appendix 1 Flow Diagram Sample
HACCP 5 Flow Diagram Verification
HACCP 6 Hazard Analysis
HACCP 6 Hazard Analysis Template
HACCP 7 Determine Critical Control Points
HACCP 7 Appendix Hazard Assessment
HACCP 8 Establishing Critical Limits for each CCP
HACCP 9 Establishing a Monitoring System for each CCP
HACCP 10 Establishing a Corrective Action Plan
HACCP 11 Establishing Verification Procedures
HACCP 12 Establishing HACCP Documents and Records
HACCP 12 Appendix 1 Sample HACCP Procedure
HACCP 12 Appendix 2 Sample HACCP Record
HACCP 12 Appendix 3 Sample HACCP Plan Template
HACCP System

Introduction

All products and processes used in the manufacture of food products are subject to hazard analysis based on the Codex Alimentarius HACCP principles.

HACCP Application

Food safety plans are prepared in accordance with the twelve steps identified in the Codex Alimentarius Commission GUIDELINES FOR THE APPLICATION OF THE HACCP SYSTEM CAC/RCP 1-1989, Rev. 4-2003:

1. Assemble HACCP team
2. Describe product
3. Identify intended use
4. Construct flow diagram
5. On-site confirmation of flow diagram
6. List all potential hazards associated with each step, conduct a hazard analysis, and consider any measures to control identified hazards (SEE PRINCIPLE 1)
7. Determine Critical Control Points (SEE PRINCIPLE 2)
8. Establish critical limits for each CCP (SEE PRINCIPLE 3)
9. Establish a monitoring system for each CCP (SEE PRINCIPLE 4)
10. Establish corrective actions (SEE PRINCIPLE 5)
11. Establish verification procedures (SEE PRINCIPLE 6)
12. Establish Documentation and Record Keeping (SEE PRINCIPLE 7)

HACCP Principles

HACCP is a system, which identifies specific hazards and implements measures for their control. All the HACCP’s contained in this manual have been developed taking legislation requirements into consideration, following the prescribed preliminary steps and using the seven basic principles detailed below:

Principle 1
Prepare a flow diagram of the steps in the process. Conduct a hazard analysis by identifying potential hazards. Assess likelihood of occurrence of these hazards and identify control options.
HACCP Training Guide

A PowerPoint HACCP Training Guide Presentation is included with the HACCP Manual.
